

**TERRACE BAY
POLICE
DEPARTMENT**

POLICE REPORT 1 to 6 SEPTEMBER 1977:

The Terrace Bay Police Force was called upon to investigate twenty-eight occurrences during the period 1 to 6 September.

On September 1st, officers on patrol checked a vehicle and the driver was charged with having liquor readily available under the Liquor Licence Act of Ontario. One minor vehicle collision was investigated on Highway 17 and the driver was charged with careless driving. One driver was charged with impaired driving after having been stopped by officers on patrol.

On September 4th, two persons were charged with offences under the Liquor Licence Act. A local youth was charged with mischief after investigation showed that he had broken the plate glass window at Moore's of Terrace Bay. Court has been set for 29 September 77.

On September 5th, one charge was laid under the Highway Traffic Act and police also investigated the theft of three 10 speed bicycles. These bikes have been recovered with one being damaged beyond repair. It is requested that bicycle owners keep their bikes locked up or placed in the garage as there appears to be a rash of bicycle thefts recently. On this date two persons were charged under the Liquor Licence Act after being checked by patrolling officers.

On September 6th, members of the Department were called to attend at the Labour Day dance being held at the Arena. As a result, two persons were charged with public intoxication, three charges were laid for causing a disturbance by fighting and two charges of obstructing a peace officer in the execution of his duty were laid.

Tuesday and Thursday - 10 to 12 noon &
7:00 p.m. - 9:00 p.m.

**NORTHERN
AFFAIRS**

BY JIM TRISTRAM

Fishing still means knowing about bait, tackle and where the big ones are.

But today, it also means being cautious about the amount and type of sport fish you eat.

It's a fact of modern life that fish in many parts of the world have been affected by natural and industrial contaminants. As an industrialized province, Ontario has not escaped this problem. But the province is also a leader in identifying sources of contamination and restricting them.

Principal villain has been the metal mercury although man-made materials such as DDT, Mirex and PCB have also been found in fish.

None of these contaminants has ever been found in quantities that would make any of Ontario's lakes unsafe for drinking or swimming.

It's a fact, too, that fish can become contaminated by mercury from natural sources - from concentrations of mercury naturally occurring as mineral deposits in the bedrock.

But the picture is by no means gloomy for Ontario sports fishermen. Some lakes have fish that are clear of contamination. Where the problem does exist, many species of fish should be avoided altogether.

A booklet the purpose of which is to present the facts about fish contamination has been published from material assembled by the ministries of the Environment, Health, Labour and Natural Resources entitled "Guide to Eating Ontario Sportfish". For your copy contact the Northern Affairs Office at the Lower Floor, Peninsula Building, Marathon, Ontario. Phone 229-1153.
