FIRST AID TIP

from

TO CONTROL SEVERE BLEEDING

- Apply hand pressure to the bleeding part, over a dressing if available. If one dressing becomes bloodsoaked, don't remove it — place another over it
- Lie the casualty down and elevate the injured part above the level of the heart. Cover dressing with a pad of soft material and hold dressing and pad in position with a firm bandage
- If there is a foreign object embedded in the wound, don't remove it. Removal may cause more serious bleeding. Loosely cover the object with a light cloth to prevent infection then apply pressure around the object.
