

Wasting electricity is a hot issue.

Appliances that heat things up can use a lot of electricity. Here are some tips on how to cut down.

Watch out for the elements. Choose the element that best fits the pan. A lid on the pan also keeps heat from escaping.

Load it in your favour. Wait until you have a full load before you wash. And remember, much of your laundry will get

Give your dishes the air. You'll save electricity with your dishwasher if you cancel the final dry cycle. Just open the door and let your dishes air dry.

Electricity down the drain. A dripping hot tap can waste 175 gallons of hot water a month. A new tap washer costs only a few pennies.

just as clean in cold water. Afterwards, hang your clothes outdoors to dry.

Don't sneak a peek. Don't open the oven door unless you have to. And don't use an oven full of heat for one small item.

Don't join the tub club. A shower usually takes less hot water than a bath.

your hydro
