SENIOR CITIZENS' HOUSING

I have been advised by the Ministry of Housing that they have purchased from the Township of Schreiber the necessary land on which to construct 23 senior citizen units in two storey design.

Tenders for the construction of the buildings were called during the latter part of March and closed April 27, 1978. Two bids were received; one from Engineered Structures and Components for \$590,000.00 and one from West York Construction Limited for \$628,000. Housing approved the contract to the lowest bidder, Engineered Structures and Components of Toronto, Ont.

Central Mortgage and Housing Corporation is expected to shortly approve the 90% loan toward the building cost. The Ontario Government's Housing Ministry is awaiting approval from the Management Board for the remainder of the capital funding.

The final design drawings are now being prepared and as soon as they are submitted and the plans approved construction can commence.

I am hopeful that construction can start in the early part of August or the middle of that month. I think this is welcome news to those senior citizens in Schreiber who require this much needed accommodation.
