

- 1. your outdoor receptacle. Then just plug the engine heater into the timer.
- 2. If your outdoor receptacle is controlled by a switch, you can replace the switch with a *Wall Switch Timer*. It may require some minor wiring changes by an electrician.
- 3. The *Wired-in Panel Timer* fits directly into the circuit that feeds electricity to your outdoor receptacle into which you plug your engine heater. It requires permanent wiring at your fuse panel and should be installed by an electrician.
- 4. The *Indoor Timer* plugs directly into an indoor wall outlet; in the house, carport or the garage. The engine heater plugs into the timer.

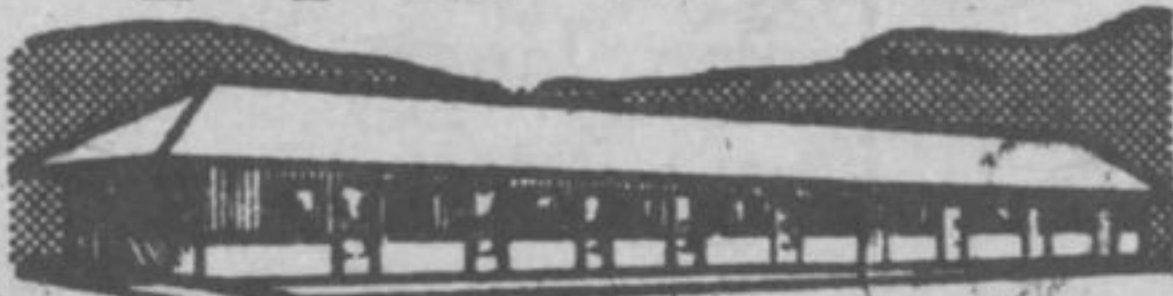

Wasting electricity turns people off.

CAUTION: Whatever timer you choose, make sure that it's C.S.A. approved. If your engine heater has a ground pin, do not remove it under any circumstances. Your timer must be equipped to accept the ground pin.

This workshop will be held Thursday, November 16, from 9 a.m. to 12 noon at Birchwood Terrace. There is no registration fee. ARENA UPDATE:

There has not been a negative or positive response from the Ministry of Labour on the existing arena, as a result it will remain closed. We are still urging those persons that have made pledges to honour their commitment. The more monies received from the pledges now means the Township will not have to borrow the money to cover expenses, until that cash comes from you. There is still the extra \$183,000 needed to be raised above that already received, pledged or on payroll deduction.

The Legion sponsors over 5,400 separate youth program groups, including cadets, scouts and sports of all types. It is the largest single sponsor of scouting in Canada and sponsors more hockey teams and leagues than any other one organization in the country (over 800 branches sponsor hockey). (The local Terrace Bay Legion has sponsored the Terrace Bay Pee Wee All Star Hockey team for the past 8 years.)

Legion Branch buildings are worth approximately \$200 million.
