### IN MEMORIAM

**GOULD:** In loving memory of my dear husband and father, Fred, who passed away October 2, 1981.

A million times I needed you  
A million times I cried  
If love could have saved you dear  
You never would have died.  
Are the hardest things to say  
My dearest Fred, I loved you in a  
special way.  
If I could have one life time wish  
One dream that could come true  
I pray to God with all my heart  
For yesterday and you.

So sadly missed by Clara, your wife,  
and daughters Nancy and Gail.

October 1st, marked the first day of the 1983/84 skating season. Welcome all skaters!

Also we are pleased to welcome back Mr. Paul Wirtz, Senior Club Professional, who joins our Club for the fourth consecutive year, and Mrs. Jackie Snider, Junior Professional, for her second season with us. In addition, we are proud to introduce Miss Lora-Jay Jones of Thunder Bay, who joins our staff as Junior Professional. We look forward to an exciting and successful year.

Anyone still interested in registering may do so by contacting Mrs. Mary-Ellen Bouchie at 825-9019 or Mrs. Marie Stark at 825-9320.

On November 1, 1983, we will be introducing the new *Can-Skate* programme which should

prove to be an enjoyable learning experience for the recreational and beginner skaters. A seminar will be conducted and will provide the details on this programme, on Saturday, October 15th from 8:30 a.m. until 5:30 p.m. at the Recreation Centre. Although the main objective of this seminar is to certify coaches to teach the *Can-Skate* programme, there is much to be gained by registering as an observer. If you are interested please contact Lucille Kodila at 825-3306.

A meeting with the parents of the *Can-Skate* children will be held shortly after this seminar to answer any questions on this programme.

Congratulations to Mrs. Linda Churchley, the winner of the 50/50 Draw and to Mrs. Margaret Mauger, winner of the handcrafted doll. Both draws took place at the Fall Fair on September 11th. We take this opportunity to thank everyone for their continued support.

The second annual *Skate-A-Thon* will be held on Saturday, October 8th from 3-8:00 p.m. Sandwiches, cookies, hot chocolate and kool-aid will be provided for all the skaters. Join in the fun!

### "Timmins vs. Schreiber (and Curtis)"

They "out-slugged - out-fought and out-muscled" to win their match.

The butterflies did not last too long for the Schreiber team, as Dom "Hollywood" Filane fought the first match of the day, and knocked his opponent, Shawn LeBrun, of Timmins out, in the first ten seconds of the first round. Once again, proving why he was picked as Schreiber's "Boxer of the Year"!

Schreiber's Paul Anderson showed his stuff in his first fight, and started his career out right by winning a unanimous decision over Timmin's Dan Lariviere.

In the next bout, Schreiber boxer, Rick Morgan took a severe pounding from Timmin's Dan Price in the first round, but came out flying in the second to knock Price out. Gerry Filane of Schreiber had the roughest fight of the day as he and Timmins' Rick Gillnette, staged a pier-six brawl to the delight of the crowd. Filane was edged out in a close decision.

Billy Mackenzie is starting to really improve as he completely dominated Timmins' boxer, Reg Moran in the light-heavy weight division.

Curtis Evoy was the big story of the trip as he out-fought, out-slug-

ged, and out-muscled Timmins' Dino Amadeo in a middleweight bout. Evoy won a unanimous decision.

Schreiber's Mario Vasilu got caught early in the second round of his welterweight fight with Timmins' Mike Corshane. Corshane caught Mario behind the ear with a straight left and the referee fearing injury, stopped the bout. The Schreiber team

was very happy with the officiating and the hospitality shown by the Timmins people.

#### Fiber Optics

Doctors may be able to locate and treat lung cancer tumors much earlier than ever before with a new fiber optics device designed by a team of University of California at Santa Barbara engineers.

The diagnostic device would enable doctors to locate tumors long before they would show up on X-rays or invade tissue, according to A. Edward Profio, professor of chemical and nuclear engineering.
