

Your Opinion

Question: Do you think the selection for "Moose Tags" is done in a fair way?

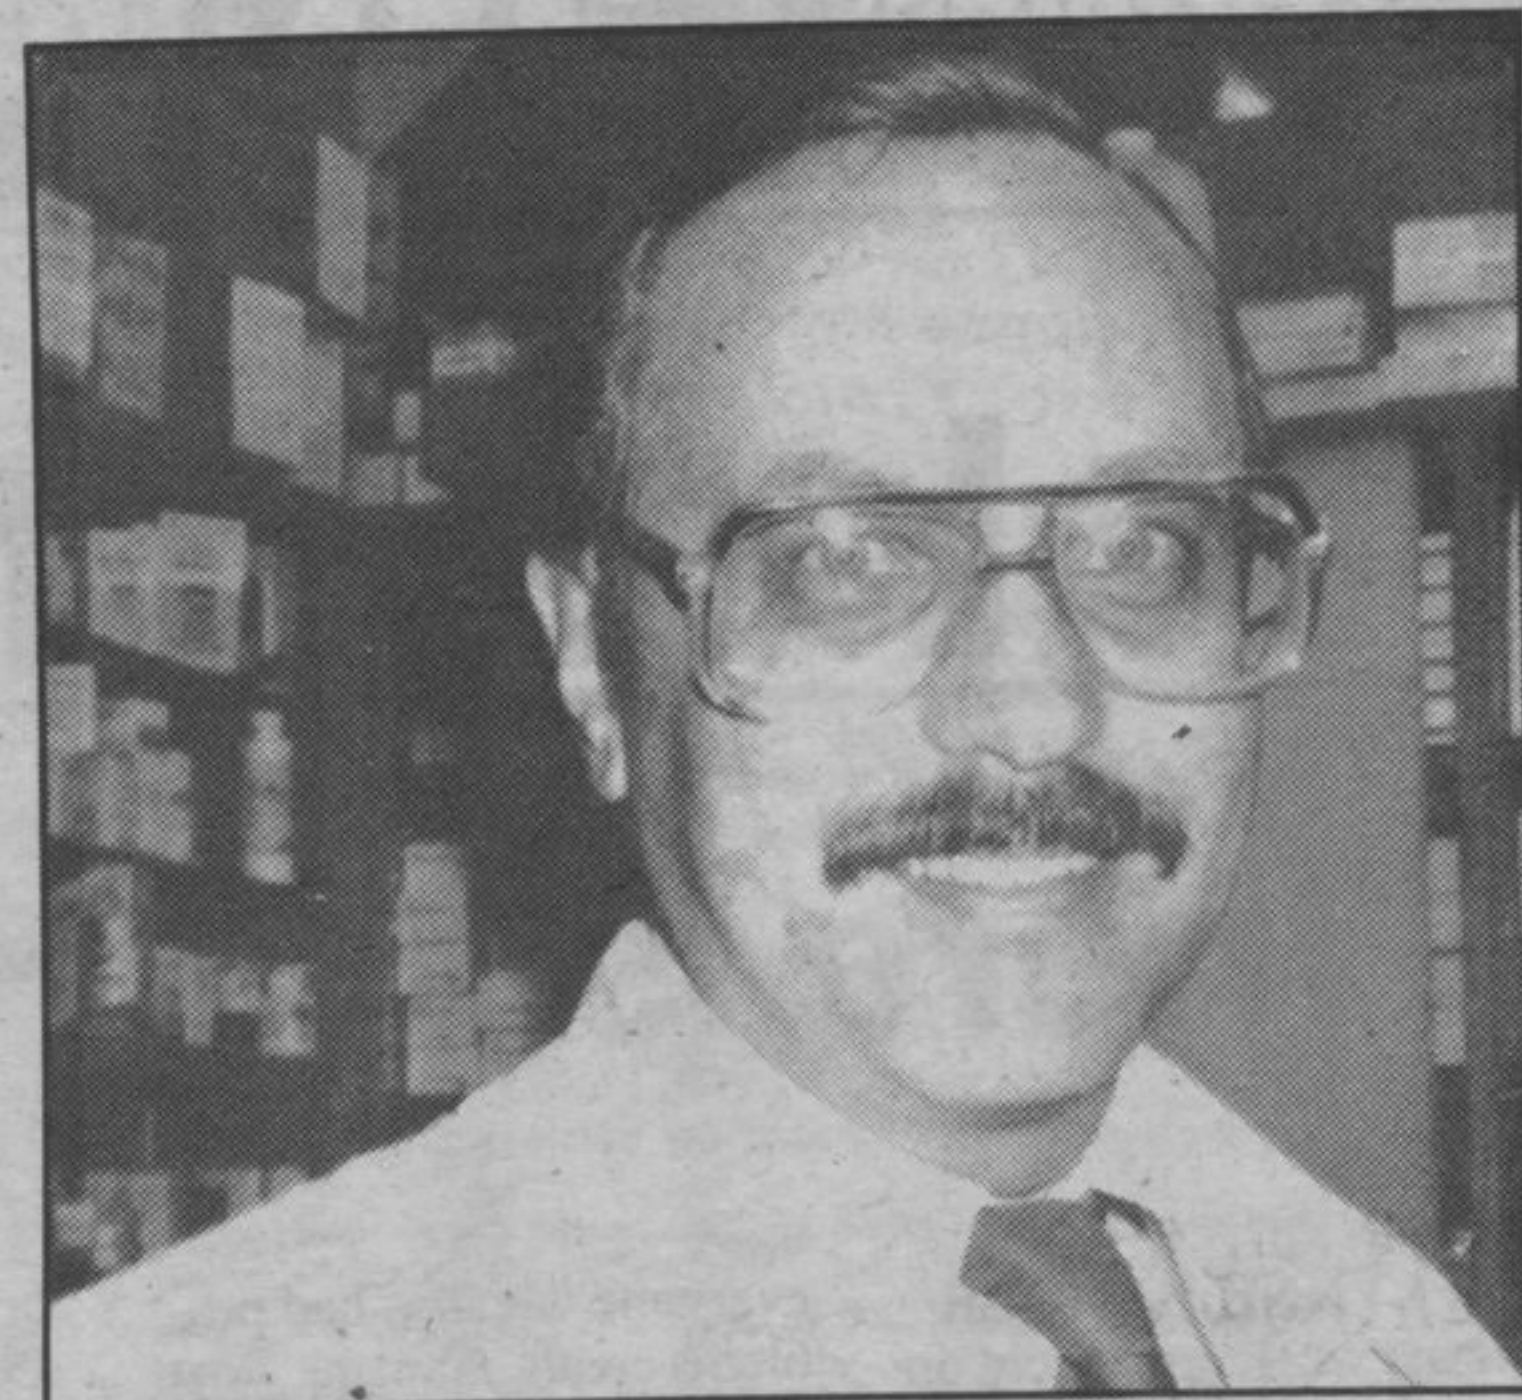

Natalie Boucher:

The draw seems fair to the hunters, with the results also being in favour of the Moose population.

Floyd Liebrock:

Yes the selection seems fair but can a conservationist or anybody return their license and get a refund before the hunting season opens?

Tarma Ronkainen:

You cannot beat the computer for random selection. It seems to be done in a fair way.
