Canada Day Celebrations

The Terrace Bay Canada 1985 Committee held their first meeting March 28th with many representatives of the communities, groups and organizations attending. Councillor Ollie Chapman, representing the Town Council called the meeting to order.

The activities discussed

were: the opening ceremonies to be June 28th, 1985, with T. Morris as master of ceremonies. Invitations to the opening will be sent to both federal, provincial and local political figures. There will also be an open family street dance that evening, with local talent performing.

On Saturday, June 29th will be the Canada Day Parade, which will start and finish at the McCausland Hospital. The committee is inquiring into bands who will perform, and other organizations who would like to enter floats etc. The Fraser Girls Pipe Band has confirmed their participation.

There will be Go-Cart Races, Mixed Slow Pitch Baseball Tournament, Pancake Breakfast, Fireman's Display etc. etc. etc. The committee is confident this will be the best Canada Celebration yet and urges all residents to plan to attend the events. The next meeting will be held Thursday, April 18th.

Possible Debate

There is a good possibility that we will see a debate between the three candidates running in the Lake Nipigon Riding this election. Mr. Jack Stokes has been the representative of this riding for 17½ years and will not be running for re-election this time around.

After 17 years with the same representation some residents of this riding think a debate is in order to give the people a chance to ask questions and raise concerns. All 3 candidates are willing to debate but the timing of this event is yet to be worked out.

Body Found

At 3:15 p.m. on Tuesday, April 2nd, Police and Ministry of Natural Resources Personnel attended the Terrace Bay Beach. A human body was observed partially decomposed and frozen in the ice. The body was cut out of the ice and removed to the Morgue. An investigation to establish the identity of the body is still being conducted.

The NEWS spoke to

Mrs. Freda Boucher who found what she thought to be the carcass of an animal. Freda, walking with her dog, began to dig in the snow, which brought her attention to the site. Freda tried to identify the carcass, but found it to be frozen too far into the snow. She made a mental note to get in touch with the MNR office as she knew they'd be interested in investigating.

Winners of the Terrace Bay-Schreiber NEWS Easter colouring contest L-R Kim Morrell age 6, Chris Cashmore, age 11 cash prize winner and Bev Borsa age 9.

A step into history ... party with the knitting club in Terrace Bay, Nov. 1952.

Did You Know

Curling in Schreiber began 91 years ago, 1894, with the Riley Cup introduced for competition.

Canadian Cancer Society

April is Cancer Month and the Canadian Cancer Society goes into a full swing campaign to raise money for Cancer. The most effective way they will raise money is through the door-to-door canvass which will begin very soon. The people of this area always give generously.

The Canadian Cancer Society was established in 1937 by and at the sugges-

tion of the Canadian Medical Association. Its initial purpose all year long is the education of the general public with regard to Cancer. Their aims are now three-fold; Education, in order that the disease may be prevented or diagnosed and treated in the earliest states, service to Cancer patients and fund raising.

The Cancer Society was originally founded to inform people that consultation with the family doctor is essential in the early treatment and detection of Cancer. Literature, films and displays plus T.V. carry out this aim. A programme to inform students of the relationship between smoking and lung cancer is carried out in the schools. Industries are also reached, and nurses from the Industrial Cancer Education Service show films and give brief talks to groups of employees who then are available to speak to individual workers wishing to ask questions. Special cancer education programmes are provided for members of the health team, physical education, and health teachers and others.

There is the Cansurmount programme, which is an emotional support system for cancer patients and their families. The programme is established in communities and run by volunteers. The volunteers must be willing to take training for the role of visitor and also attend regular educational support

meetings. They must have a positive attitude and be able to listen with sympathy and sensitivity to both patient and family.

With permission of the patient's family physician, a visit by a registered nurse from the department of Public Health, V.O.N. or Nursing Association is provided free of charge to assist in determining the needs of the cancer patient. The Society also provides morale-building visits to patients who have undergone breast surgery. The visitor herself has had a mastectomy.

Transportation is provided to patients in need either by volunteers or public convenience to and from Treatment Centers and Clinics. They also operate lodges which are funded by the Ontario Cancer and Research Foundation. Payment by the society for a specified list of pain-relieving drugs is provided upon request of the physician to patients in financial need. There are also numerous prostheses such as wigs, breasts, electronic larynx, facial prostheses including eyes, artificial limbs and supplementary foods.

The society's principal source of income is voluntary contribution and bequests. They also receive funds from industry, commercial sources and through special events. Thousands of volunteers give their time and talents to the Campaign effort as they know "Cancer can be Beaten."
