

Your Opinion

We asked our readers how they felt about the transportation of hazardous

goods through our area, by highway and railroads.

Rose Garriock

I think the situation in Kenora and area is an awful thing. These trucks and cargo must be labelled properly. There should be extra precautions taken in populated areas.

Freda Boucher

I'd like to know the precautions taken to transport these dangerous chemicals. I know it has to be done, just how I don't know. The chemicals and trucks or railway cars must be marked properly, to minimize the dangers to the environment.

Mary-Jo Fisher

I don't feel safe with these chemicals coming through Terrace Bay. I think there should be more pull-ins off the highway and inspection stations should be open 24 hours a day.

Dan Hnatuk

I don't think the highways or railways should be used to transport, it is too dangerous, but if they have to the process should be as safe as possible.

Police Report

Two thefts over \$200 were reported to police in the past two weeks; one theft of an ATC was resolved after the vehicle was found several hours later in a ditch. Another theft of wood is still under investigation.

Police responded to a call to assist in a Landlord-Tenant dispute and all was settled with no mishaps.

After attending to a call for assistance from the Hospital, police removed two suspicious persons from the premises. A records check showed one subject as Wanted in Thunder Bay and Police had him transported to the City where the Arrest Warrant would be executed.

Constables attended a fight in the Red Dog parking lot which resulted in one local male being barred from the premises.

As a result of a complaint received by Police a person who was injured and required assistance was transported to the hospital for treatment.

One hit and run motor vehicle accident was investigated by Police. No charges laid to date.

A constable on checking a vehicle passing through the Township, learned it was a stolen auto. Occurrence settled without charges being laid at the request of the complainant.

Several tickets were laid under the Highway Traffic Act, also for parking violations.

One break and enter into a private residence was reported to police and is still under investigation.

Correction

On the 17th of April we at the NEWS made a mistake. We would like to apologize to Kodila's Home Hardware and to all the people who went out for the big sale which is not to run until May 1st through to May 4th. Please accept our apologies.

A second transportation co-ordinator will be assigned to counsel northern Ontario businesses on goods distribution methods, Transportation and Communications Minister George McCague said today.

Based in Thunder Bay, the new officer will be able to draw on the support of MTC's Goods Distribution Systems Office to provide practical advice on the effective movement of raw materials and finished products.

The decision to expand the program to northwestern Ontario was based on the success of MTC's first northern co-ordinator, W. Howe Wilcox, who set up an office in Timmins last August.

"We have received a great deal of positive feedback for our efforts at providing tangible assistance to small business,"

McCague said. "Not only has Wilcox been invaluable when it comes to solving specific problems ... he has given us first-hand insight into the goods transporta-

'We must take charge of forestry' says Pouliot

Saying that it was time to put an end to too many years of empty promises from the Conservative government, NDP candidate Gilles Pouliot spelled out his own plans to save the forest industry last Wednesday.

"If we continue the policies that are in place now, we will be sounding the death knell for the 42 northern communities that depend almost totally on our ability to produce wood fibre of a species and quality that our existing mills needed to continue their operations."

Saying that over 75 per

cent of the jobs in Northwestern Ontario depend on the forest industry, the NDP's candidate called for a comprehensive inventory of standing timber. "How can we responsibly manage our woodlands when we don't even know what's out there. We need to know the species we have, their age, how accessible they are, and whether or not it's economical to cut them. When we know this we can put money into regeneration and reforestation in the areas where it is going to do the most good."

Pouliot also called for an

number of northern businesses. More than 90 per cent of the firms requesting assistance have reported improved results in goods distribution and market penetration.

MTC will take steps to establish the Thunder Bay

office as soon as possible, beginning with a search to fill the co-ordinator's position. The successful candidate will work closely with the Ministries of Northern Affairs, Industry and Trade and Natural Resources.

Happy "April 26th"
To Lorraine H.
