

Students need jobs

By Jacki Speziale
Student Placement Officer

I'm glad to say that for some strange reason, the students of Terrace Bay and Schreiber are extremely eager to work this summer. We now have 133 students registered with the Canada Employment Centre for Students. That's 45 per cent over last year. There seems to be a shortage of jobs available for

these extra students. Every day, without fail, I have students in my office asking me for information on jobs. Well, folks, I need you, out there in the communities, to call me if you require the services of a student in any way whatsoever.

Does your lawn need to be cut, your shed painted, your wood chopped, your car washed? This is your

summer to lay back and put your feet up. Hire a student to do those chores for you. Students work hard and they work cheap, and that combination is difficult to find.

So let's all work together to help those students to get some pocket money and work experience.

CHICKEN QUOTA

The production and marketing of chicken in Ontario is regulated by The Ontario Chicken Producers' Marketing Board through a quota system. Under a New Entrants Policy, up to eighteen persons will be selected at random from eligible applicants and allotted basic quota of 7,500 units which requires a building of a minimum of 5,625 square feet.

The board gives no assurance that this amount of quota allows for a viable operation or that any additional quota will be allotted in the foreseeable future.

To be eligible you must be an Ontario resident, be at least eighteen years of age, not possess or have any interest, direct or indirect, in any quota allotted by this local board or any other local board or marketing board in Ontario.

To receive an application, Policy Statement and background information, mail a request together with a certified cheque, bank draft or postal money order for \$100.00 as a refundable deposit to the unsuccessful applicants, payable to The Ontario Chicken Producers' Marketing Board to:

Chicken Quota, P.O. Box 63
Niagara Falls, Ontario L2E 6S8

Deadline for receipt of request for an application Sept. 30/1986.

Yeeehaaa!

These two Terrace Bay youngsters seemed to have a good time on one of the many rides at the Midway held by Maple Leaf Amusements in Terrace Bay on

July 11 and 12. As soon as they spotted the News camera, they waved, even as the ride continued on its merry way. (Photograph by Conrad Felber).

Letters to the Editor

Dear Editor:

The Ontario Legislative Committee, Canadian Railway Labour Association, representative of 14,000 railway workers in Ontario, wishes to bring to your attention, an area of grave concern to the membership we represent and to the communities in which you reside; that is, the proposed operation of cabooseless freight trains in

Canada.

As you are probably aware, there has been a period of testing of the End of Train Information System (ETIS). It is expected that public hearings will be announced shortly (Note: This letter was dated July 11. :Ed.).

If the railway's wishes are abided by, there would only be one public hearing, and that, as soon as poss-

ible. We believe that public hearings should be held in convenient locations across the country, to allow for input from all interested groups.

If you perceive the proposed removal of freight train cabooses as an erosion of safety, as we do, please write to the Honorable John Crosbie, Minister of Transport, and the Secretary of the Railway

Transport Committee, to call for public hearings across the country.

If you require further information, please contact the undersigned.

Spraying now over

The Ministry of Natural Resources in Ontario announced recently that it has successfully completed the 1986 aerial spraying program to counter jack pine budworm, spruce budworm, and gypsy moth infestations in the province, especially Northwestern Ontario.

According to an MNR news release, nearly two million litres of the biological insecticide Bacillus thuringiensis (Bt) was sprayed from May 23 to June 25 on approximately

860,000 hectares of forest—more than double the area covered last year.

Over 55,000 hectares of the sprayed area was privately owned, the July release added.

"The operation went remarkably smoothly, considering its size and complexity," Natural Resources Minister Vincent Kerrio said after the program had been completed.

His Ministry had invested over \$27 million in the spraying project, which more than quadruples last year's total of \$6 million.

The release did not note that some organizations had asked the Ministry to also use chemical pesticide in addition to Bt. These requests were turned down.

This year's program was expanded following the release of a 1985 survey of forest infestation conducted by the Canadian Forestry Service. The survey found that the spruce budworm population had nearly tripled from 1984 to cover 12.3 million hectares of northern Ontario forest.

Belluz Realty is pleased to announce the sale of GRAVEL RIVER SERVICE.

The new owners, Joe and Eileen Procnier, welcome locals and travellers to their establishment.

Is your driveway full of holes?

Then it's time to invest in a permanent, concrete driveway.

- One that will last, trouble-free, for 25 years
- One that is impervious to winter cold or summer sun.
- One that won't get holes, birdbaths or ruts.

Thinking of an asphalt driveway? Don't make your decision until you've checked the permanent, good-looking alternative - concrete!
