

Ontario Hydro studying new facilities in N. Ontario

Ontario Hydro is studying new high-capacity transmission facilities needed to serve Northern Ontario customers beginning in the mid-to-late 1990s, President Robert Franklin announced.

"This Northern Ontario Inter-connection Study will determine what facilities need to be built to increase Hydro's ability to transfer power between northeastern and northwestern Ontario," he said.

"It is part of our long-range plan for ensuring a reliable and economic power supply for Northern Ontario beyond the mid-1990s. The plan also includes conservation, co-generation and hydro-electric generation.

The Little Jackfish River hydro-electric generating project currently under study is one component of this broad plan."

The proposed high-capacity line would connect Thunder Bay with the existing 500-kilovolt transmission network, at Porcupine Transformer Station (TS) in Timmins or Mississauga TS east of Sault Ste. Marie.

Because of the high capacity of the line and its length (about 600 kilometres), Ontario Hydro is considering a direct current (DC) transmission line such as those used in Manitoba and Quebec.

A DC system would provide greater planning and operating flexibility and would be cheaper

to build than a comparable alternating current (AC) system, Franklin said.

The transmission study will also consider locations for ground electrode sites near each end of the proposed line, as well as for a series of microwave communication towers.

The line will come into service

in the mid-to-late 1990s, depending on the rate of growth in electricity use in the North and the contributions made by other components of the long-range plan.

The proposed transmission facilities must be approved under Ontario's Environmental Assessment Act. Alternative routes and sites for the proposed

facilities are expected to be identified by mid-1987 and Hydro plans to submit its Environmental Assessment to the Minister of the Environment by the end of 1988.

Hydro will be consulting with provincial and local governments, special interest groups and area residents at different stages during the study, Franklin said.

Trustee leaves board over disagreements

COMANCHE. NOTHING IN ITS CLASS COMES CLOSE.

Jeep
Comanche with
Sport Stripe
Group

IT'S BUILT BY JEEP.

It's got all these standard features, and more.

- 121 hp engine
- 5 speed
- Fabric seats
- Block heater
- Heavy duty battery
- Heavy duty alternator
- Quadra-link front suspension
- Power brakes
- Power steering
- Styled road wheels

DRIVE FOR ONLY
\$254⁰⁰*
per month

(* \$1500. cash or trade, based on 48 month lease tax, license extra, stock -J5445)

Warranty and Financing Available.

AVIS DE VAPORISATION AÉRIENNE

Dans le cadre du programme actuel de régénération et de protection des forêts du ministère des Richesses naturelles, des peuplements sélectionnés dans le district de Terrace Bay seront vaporisés avec un herbicide pour contrôler la végétation indésirable à la date suivante ou vers cette date:

le 27 juillet 1987

Pour obtenir plus de renseignements sur ce programme ou pour étudier les détails du projet et les cartes, communiquez avec:

Monsieur Derrick Tirschmann
Ministère des Richesses naturelles
C.P. 309
Manitouwadge (Ontario)
POT 2C0
Téléphone: (807) 826-3225

Dans le cadre du programme d'ententes de gestion forestière, Great West Timber Ltée réalisera des herbicides visant à contrôler la végétation indésirable.

Pour des renseignements détaillés sur les projets réalisés dans les différentes régions faisant l'objet d'une entente de gestion, communiquez avec:

Monsieur Dick fry ou Madame Sarah Bros
Great West Timber Ltée
C.P. 2891
Thunder Bay (Ontario)
P7B 5G3
Téléphone: Thunder Bay (807) 345-0571

NOTICE OF AERIAL SPRAYING

As part of the Ministry of Natural Resources ongoing program to regenerate and protect our forests, selected forest stands in the Terrace Bay District will be sprayed with herbicide to control competing vegetation starting on or about:

JULY 27, 1987

To obtain further information about the program or to arrange to review project details and maps, contact:

Derrick Tirschmann
Ministry of Natural Resources
P.O. Box 309
Manitouwadge, Ontario
POT 2C0
Telephone: (807) 826-3225

As part of the Forest management Agreement Program, Great West Timber Ltd. Will be undertaking forest improvement projects with the application of herbicide to control competing vegetation.

For specific information on projects on various management agreement areas, the following company can be contacted:

Dick Fry or Sarah Bros
Great West Timber Limited
P.O. Box 2891
Thunder Bay, Ontario
