

# Committee gearing up for torch

The Olympic spirit is already up and running in Canada, and in Terrace Bay and Schreiber.

The XV Olympic Winter Games in Calgary have generated an interest and desire to partici-

pate amongst Canadians everywhere.

"Celebration '88" has started to include many Canadians by forming celebration committees across Canada.

Our reeves, Ollie Chapman and Mike Cosgrove, have been asked to establish these committees which will provide the leadership role for "Celebration '88" activities.

### 7 million

Nearly seven million Canadians applied for the honour of carrying the Olympic Torch.

The latest information the News has about local runners is as follows: Douglas P. Adey, Donald G. Beno, Jacqueline Dereski, Gerald M. Donaldson, Christopher J. Glynn, Agnes M. Iwaczyk, Larry H. Simons and Geraldine Turner.

### Awards program

To recognize those Canadians who have made outstanding contributions to their communities, the Government of Canada is proud to announce the "Celebration '88" Awards Program.

This program honours those among us who have demonstrated characteristics which are in keeping with the admirable ideals of the Olympic spirit; hard work, determination, moral character and dedication to the community.

The program has two parts. The **MEDALS** honour individuals who have made outstanding contributions to amateur sports.

The **CERTIFICATES** recognize those who have contributed to the quality of life in our community.

Please feel free to award these to your fellow citizens in any field of endeavor.

Nomination boxes have been placed at various businesses in the communities. Don't be shy; nominate someone you think deserves this outstanding recognition today!

### Awards and certificates

In the awards category, there are five different divisions for recipients:

1. **athlete**- choose one male and one female for their outstanding contribution to their sport and community;
2. **volunteer**- choose an individual for devoting his or her time to encouragement of fair play and sportsmanship and for bringing out the best in the athletes under his or her guidance;
3. **coach**- choose an individual for devoting his or her time to the

encouragement of fair play and sportsmanship and for bringing out the best in the athletes under his or her guidance;

4. **official**- choose an individual for devoting his or her time to the promotion of fair play and sportsmanship;

5. **sponsor**- choose a business that has contributed monetarily, or with services in kind, toward the development of amateur sport in your community.

### Certificates

Our local celebration committee is also asked to identify others who deserve recognition for their unselfish contribution to our communities.

This contribution can be of an "inspirational" nature and recipients can be recognized for demonstrating the Olympic spirit in business, education, culture or community service, etc.

Help your committee; nominate today!

## Where is this?

Can you guess?

If you can guess what this is a picture of, we would like to hear from you. *The News* will be running this 'can you guess?' contest on a regular basis to see how well you, our residents know your local landmarks. If you know where this is, just send in your answer to the News, P.O. Box 579, Terrace Bay, Ontario, POT 2W0, or phone us at 825-3747. We will print the name of the first person who correctly identifies the picture with our next 'where is it?' The winner of last week's Can You Guess is Pauline Woodruff. (T.E. Taylor photo).

## Mill operators who convert to mechanical pulping will see immediate benefits

Pulp and paper mill operators who convert to mechanical pulping will see immediate tangible benefits.

Ontario Hydro is offering a rate incentive program to help the industry modernize, says President Robert Franklin.

"This incentive to the pulp and paper industry is part of our effort to help Ontario industries increase their energy efficiency and contribute to improving their competitiveness in the marketplace," he said.

The incentive offered to pulp and paper producers provides them with the longer term rate assurance they require to make such a major capital investment, he said. It also offers a rate discount over the term of the program.

Many industrial applications of electrotechnology, such as mechanical pulping, can help industries streamline their operations and make them more effi-

cient, Hydro believes.

This results in lower unit cost, improved product quality or a more desirable impact to the environment.

As well, early adoption of industrial electrotechnologies will contribute to more efficient use of the province's power system over the next few years, Franklin said.

"Resource-based industries in general, and specifically the pulp and paper group, are encountering stiff competition from out-of-the-province and foreign producers using state-of-the-art machinery and mechanical pulping processes.

"To remain competitive, Ontario paper mills must modernize their operations to reduce operating costs and to improve their paper quality."

Franklin added that the conversion to mechanical pulping for the pulp and paper industry will result in more efficient use of energy and a reduction in pollution emission levels.
