Murderers should be treated for what they are

from page 7
some positive action was taken to changed to deal more harshly with these criminals and put them away forever.

When a person commits murder they automatically give up their civil rights. They don't consider the civil rights of the person (s) they murder.

At the moment our judicial system does not protect us from these known criminals. I demand a change to keep these convicted murderers off our streets and out of our Society.

This letter has been circulated as an appeal to the public for their support.
