

A sign of the (Terrace Bay Recreation Centre) times

Town employees have been busy building the base for a new sign structure in front of the Terrace Bay Recreation Centre. The sign is expected to be erected in the next few weeks.

Dean Main, coordinator of the centre, told the *News* that the

Winning style — the R.J. Wallwin Jr. residence at 136 Poplar Street in Terrace Bay, pictured above, was judged to be the most attractive by the Terrace Bay Horticultural Society. As an entrant in the Society's annual

beautification contest, the house received a perfect score of 100 from Judge Fred Harness. Second place went to the Moore house at 494 Lakeview, and third place was claimed by Ron Seidel of 415 Elizabeth St.

Interest in Society has bloomed

types of flowers and trees in the park, the cemetery, the hospital and some of the town's churches.

She told the *News* that interest in the Horticultural Society has bloomed in the past few years. Active members will try to work with the Township next year to develop a program of maintenance of flower beds.

She said that vandalism has ruined the hard work of some

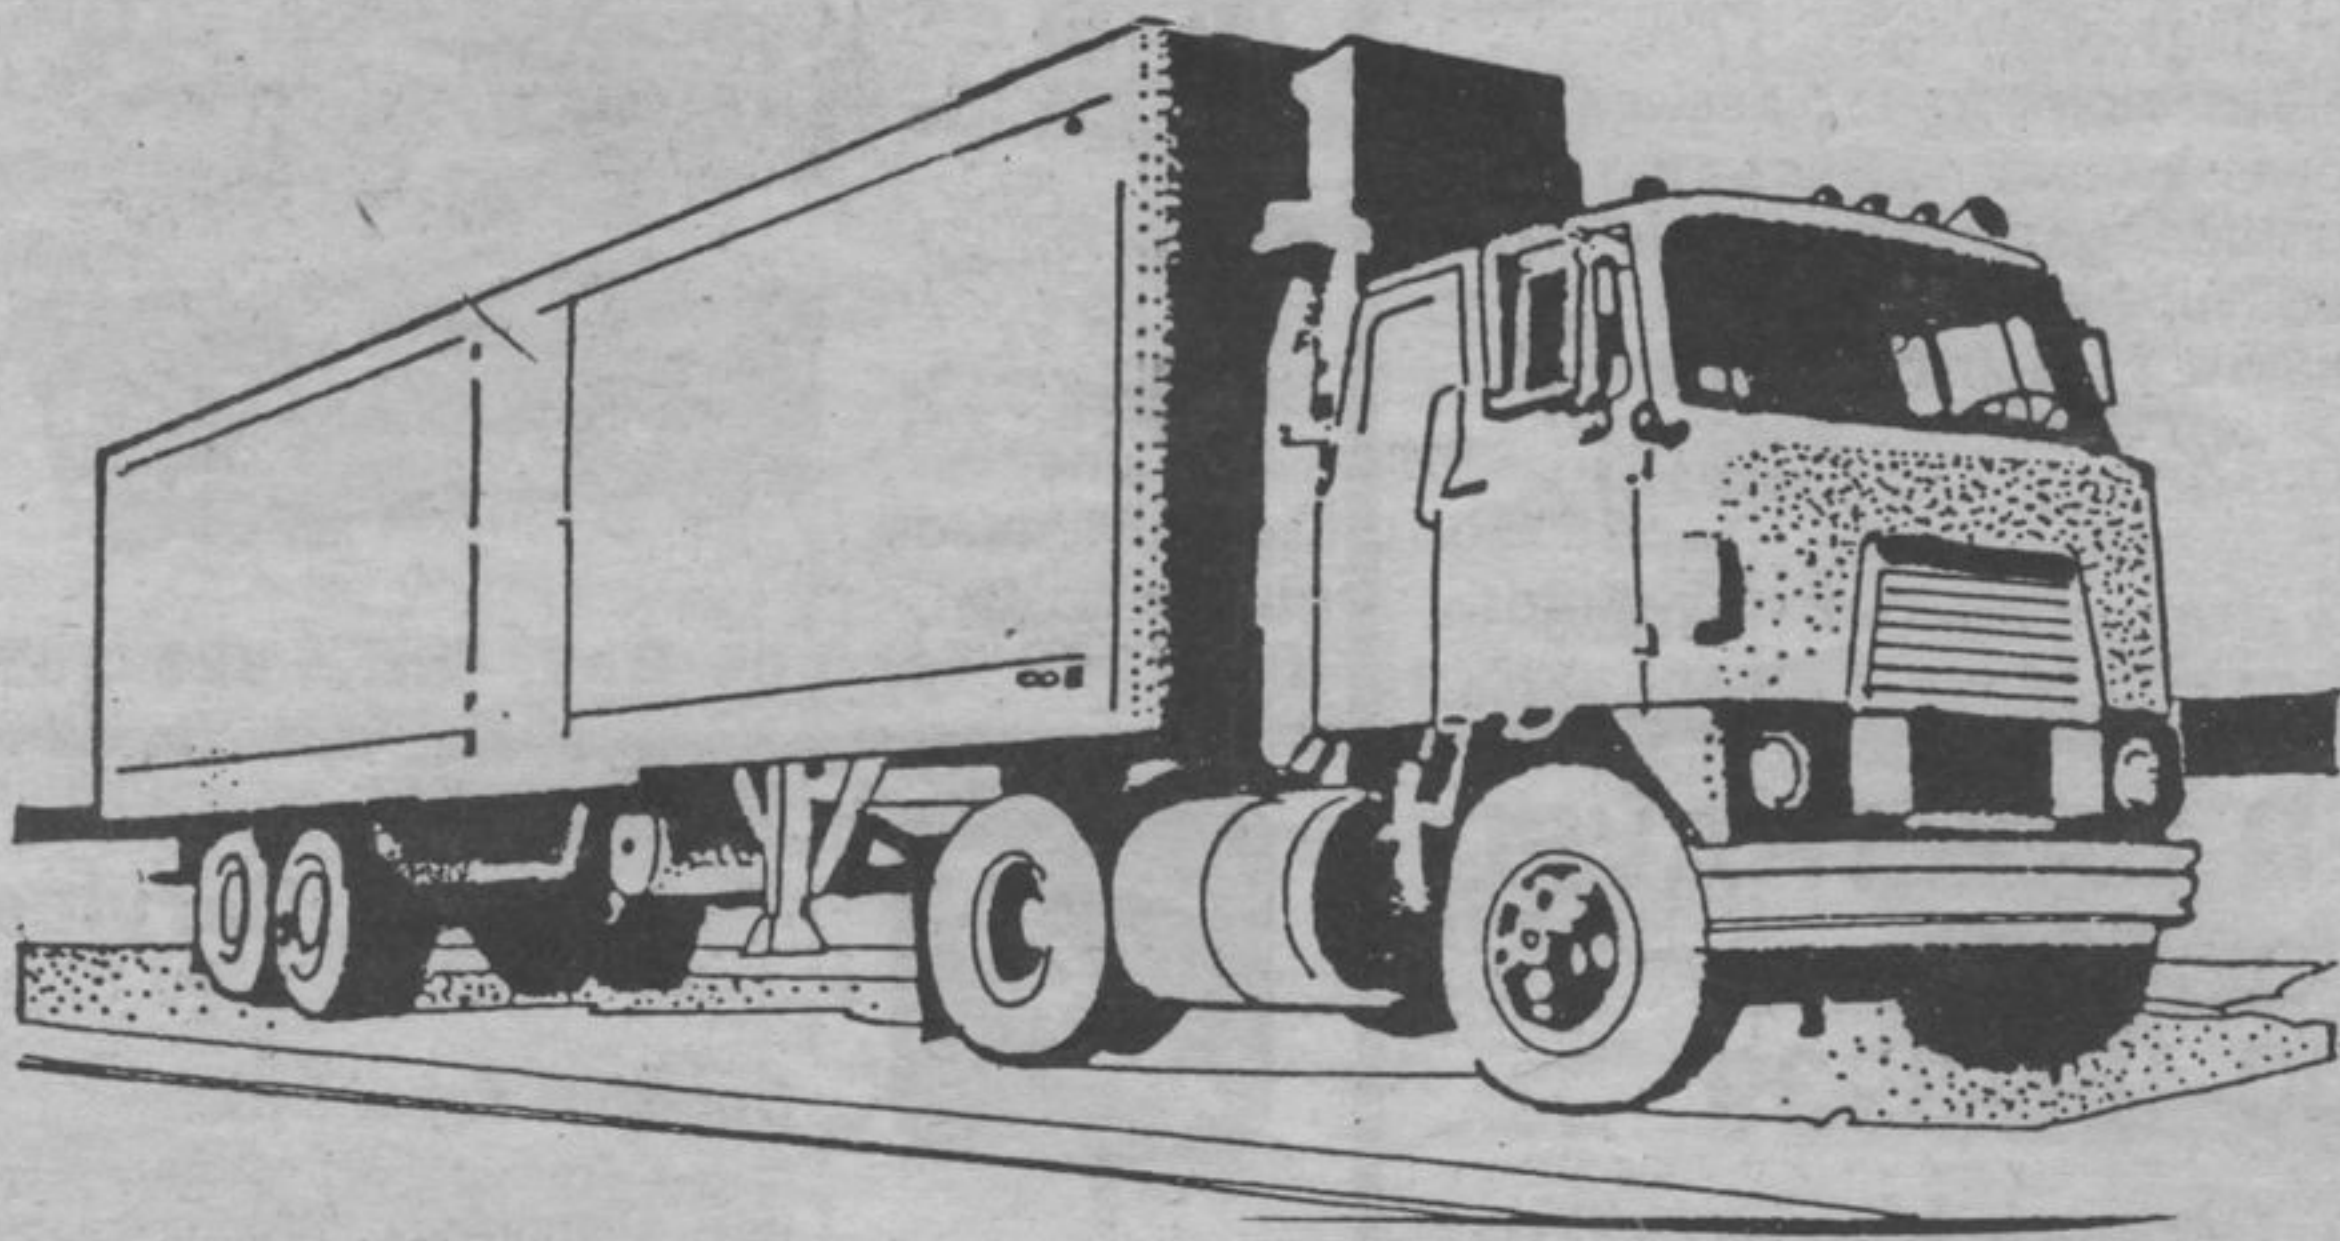

volunteers who have donated their time and knowledge to plant trees and flowers. Plants near the library have been pulled out of their beds by vandals, and tree branches have been intentionally broken.

Although most of the members are from Terrace Bay, Baker told the *News* that there are some from Schreiber. She said the Horticultural Society welcomes new members gladly, and added

that the number of active members could be increased.

Among the services being provided next year, Taina said that a soil testing device will be put into service. By testing the acidity of the soil, a homeowner can determine what plants and vegetables have the best chance at sprouting.

With a strong history and a few dedicated volunteers, the future of the Terrace Bay Horticultural Society looks rosy.
