

Making a Great Lake Superior

**On Thursday, December 1,
you can get involved!**

Water in Jackfish Bay is polluted as a result of an industrial discharge to Blackbird Creek.

The International Joint Commission has identified Jackfish Bay as one of 42 areas of concern around the Great Lakes for which a clean-up or Remedial Action Plan is required.

Public involvement is an important part of the RAP process. Get

involved in making a Great Lake Superior! As a first step, plan to attend our open house to learn about the problems in Jackfish Bay and the other three North Shore of Lake Superior RAPs. As well, meet the members of the Federal/Provincial RAP team that is coordinating the development of the Jackfish Bay RAP.

For pre-meeting information contact:

Jim Murphy
RAP Coordinator
Jackfish Bay
