Pouliot calls for plant funding

By Dave Chmara

Gilles Pouliot, MPP for Lake Nipigon, is calling on the Minister of the Environment, Jim Bradley, to use his influence to allocate the necessary funding to ensure that improvements to Schreiber's sewage treatment plant take place.

The application for a grant for improvements to the sewage treatment plant was denied although indications were given that "every effort would be made to ensure that grant funds would be available to permit the completion of preliminary and financial engineering costs."

Pouliot says, "this suggests, or implies, that in the not too distant future your Ministry is prepared and willing to fund construction work for this much needed public work."

He goes on to say, "in Schreiber, your Ministry owns and operates a sewage treatment plant that has never lived up to its design specifications, either in terms of mechanical or environ-

mental efficiencies. Notwithstanding previous statements from your Ministry that this facility was capable of satisfying the waste treatment needs of a community of 3,000, Schreiber has had many warnings from your Ministry personnel that major improvements and alterations must be made before approvals can be given for development of new residential lots in this community."

Tourism will benefit residents

Dear Editor:

Thanks for your editorial and coverage of the recent public meetings on Terrace Bay's Tourism Development Strategy.

The issues raised in your editorial are also some of the concerns addressed by our committee. I would like to take this opportunity to clarify a couple of points you have raised.

1. Your reference to the importance of public money as seed money to create a positive envi-

ronment for private sector involvement is correct. It should be noted however, that funding from all three levels of government will be sought and the municipality will not necessarily be the sole public sector investor.

2. Perhaps more important, it should be recognized that any enhancement of the community whether to facilities, scenic sights, or business community, will be as much a benefit to the residents of the community, as well as the vis-

itor. 3. While it is true that more jobs for students will be created, there is also many opportunities for entrepreneurial skills to be developed.

Thank you for allowing me to clarify these points, and thanks for your concern.
