

Lamprey program on Lake Superior

Mr. S. M. Dustin, Manager of the Department of Fisheries and Oceans' Sea Lamprey Control Centre, has released the following information pertinent to the field program on Lakes Huron and Superior for 1990. The Department, acting as the Canadian Agent for the Great Lakes Fishery Commission, has the responsibility for performing sea lamprey control in the Canadian waters of the Great Lakes basin, and in the United States (New York) tributaries of Lake Ontario.

Sea lamprey control depends mainly upon the carefully controlled application of selective toxicants (lampricides) to streams harboring sea lamprey larvae. At proper intervals (normally three to five years) retreatments are necessary to prevent the escape of reestablished sea lamprey populations. Detection and eval-

uation of sea lamprey larval populations is the function of stream survey teams who systematically examine all Great Lakes' tributaries using electro-shockers or a granular formulation of lampricide. Assessment of sea lamprey spawning runs is carried out through the use of portable traps fished in selected streams, and is also by means of permanent traps incorporated into sea lamprey barrier dams which are being built to prevent lamprey access into headwater areas of difficult-to-treat tributaries.

Sections of the following tributaries to Lake Superior are scheduled for lampricide during 1990: Cranberry Creek, Harmony River, Goulais River, Chippewa River, Batchawana River, Carp River, Michipicoten River, Pic River, Gravel River, Cypress River, Wolf River, and Neebing-McIntyre Floodway.

Although exact dates of treatment cannot be set at this time, it is expected that these streams will be treated during the period of late May through September.

The lampricide selectively destroys larval lamprey but is non-toxic to humans, pets, livestock, and other animals. Some non-target fish species may be

killed if they are weakened through spawning activities or by environmental stress, disease, or pollution. In addition, any aquatic organisms such as bait minnows, that are confined artificially in the stream water, may be susceptible to the lampricide because of crowding and handling. Those who keep such

organisms should consider using an alternate supply of water during the treatment period.

Stream surveys will be conducted on approximately 47 Lake Huron and 75 Lake Superior tributaries, in a continuing effort to identify and evaluate new or reestablished populations of larval sea lamprey.

Moose Women News

By S. Benko

Terrace Bay Chapter 1426 Women of the Moose held their installation of elected and appointed officers and chairman with 20 co-workers present.

The new executive for 1990-91 are: Senior Regent- Jean Bozec, Junior Graduate Regent- Bernice Pytyck, Recorder- Sadie Benko, Treasurer- Annette Landry, Chaplain- Lorraine Clark; Sentinel- Natalie Boucher, Argus- Pat Merkley, Guide- Sheren Kroehling, Assistant Guide- Yvonne Mallais,

Musician- Clara McDonald.

Chairman: Membership- Trixie Bursey, Publicity- Benita Vallaint, Child Care- Carol Gugelyck, College of Regents- Alma Hart, Mooseheart- Heather Sechesky, Star Recorder- Lorraine Desaulniers, Social Service- Ann Querry, Library- Fernande Bilodeau, Moosehaven- Ruth Reid, Hospital- Vicky Kostiuk, Ritual Director- Helen Almos, Academy of Friendship- Carmel Zborowski.

Incoming Senior Regent Jean Bozec presented gifts to the

installing committee: Installing Regent- Jackie Sopol, Installing Chaplain- Lillian Carlson, Installing Guide- Jackie Comisso, and Installing Chairman- Bernice Williams.

Vicky Kostiuk was presented with the Co-worker of the Year certificate and a gift.

Gifts were also presented to Bernice Pytyck, Sadie Benko and Jean Bozec.

Lovely cold plate, squares, tea and coffee were served by Academy of Friendship Chairman Carmel Zborowski and her committee.

Long-lasting relief from minor arthritic pain.

DIABETIC ?

Are you interested in getting together with other Diabetics?

Why not explore the possibility of setting up a chapter of the Canadian Diabetes Association in this area!

A general information meeting will be held on:

**Wednesday May 23, 1990
at 7:30 p.m.**

In the lobby of The McCausland Hospital

For more information contact: **Melanie McKenna** at **825-3273, 8:30 a.m. to 4 p.m., Monday thru Friday.**

ANNOUNCEMENT

Walter & Betty Anne Klassen

and

Alphonse & Peggy Regis

are pleased to announce the forthcoming marriage of their children,

Kara Lee

and

Ralph

The wedding is to take place on June 2, 1990, at St. Andrew's United Church in Schreiber, Rev. David Sparks officiating.

Letter to Editor- cont'd from page 4

to Manitoba last fall, he stopped at Terrace Bay for a meal. He was so impressed by our town that he decided to stay longer. Upon asking for directions to the golf course, someone at the motel where he was staying offered to drive him, then a lady at the golf club introduced him to a local golfer so that he would have a companion on the course.

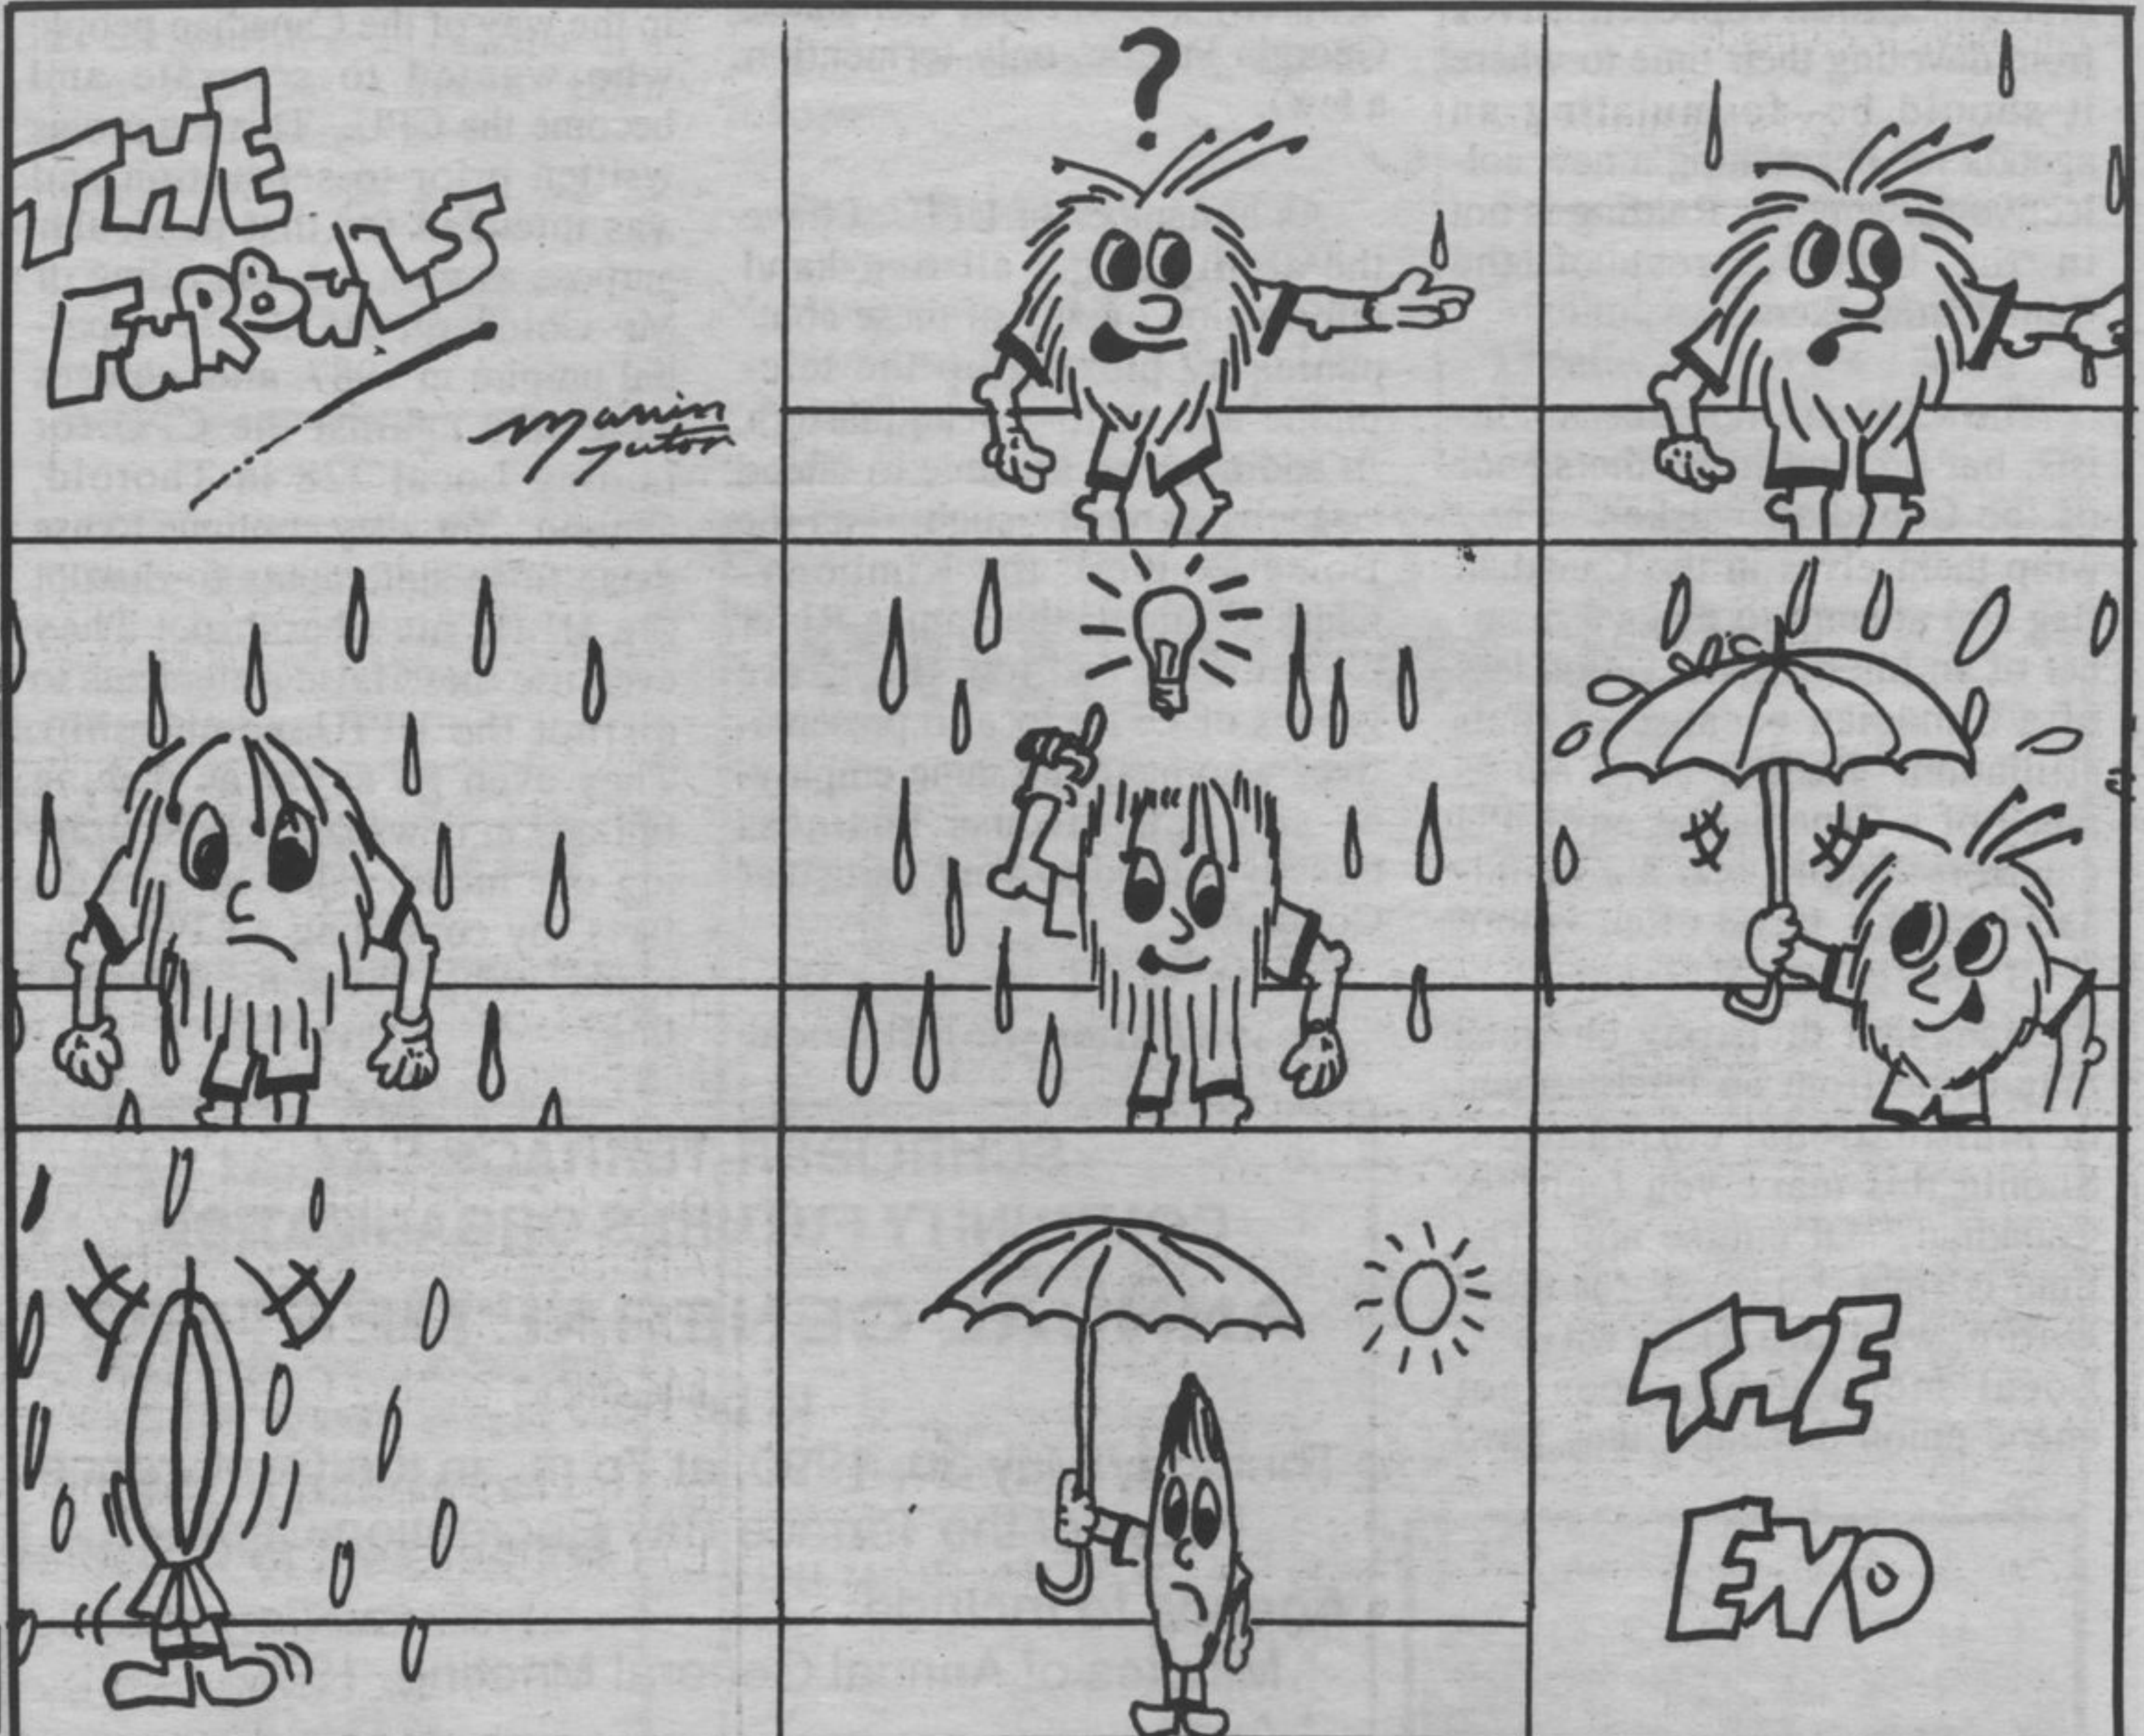

This gentleman also remarked about our lovely scenery, but sev-

eral times he emphasized the friendliness of the residents of Terrace Bay.

Terrace Bay has reason to be proud. Three cheers should go to the individuals in our town who treated this gentleman with such great hospitality. He has become a great ambassador for our community. Ambassadors like him are worth far more than any newspaper or magazine advertisements.

With a new tourist season fast approaching, I feel it is an appropriate time to remind both business people and citizens that the new Tourist Information Centre being built this year will attract the travelling public to stop, but good service and friendly people will encourage them to stay awhile and to tell their friends, "Terrace Bay is a great place!"

Sincerely,
Leslie Dickson
