

Playing with the devil?

The sign that little devil is holding asks the question - taking drugs? This was one of the more serious floats the children of Terrace Bay Public School paraded through the school on Friday Feb 15. The cold weather canceled the outdoor parade which was to have been part of the school's winter carnival. The themes of the floats varied considerably showing the depth of the students' imaginations and interests.

Hounds and working dogs

continued from page 12

The Boxer has been known for its excellent temperament with children. But they are a breed of dog that do not like to be left alone and can be destructive. Many of these dogs are very strong and hard to handle. If you do buy one, then make sure you bring him to obedience classes and read books on handling dogs. The

best place to get information about these dogs are from the breeders. Don't just see one breeder. Check as many as you can. Look for healthy, well adjusted dogs before purchasing a puppy. You are not required to purchase any puppy the first time you see a breeder. Go home and discuss what you have seen and how you feel about this particular kennel.

All the World's a Circus

continued from page 2

remembering the first name of the relative she's addressing is to go down the entire list of all family members, male and female, living and deceased, until she finds one that matches the one on the name tag which we all wear now to speed the system up a little.

This may seem ridiculous to an outsider but on a dull February day in Fonthill, I don't think you can have more fun than spinning Marg around in the middle of the room and everybody switching name tags while she's still a little woozy.

Then we all put piles of cash in front of us. "OK...your son's name for 40 dollars" Beeeep! "Amanda is incorrect." "Granddaughter for 50!"

I shouldn't joke like that. This memory thing really has me worried.

I'll be honest -- these are days when I get a chill up and down my spine thinking I might be experiencing the early stages of that memory disease they named after the person who discovered it ...it's... it's... no don't tell me... it's Westheimer's Disease... no, that's for midgets with sexual malfunctions... no, no it's... it's Waldheimers Disease... no, that's for Germans who keep forgetting they used to be Naziis... no, it's... it's Lou Gehrig's Disease. Yeah, that's it.

Geez I feel so stupid. Lou Gehrig, a lifetime 340 hitter - I can remember the guy's batting average but not how he died.
