

ENGINEERED TO OUTPERFORM EUROPE'S BEST

NEW DODGE LANCER & CHRYSLER LeBARON GTS

They're the new yardsticks for performance. Remarkable sedans that have been engineered to outperform Europe's best, at half the price.

Dodge Lancer and Chrysler LeBaron GTS are light and agile with front wheel drive, with a performance suspension system, nitrogen charged shocks and struts.

Under the hood is an electronically fuel injected 2.2 litre engine with a 5-speed transmission to give you power that is smooth, precise and fuel efficient.

And there's a new wrinkle to the optional turbo overboost. Chrysler engineers allow the turbo charger to overboost with maximum output in a controlled cycle. That takes power and torque right to the limit for a specific period and increases horsepower up to 33% over a normally aspirated engine.

Put LeBaron GTS Turbo up against the best from Germany.* LeBaron GTS with special Sports Suspension Package is faster 0 to 80 kph than Audi 5000 Turbo. Faster than BMW 528e. Faster than Mercedes 190E. And none of the European trio is a match for the cornering and braking of LeBaron GTS.

LeBaron GTS and Lancer would be impressive at any price. At half the price of the least expensive of the Europeans, they are stunning.

Where luxury and performance are the new rule, LeBaron GTS and Lancer are the new yardsticks.

PLAY IT SAFE BUCKLE UP

BEST BUILT, BEST BACKED!

Based on percent of recalls for 1982 and 1983 model years for cars designed and built in North America.

Chrysler backs every car it builds for 5 years or 80,000 km on engine and powertrain, and outer panel anti-corrosion. See dealer for details.

CHRYSLER LEADS THE WAY

Some items illustrated or mentioned are optional at extra cost.

*Based on overall results of USAC tests vs standard equipped 1984 models.
