

Blaw-Knox* BUCKETS** ***for Faster Unloading

COAL, ORE, LIMESTONE, GYPSUM and many other bulk materials are being handled at a minimum cost per ton with **BLAW-KNOX BUCKETS**; in many cases reducing the unloading time sufficiently to enable the boats to make two or three extra trips during the season. Reductions of 15% to 35% in unloading time, as accomplished by the combination of skillful design and the generous use of alloy steels, are not at all uncommon. Blaw-Knox offers a competent engineering service either in connection with existing cranes or in working out details of application on new installations to conform with prescribed duty cycle, capacity requirements, and such mechanical operating conditions as must be observed.
