Cannington merchants have agreed to close their places of business at 6 o'clock on Monday, Wednesday and Friday evenings for the summer. The agree ment went into effect on May 1, and the Cannington merchants are to be congratulated on the step they have taken, as it is one that will benefit both clerks and bosses, morally and physicially, and strengthen them for the battles of business competition. Beaverton merchants have not tried the scheme since about of health and happiness. tive years ago, and one merchant, -a leading one, -seems to hold the key to the situation in his hand. It is no trick to hold the stop to a good movement and reflects no credit on the party who does

Electricity from the Sea.

At first glance there seems to be no connection between the 'breaking of sea waves and the electrical condition of the air. Recent investigations, however, show that the shattering of the waves and the scattering of the spray have the effect of imparting positive electricity to the atmosphere. Visitors to the seashore experience a stimulation from the ozone contained in the air, and the presence of this is ascribed to the electrifying action of the spray from the breaking waves. This same effect, from the same cause, is noticed near waterfalls.
