# The Most Economical ...House Warmer

The "Kelsey" Corrugated Warm Air Generator.

Any ordinary Hot Air Furnace will produce heat if you will only supply enough fuel. The "Kelsey" has several special and valuable features but most important is that it will give more heat with less fuel and is the most durable heater made.

The "Kelsey" fire pot being constructed of several upright, tubular, corrugated, cast iron sections (see cut) around which the fire passes and up through which the cold air passes while being heated, and this entire section being wrapped with a heavy steel casing which becomes heated by the fire striking it when passing down outside of upright sections towards smoke pipe, it in turn warms the air that passes up between this steel casing and the galvanized iron casing, this explains why the "Kelsey" has three times more radiating surface and warm air capacity than an ordi-nary Furnace. The "Keisey" heats every room evenly, wheresoever located, with a nice, mild, healthful warm air that will not injure

Dr. G. C. OSGOOD, Lowell, Mass.

" Castoria is the best remedy for children of which I am acquainted.
