> Some action should be taken by our council to prevent junerant patent medicine men tacking tin signs on telegraph and telephone poles. Several instances have occurred recently where children and ladies have had their clothing torn by the ragged and broken edges of tin signs on poles and posts. Only a few days ago a lad in town received a bad cut on his face by coming in contact with one of those broken edges or a tin sign. It would be well if the chief constables of towns were given authority to force such men to tack their signs at least seven feet above all sidewalks. Hardly a pole on our main street but

off it would be a sensible act and maybe prevent other accidents in future.

Life was sweet to Tabby. One of our prominent citizens on Tuesday last had a strange experience with a venerable tomcat. Tom-tabby had outlived his usefulness as a mouser and rat killer, and for the comfort of the household our citizen proceeded in a sort of business like way to dispatch the said tom-cat. He first fired a revolver at it, boring a hole in the cat's head. It ran with its life blood oozing out. To the man's surprise next morning his catship was at the door. The aforesaid citizen then gave it some forty drops of prussic acid in milk. The taking leave when another shot took effect. Another, and still another, and our citizen thinks it is dead by this time. Of all the cats, the cit. thinks this cat beats all cats for life, and says the old saying "that a cat has nine lives" is true."

He thinks this Tommy had twenty-seven lives. R. J. Bruce moved into his new hardware store last week, and has one of the handiest hardware establishments in this county. Every part has been laid out to advantage. We now have three first cless hardware stores in town where every need can be gratified. Some time ago it was a very frequent occurrence to hear people say they could buy hardware cheaper in a western town. That is now very seldom heard as it is claimed our hardware men sell as close as any other dealers in this district, and the trade that used to go away from this town has PORT PERRY, MANAGER. returned, as is seen by the business done by each of the hardware stores in Port Perry. Bruce's hardware store takes the place of the late building burned in February last. The present store is a great improvement on the old one. The mason work was done by Mr. George | week. Gardiner, the wood work by Mr. Ino. Stovin, and the painting by Mr. Jno. Rodman, the tin roofing by Mr. W. H. Clark. Each contractor has done first class work and the finished building is a credit to those men.

Unseemly Conduct. A tew weeks ago the Prince Albert correspondent of the CHRONICLE was rasping some of the boys of that burg for unseemly conduct on the streets and elsewhere. Last Sunday afternoon some young girls in their early teens were in the cemetery when some young lads took the liberty to guy the girls and follow them over the grounds. The mammas and papas of such boys should nesday. keep them at home, and give them a taste of a beech gad. It is contemptible that decent young girls cannot go to such places or for a walk without having such hoodlums tagging after them and guying them. If such conduct comes under my notice again I shall give the names of the boys. It is time they were taught to know their place. The caretaker would not allow such to be in two or three places at the same time It would be wise if parents of young girls would | graphs from \$1 per dozen upwards. have an escort with them when in such places; in fact if some man would give such boys the propelling power of the toe of his boot it might

be a salutary lesson not soon to be forgotten. Warning to Bicyclists. A number of bicyclists imagine that they own erous to mention. A few weeks ago I reported an accident by a rider not attending to his business. A clergyman this week informed me that be and another gentleman came near, having an accident through the carelessness of a hicyclist, Last Sunday afternoon a citizen in town while driving down the hill with a spirited young horse had a close call from having a runaway. Two riders from the west were riding fast and passed on either side of the horse. One man got by when going west to take the Wabash railsafely while the other seeing that the horse was road, because their train service is the finest likely to plunge turned a corner sharply and in America, their Union depots are the best landed himself the other side of a culvert.
