The music hall was packed on Monday night (mostly all ladies) to hear Mrs Rorer, of Philadelphia, lecture on good cooking. She gave many good pointers on the kind of food that would result in a healthy child. It is quite likely there will be cooking classes formed in the schools, as that was Mrs Hamlin's motive in getting Mrs Rorer to come here to lecture. It will cost about \$700 a year to get a good teacher in cooking, about \$35 to get a room for the class, and \$50 to equip it. The ladies think they can form a class of about fifty who will pay \$5 each for lessons. They will also admit domesticates for a fee who wish to take a course.

The Cedar Dale Tragedy. Detective Rogers was in Oshawa last week looking into the facts surrounding the death of Nellie Hare. He saw Constable Goodman of Cedar Dale and after conferring with Coroner Dr Coburn expressed the opinion that nothing was to be gained by opening the case again. While no one believes a deliberate murder has been committed no one who examined the dead woman's face will believe anything but that she was assaulted, and the absence of anything in the stomach would indicate that she had no supper the night before. It is likely now that the circumstances immediately surrounding the woman's death will never be known.

State but to the Point. The Vindicator still bring away at the somewhat stale stable question. It is able to vary it a little this week by trying to stir up Oshawa merchants against the CHRONICLE because this journal stated that different farmers had declared they would not come to town to be hustled by Hoover. That is so, and if the same thing were so of Whitby town the CHRONICLE would report it. The fault is to the authorities of the town, not in the CHRONICLE. The tin is largely to blame for booming the constable's hustling. It is the one who do a wrong that should always be blamed, not the one who exposes it. The Vin. last week reviled us for saying that Mr Murton had pretended to know that this hustling is legal. This week it says he did read the law to the editor of the CHRONICLE. The fact is as we first stated, that Mr Murton never pretended to us that there is any such law. He admitted there was none. This is the point we have been bound to make from the first. The Vindicator is exactly in the same position as it was a year ago now regarding the fire company—wrong but determined to manufacture evidence to sustain its position as being correct.

Summer Work. For two years back men and teams have been employed in hauling dirt onto the town streets, and in summer-fallowing the same, as if it were intended to make a play ground or wood-yard of the thoroughfares. This year there has been a change of government, as one of the laborers remarked on Wednesday, and a change of Government is said to be always good for the working man, for all the material that has been placed on the streets for years is now being excavated therefrom and hauled away. These exercises look very much like working in vain, but many things are done in vain in this world. Half the money made by men is thrown away in folly. One man or set of men haul things one way, and the next succeeding set of officials haul it back. No wonder the roads never get into passable shape. Oshawa has very few main streets to keep up, and if the council were to commence at the crossing of Simcoe and King streets and build a certain amount of solid, permanent streets each year, it seems to us the effect would be a great saving. It is a trouble that there are too many changes of government, as the laborer expressed it, and every new street boss is a specialist in some particular style of road that he has studied out. The people's money goes to test the utility of each new chairman's schemes, but none is expended on any fixed policy of permanency. We do not write this to suggest that the plan at present adopted is wrong. Time will settle that point.

We have a new baseball club this season which is called the Young Marines. On Monday night the members of St George's club will give a social hop in their rooms. This makes the third one this winter.

The revival meetings which have been conducted in Lincoe st Methodist church for the last four weeks, were closed Friday night.

Great interest is being taken in the course of sermons or Old Testament subjects by the Rev. Mr. Eastman in the Presbyterian church each Sunday evening. On Sunday last he preached to a large audience a most interesting and instructive sermon on Cain and Abel.

A great many people will be surprised to hear of the death of Frank Brandon who was taken to the House of Providence two weeks ago. He was there ten days when on Friday a telegram was sent down that he was dead. Thus one by one the old landmarks of our town are passing into their reward.

Mr Wm Black of Whitby is acting in the capacity of wine dispenser at the Commercial house for a couple of weeks. It seems ever since the Corbett-Pittsimons fight our sports have been practising (whenever they could get a subject to practice on) the blow which knocked Corbett out. The boss dispenser at the Commercial was trying the other day to see what he could do in that line, but his subject dodged his head. The result was his hand struck the wall with such force as to break some of the bones, and he now carries it in a sling.
