Taking

a course of Ayer's Pills the system is set in good working order and a man begins to feel that life is worth living. He who has become the gradual prey of constipation, does not realize the friction under which he labors, until the burden is lifted from him. Then his mountains sink into molehills, his moroseness gives place to jollity, he is a happy man again. If life does not seem worth living to you, you may take a very different view of it after taking

Ayer's Cathartic Pills.

OVER MRS. THOS GREEN.

From Her Childhood She Suffered from than the seed which had been broken Heart Troubles-Doctors Said Nothing Could be Done for her, and that her Death at any Moment Would Not Surprise Them.

From the Herald, Stratford.

"Of the making of books there is no end," it has been said, and the same claim might be set up in respect of the making of testimonials in favor of Dr Williams Pink Pills. Wondertul are some of the statements published in the newspapers as to the cures effected in all parts of the country, fresh evidence proves the half has not been told. Were it not for a false sense of delicacy which a great many people entertain in regard to such matters, the columns of the press would be literally teeming with September 2nd and 3rd gave 8.4 of a grateful acknowledgements of benefit de bushel per acre more than the seedings of rived from and permanent cures effected by the use of Dr Williams' Pink Pilis that it is not usually advisable to sow Sunday afternoon when the remains were for Pale People. It is quite within the winter wheat in the vicinity of Guelph mark to say that there is no other medicine offered the public that can at all compare with Dr Williams' Pink Pills, and there is not a corner in this wide Dominion in which their virtues have not been proved. A cure which recently came to the knowledge of a representative of the Herald is deserving of being widely known. It is an instance of heart trouble that baffled the skill of a number of physicians, some of whem positively refused to treat the patient on the ground that it was no use. subject of the affliction referred to is the wife of a highly respected and well to-do farmer in the township of Logan, near the village of Dublin. Mr and Mrs Thos Green are firm believers in the efficacy of Dr Williams Pink Pills, and for very good reasons. Mrs Green has suffered everything but death from a weak heart, the trouble having afflicted her since early childhood. On several occasions she has been so low that it was not greatest trouble often arose from extimes her heart seemed to cease its throbbing and the breathing was fitful and labored. Doctors medicine seemed to have no effect whatever. She was advised by one physician that all that DISTRIBUTION OF SEED FOR TESTING PURcould be done was to keep her strength up, and it was with a view to strengthenening her system, and with no hope that wheat varieties will be seat free, by mail began the use of Dr Williams Pink Pills. She had not been taking them long, however, when there was an un mistable relief from the trouble that had made her whote life miserable. During the past summer she has used Pink Pills freely, and has enjoyed better health long as the supply lasts. than for many years before, and has been able not only te do her household work, but also many of the out door chores that full to the lot of a farmers wife. The different physicians who have treated her have frequently told her hus band that they would not be surprised to hear of her death at any moment, but she is to-day a strong woman, enjoying better health than she has done for years. Both Mrs Green and her husband feel grateful for the great benefit she has received from the use of Dr. Williams Pink Pills, and spare no words in sounding their praises to everyone who enquires what has wrought such a wonderful change in Mrs Green's health

and spirits. In cases of paralysis, spinal troubles, locomotor ataxia, sciatica, rheumatism, instructions for testing, and the blank fat. erysipelas, scrofulous troubles, etc. Dr form on which to report, will be furnish Williams Pink Pills are superior to all ed free of cost to his address until the other treatment. They are also a speci-fic for the troubles which make the lives exhausted. of so many women a burden, and speedily restore the rich glow of health to pale and sallow cheeks. Men broken down with overwork, worry or excesses, will Agricultural College, Guelph, Aug 14, '97. find in Pink Pills a certain cure. Sold by all dealers, or sent by mail postpaid, at 50c a box, or six boxes for \$2.50 by addressing the Dr Williams Medicine Co. Brockville, Ont, or Schenectady, NY. Bewere of imitations and substitutes leg to be "just as good."

The Model Farm.

OF WINTER WHEAT EXPERIMENTS AT THE ONTARIO AGRICULTURAL COLLEGE, 1897.

One hundred and eighty nine plots have been devoted to winter wheat experiments this season at the Ontario Agricultural College. Owing to the late harvest and the exceedingly wet season no Winter Wheat Bulletin can be issued this year in time to be of much practical service before the period of winter wheat seeding is reached.

In an experiment with ninety-one varieties of winter wheat, grown under similar conditions in 1897, it is found that the seven varieties which stand highest in yield of grain per acre are the same seven varieties which have given the William, of Toronto, this week. largest yield of grain per acre among eighty-six varieties grown on the experimental plots for four years in succession. The following list gives the names of these seven varieties with the average vield per acre for four years, and also with the average yield per acre for this

lege for 1897. The average results of an experiment sowing winter wheat at different dates in the autumn, show that the seedings of Friday afternoon, at the age of 30 years September 17th and 20th. It is found later than September 9th.

PREVENTION OF SMUT IN WHEAT.

An experiment in treating seed wheat for the prevention of smut has been conducted for two years with quite satisfac tory results. Infected seed wheat not treated for smut produced a crop containing an average of 2146 smut balls per bushel of grain; while that treated with Potassium sulphide produced an average of 109 balls of smut; and that treated with Copper Sulphate, 12 balls of smut; and that treated with hot water 9 balls of smut per bushel of grain. The hot water treatment which is one of the cheapest and most effectual remedies. consists in immersing seed wheat for fifteen minutes in hot water at a temperature of 182 degrees F. The water should not go below 130 and not above 185 degrees. Not only is the hot water treatment very effectual in killing the smut pores; but it frequently improves thought possible for her to recover. Her the productive power of the seed, as shown by the increased yield of grain haustion or a sudden start, and at such per acre. Every farmer in smut infected districts should treat sufficient seed to insure the harvesting of clean grain for

The following three sets of winter her heart would be benefitted, that she in one half pound lots of each variety, to farmers applying for them, who will carefully test the three kinds in the set in which they choose, and will report the results after harvest next year. The seed will be sent out in the order in which the applications are received as
