That's Ayer's. The same old sarsaparilla as it was made and sold by Dr. J. C. Ayer 50 years ago. In the laboratory it is different. There modern appliances lend speed to skill and experience. But the sarsaparilla is the same old sarsaparilla that made the record-50 years of cures. Why don't we better it? Well, we're much in the condition of the Bishop and the raspberry: "Doubtless," he said, "God might have made a better berry. But doubtless, also, He never did." Why don't we better the sarsaparilla? We can't. We are using the same old plant that cured the Indians and the Spaniards., It has not been bettered. And since we make sarsaparilla compound out of sarsaparilla plant, we see no way of improvement. Of course, if we were making some secret chemical compound we might .... But we're not. We're making the same old sarsaparilla to cure the same old diseases. You can tell it's the same old sarsaparilla because it works the same old cures. It's the sovereign blood purifier, and-it's Ayers. ~~~~~~~

Wednesday afternoon Rich. Moore received an ugly wound on the face above the eye. He and his assistant were turning shoes, when the hammer and sledge met and resulted in the hammer rebounding, inflicting the aforesaid wound. Several stitches were necessary, but the injury is now healing nicely.

Two, if not more of those fellows who burn an arm with caustic or some other drug that inflames the flesh, and then poses on innocent people as worthy objects of charity, called upon our villagers on Monday, and succeeded in securing some money from our good natured people. Perhaps it is better to run the risk of people being worthy rather than deny a person that is, but to our mind it is rather an injustice on the community to help these fellows in their fiendish deception. They should be arrested and detained until their wounds heal and then sent to work for a few months. Very often such characters spoil the chances of a worthy person getting assistance when sorely needed

We were mistaken in saying that W Andrew had rented the Western hotel. He had some notion of it, but before he got the necessary lease drawn Warren Woodruff completed arrangements and moved into it. He will use one room as a meat market where all kinds of meat may be found. He will also give meals. Those who drive to the Spinks mills with grain or for mill feed will find the stables and sheds handy for feeding purposes.

We were surprised to read in Kinsale correspondence in the CHRONICLE last week, that the Pickering council at its last meeting carried a motion of adjournment and then when all the visitors left held a secret meeting and introduced the local option by-law. Such statements as these are absurd. We were at the meeting of said council and therefore in a position to give the statements a complete denial. The by-law was not introduced till after tea but was then discussed in public. The council did not adjourn before tea, but a verbal motion was carried authorizing the reeve to leave the chair for half an hour as is customery; as to the whipping into line of some members that were unruly, the persuader was not perceived by us. In our opinion scribes should have some idea as to the correctness of statements before making them. - News.
