

### Pickering Council.

The above council met pursuant to adjournment at the Town Hall, Brookham, on Monday, Oct. 18th. Members all present with the exception of Mr. Richards, Reeve Mowbray presiding.

David O'Neil was heard re objections complained of on Brook road, on 3rd concession.

Messrs Flummerfelt and Millard were heard as a deputation from Uxbridge council relative to townline.

The committee composed of the reeve and third-deputy reeve appointed at the last meeting having reported a settlement with J. E. Farwell re Local Option costs for \$100, recommends the payment to him of the same, being settlement in full.

Mr. Beare, as chairman of the indigent committee, secured the passage of the following accounts:—N. E. Bateson M. D. for attendance and medicine to Aaron Liacombe, \$1.50, and medicine to Sarah Palmer, 60 cents; aid to Mrs. Proctor from September 1st, 1897, to October 19th, 7 weeks at 50 cents per week, \$3.50.

Mr. Barnes, as chairman of Contingent committee, secured the passage of the following accounts:—W. J. Clark, 600 notices and advertising Court of Revision at Brookham and Pickering for the year 1897, \$9.25; James Hubbard, on account \$3.00; the reeve, selecting jurors, \$5.00; assessor, \$6.00; clerk, \$10; reeve, expenses to Whitley re local option, \$3; third-deputy, expenses to Whitley re local option, \$8.

Mr. Underhill, as chairman of committee on sheep killed by dogs secured the passage of the following accounts:—W. Harvey, one sheep killed, \$6.38; Charles Barclay, one lamb killed, \$5; Wm. Thom, one sheep and one lamb killed valued at \$9, less \$9 for salvage, \$0.

Your committee would recommend that hereafter only evidence of ratepayers be accepted as valuation of sheep. Said amounts being two thirds sworn value.

Mr. Barnes, as chairman pro tem Road and bridge committee, secured the passage of the following accounts:—W. H. Jones, gravel supplied to road divisions and contractors, 246 yards at 8 cents, including right of way, 119.08; John Gordon, work on Kingston road, \$8.35; W. J. Reasin, spikes, nails, and wire supplied to pathmasters, 90 cents; W. D. Gordon, timber supplied to the following for use on roads, J. Gordon, W. Morecombe, J. Richards, Geo. Parker, S. King, John Sinclair, commissioners and supervisors, \$28.79

W. G. Gordon, iron supplied for sewer at Whitevale, 65 cents; Geo. Mutch, graveling sidewalk between lots 4 and 5 in 9th con, between lots 4 and 5 in 8th con, between lots 6 and 7 in 7th con, between lots 4 and 5 in 7th con, \$95.11; O. Forsyth, graveling near Cleburne station, \$29; F. Sowden, repairing culvert near gravel pit on 9th con, \$1.50; H. Thomson repairs to road machine, \$1; A. Jackson, timber supplied for building culvert opp. lot 35, \$1; A. Baeses, gravel supplied on sidewalk between lots 83 and 85, including right of way, \$8; J. B. Balden, repairs on townline between Pickering and Whitley, the latter paying like amount, \$1.75; W. Sadler, drawing timber from Cleburne road, repairing road and culvert between lots 4 and 5 in 6th con, \$8.75; J. E. Connor, gravel supplied ditto, \$4.20; J. E. Connor, graveling between lots 12 and 13, and 14; G. Phillips, turmpiking, drawing timber from Cleburne and repairing bridge between lots 16 and 17 in con 5, \$18.75, also drawing and furnishing gravel on 6th concession opposite lots 17 and 18, \$88.86; John Michell, grading with road machine, \$12; John Coatices, repairing hill on concession 1, opposite lot 35, and filling washout, \$17.25; A. C. Courtney, re-planing petticoat bridge on Kingston road, \$9.25, also drawing gravel on road west of Dunbarton opposite lot 84, \$6.80; J. H. Connor, repairing road building railing and repairing culvert west of Dunbarton, \$27.25; M. Gleeson, repairing hill opp. lots 12 and 13 in 6th con and for repairs to Greenwood bridge, \$1.15; John Gregg, right of way to gravel pit for the year 1897, \$1; A. Barnes, two drag scrapers, \$7.12; W. J. Davis, concrete pipe for culverts and delivering same, \$27.87; Wm. Carleton, drawing 851 yards of gravel on 6th con opp. lots 20 and 21, \$12.

The committee acknowledge a petition from Geo. Cowan Jr., and six others asking for a grant to repair hill on Brook road, known as Deckers hill, and recommend that the 2nd and 3rd deputy-reeves inspect the same and cause such repairs as they may deem necessary.

The committee having heard David O'Neil respecting the objections placed in ditch on Brook road in 3rd concession, recommend that the 2nd and 3rd deputy-reeves and councilor inspect the same and report to this council at its next meeting.

Mr. Beare, seconded by Mr. Underhill, moves that the reeve, Mr. Barnes and the mover be a committee to meet a committee from Uxbridge council at Altona, re complaint of A. Brown, Altona, respecting culvert opposite his place, to meet on Monday, October 25th, at 3 p.m.

Mr. Beare, seconded by Mr. Underhill, moves that this council regret the absence from this meeting of Mr. Jas. Richards, first-deputy-reeve, on account of illness, and trust that an early restoration to good health may enable him to resume his place at this board, and in the meantime that Mr. Richards be relieved from attendance at meetings of this board during such time as his illness may continue and that the clerk forward a copy of this resolution to Mr. Richards.

Mr. Barnes, seconded by Mr. Underhill, moves that the council resolve into committee of the whole on by-law, to repeal by-law No. 668 of the corporation of the Township of Pickering, entitled "A by-law to prohibit the sale by retail of spirituous, fermented, or other manufactured liquors in the township of Pickering."

The council then resumed as a Committee of the Whole with Mr. Barnes in the chair. The blanks in the by-law were considered and properly filled in, calling for the vote on Wednesday, November 17th, and the same deputy-returning officers as acted at the previous repeat vote with the exception of Charles L. Mackey, at Kinsale, instead of A. Orvis.

Mr. Barnes, seconded by Mr. Underhill, moves that by-law to repeal by-law No. 668 of the corporation of the Township of Pickering, entitled "A by-law to prohibit the sale by retail of spirituous, fermented, or other manufactured liquors in the township of Pickering," having been read a first time be now read a second time,

and that the clerk be and is hereby instructed to publish said by-law in the Pickering News and to otherwise advise the taking of the vote of the electors on the said by-law as by-law directed, and that the first publication of the said by-law be made on the 22nd day of October.

On motion of Messrs Underhill and Beare council adjourned to meet again at 10 a.m. on Monday, November 8th.

### "Let the Sunshine In."

(WRITTEN FOR THE CHRONICLE.)

In the beginning God said, "Let there be light," and His word there was light. Still this was not sufficiently definite in the accomplishment of His purpose in the creation of this mighty universe. At His word the sun and moon sprang into existence, taking their places in the firmament, there to fulfill their mission until time shall be swallowed up in eternity. Before this all was darkness and confusion and the first requisite to bring order and harmony out of chaos was light. No matter how perfectly the mechanism of the universe had been in all the details of its working, all would have been a disappointment without the light, which this great luminary sheds over the whole.

Harvey, in his "Descent on Creation," says: "Thou sun, inexhaustible source of light, heat, and comfort, without whose presence an universal gloom would ensue, and horror insupportable; who, without the assistance of any other fire, sheddeth day through a thousand realms; and not confining thy munificence to realms only, extendest thy enlightening influences to surrounding worlds; prime clearer of the animal, and great enlivener of the vegetable tribes; so beautiful in thyself, so beneficial in thy effects that erring heathens addressed thee with adorations and mistook thee for thy maker."

Scientists tell us that the blood absorbs the iron from the sun's rays and everyone knows the value of good, healthy, red blood, which gives elasticity to the step, buoyancy to the spirits and a healthy inspiration to the brain.

Moses said: "The blood is the life of the flesh." Notwithstanding the evolutions through which science has passed, it can give no better definition. An eminent physician visiting a cousin in the city observed that the house was so shaded that he could not see objects distinctly. He soon saw that his cousin's wife and children looked pale and listless. He took his cousin to task. He said: "John, you are a man of brain, a teacher of astronomy, and with other astronomers take care of the solar system, but the human system of Lizzie and the children here is a lesson you don't read. Their blood is like Orange county milk after it has been to the pump. Poor blood, little strength, poor appetite; always wanting dainties, or look wistfully across the table for some sauce to sharpen the appetite. If your wife cries easily and thinks she is going to die of heart disease, don't be the least surprised. The brain can only give out in kind as it receives. Give it only pale blood and weak, gloomy and fitful are its thoughts."

I remember a friend whose daughter became weak, pale and limp. Her mother took her to a doctor, who gave her a tonic without any benefit. She took her to another, with the same result. At last she had a friend come to visit her, who soon discovered that the invalids bedroom could not receive one ray from the sun and so advised her mother to put her in the sunniest room in the house. It was not long before her daughters former health returned.

Not intelligent farmer will allow his stock to be housed in dark stables, as he knows too well that they will not thrive and the food given them will be lost. Canadians are proudly conscious of their superiority based upon their intelligence and we are highly offended when this is not recognized. In the face of our intelligence and knowledge of the benefit of the sun's rays, why are housekeepers so careful to shut out his pleasant face by closing the shutters, pulling down the blinds, as if he were an enemy, and makes one feel when entering the dark domains as if we preferred a seat on the verandah. There are days when "Old Sol" seems really savage, then we can give him the cold shoulder by shutting him out until his fury is spent. Let us open the blinds and give him a kindly welcome. We cannot afford to shut out one of heaven's beautiful gifts. Don't let the doctors find a ready market for their tonics through our stupidity. Vines cover up unsightly walls and help to beautify the home, but keep them away from the windows. Let the light shine in and dispel damp mildew and gloomy spirits. If flies annoy us screen doors are within the reach of all.

In his "Merchant of Venice" Shakespeare says: "Milk-like moiety for my complexion. The shadowed livery of the burnished sun. Being me the fairest creature northward born. And let us make incision for your love. To prove whose blood is redder, his or mine."

Take a plant and shut it in a dark room, how soon it droops; then set it where it will be kissed by the first rays of the morning sun, see how the leaves turn with the light for fear of losing one of his pleasing smiles. Flies will not stay in a dark room, thereby showing us an intelligence which seems higher than our own.

Let us open up the blinds and let "Old Sol" find an entrance into every nook and cranny. The sunshine in our homes will bring cheerfulness into our lives which will surround us with a halo whose poor tired ones may bask and find a solace for their cares and discouragements, that the world may be brighter and better for our passing through it. In bringing sunshine into the lives of others we carry out the injunction unconsciously. "Freely ye have received, freely give." A. S.

George Francis Train, the famous sage of Madison Square, who has for thirty years declined the companionship of any one but children, says, "I am a child myself. If a man will live rightly and take proper care of his health during youth and maturity he may live to a green old age, and still be able to say with absolute truth, 'I am a child myself.' Youth is not a matter of years. Happiness is not a question of experience. Youth is happiness and health is youth. The healthy person, young or old, will be a happy person. It is a simple matter to get the body into a healthy condition and then to keep it there. Dr. Pierce's Golden Medical Discovery is the greatest of health makers and health savers. It is the great blood-maker and flesh-builder. It makes the appetite keen, the digestion and assimilation perfect, the liver active, the blood pure, the muscles strong, the brain clear, the nerves steady and every vital organ in the body healthy and vigorous. It makes firm, healthy flesh, but does not make corpulent people more corpulent. It does not make a baby like cod liver oil. It purifies the blood and drives out the poisons of malaria and rheumatism. It is the best remedy for blood and skin diseases. It cures a great many cases of consumption. Grateful patients, who had been given up to die, have permitted their experiences, names, addresses and photographs to be reproduced in Dr. Pierce's Common Sense Medical Adviser. The sufferer who wishes to investigate may write to any of these. The 'Golden Medical Discovery' is sold by all medicine dealers, and only unscrupulous dealers will try to induce a customer to take some worthless substitute for the sake of a few pennies added profit. Send 31 one-cent stamps to cover cost of mailing and customer name for a copy of Dr. Pierce's 1006 page 'Common Sense Medical Adviser,' in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

### Butter for Winter.

How to Keep it Where Cold Storage Cannot be Had.

For keeping butter for winter use, where cold storage cannot be had, no plan is sure to result favorably as immersing the pound prints in strong brine, and if a trifle of saltpeter is added to the brine the plan will appear to be safer.

Butter will not absorb salt from the brine, hence the plan of the little mutton wrappers, or (better yet) the little paper box which incloses the pat of butter like a close-fitting envelope and prevents the butter from getting bruised in the bath. We think we have before recommended the sterilized brine, simply strong brine boiled; and after cooling, placing these pats of butter in it and keeping in a cool place, and taking up the butter only as wanted.

Where one has a very cold room of uniform temperature butter can be packed in close-fitting, small packages and closely covered after placing on the top of the butter either closely-fitting layers of butter paper or a paste made of very wet salt spread evenly over the surface before putting on the cover closely. The facts are that nothing very new has been discovered about the keeping of butter not known to our mothers, and while cold storage is the best, it is only at the command of comparatively few; so the old stand-by recipes have to be brought out and again presented to public view.

### English Chow-Chow.

One cauliflower; half pint string beans; six green tomatoes; one pint small cucumbers, two medium sized ditto, sliced; half pint small white onions, four small red peppers. Separate the cauliflower and peel the onions. Put the vegetables in a stone crock, in alternate layers with salt, cover with cold water, weighing them under a plate with a small stone on top to keep them under the brine. Leave them three days then pour off the brine and rinse them; then let stand twenty-four hours in fresh water. They are now ready for the vinegar, to be prepared as follows:—One gallon of vinegar; one teaspoonful each of whole black pepper, whole cloves, celery seed, white mustard seed, whole mace and grated horseradish; two teaspoonfuls turmeric; one and a half cups of brown sugar and three tablespoonfuls of ground mustard. Bring the vinegar to a boil, with the spices in it, add the vegetables, let them simmer five minutes, take them out with a perforated skimmer, into a stone jar, pour the hot vinegar over them and leave two days. Then drain the vinegar off, heat it and add a tablespoonful of sugar to the powder. When it boils, return to the pickles and when cold put into small bottles and seal. This pickle is not ready for the table under three weeks and is better for standing a month.

### IT STRIKES HOME!

Chase's Ointment Cures All Skin Irritations.

Of the many skin diseases, eczema is one of the worst and most common. The one effective remedy so far discovered for it is Dr. Chase's Ointment. It has never been known to fail. Mr. Andrew Aiton, of Hartland, N.B., says:

"My little daughter, Grace Ella, aged three and a half, was a dreadful sufferer from eczema for three years. We tried a number of alleged cures and several doctors, but all without effect. Her's was indeed a bad case. Her little body was entirely covered with rash. One day our local druggist, Mr. Wm. Thelmer, recommended me to try Dr. Chase's Ointment. I did so, and very shortly effected a complete cure and saved our child."

Dr. Chase's Ointment is just as effective for piles, salt rheum and sores of all descriptions. For sale by all dealers and Edmanson, Bates & Co., manufacturers, Toronto; price 60 cents.

There is nothing to equal Chase's Linseed and Turpentine for severe colds and lung troubles. Large bottle 25 cents.

### Attend to the Calves.

Fortunate is the man who taught his calves that were dropped last spring to eat meal when they were young. If he supplies them with proper food now that the milk ration has been discontinued, he will have no difficulty to keep them in a thrifty condition. Otherwise they will go into winter quarters in a condition that it would have been better for their owner, in many cases, had he raised them when quite young with a small quantity of dry powder. There is no sadder spectacle than a meek-eyed calf carrying a barrel large enough for two. It will require at least two or three months dampening to get such calves in growing condition; while very often they are stunted for the remainder of their natural days. The changing from milk to dry food is a critical period. As the pasture has become very dry this season, other green succulent food must be provided. A field that was seeded with clover last spring is a suitable place for the calves to run in the autumn but it is unwise to allow them to eat frosted clover. The stable is the most inviting place for them to lie at night after this date. If they are given a dry bed and a good ration of the most appetizing foods available, they will acknowledge the attention in a way that will be satisfactory to the owner.

Mr. Thomas Sullivan of Hamilton, killed by a shunting engine on the T. H. & B.

### Two Acres Enough in Belgium.

What many a Canadian farmer fails to do on 100 acres, the thrifty Hollander in Belgium easily does on two acres, namely, support a large family and lay by something for a rainy day. He does it by making the most of every inch, by heavy manuring, allowing no waste places. His two acres are surrounded by a ditch of running water. The typical two-acre Belgium farm contains a patch of wheat or rye and another of barley; another fair portion grows potatoes. A row of cabbage grows all around on the sloping sides of the ditches, with a row of onions just inside, leaving bare walking room between them and the grain. The shade trees round the house are pear trees. Every foot of land is made to produce. He keeps pigs and chickens. We refer to this as illustrating the possibilities of land production. In Belgium 6,000,000 people, chiefly farmers, live on a piece of land the size of the state of Maryland. They furnish an object lesson on successful farming.

### Curious Customs.

A curious marriage custom prevails in the island of Himla, just opposite the island of Rhodes. The Greeks, by whom it is peopled, earn their living by the sponge fishery. No girl in this island is allowed to marry until she has brought up a certain number of sponges, which must be taken from a certain depth. In some of the other Greek islands this demonstration of ability is required of the men, and, if there are several suitors for the hand of a maiden, her father bestows her on the man who can dive best and bring up the largest number of sponges.

### The Great PAIN-KILLER

Family Medicine of the Age. Taken Internally, it Cures

Diarthrosis, Cramp, and Pain in the Stomach, Sore Throat, Sudden Colds, Coughs, etc., etc.

Used Externally, it Cures

Cuts, Bruises, Burns, Scalds, Sprains, Toothache, Pain in the Face, Neuralgia, Rheumatism, Frost-bites.

Small bottles 50 cents, large bottles \$1.00.

It has secured a reputation equal to Perry Davis' Pain-Killer.

It is sold in all parts of the world.

Prepared by J. E. Farwell, Q. C., Chemist and Druggist, Brock Street, Whitby, Ont.

W. E. YARNOLD, D. L. S., County Surveyor and Drainage Engineer, Post Ferry, Ont.

### Coal Oil for Wet Boots.

There is one use of kerosene which is seldom mentioned. It often happens that when a heavy shoe or boot has been wet it hardens and draws so that it hurts the foot. If the shoe is put on and the leather thoroughly wet with kerosene, the stiffness will disappear and the leather become pliable, adapting itself to the foot. If oiled while wet the leather retains its softness a longer time. The kerosene does not injure the leather at all.

Whenever in need of kidney treatment always be true to yourself and refuse any substitute or imitation of the original and genuine

### Is Your Heart Strong?

Or have you palpitation, throbbing or irregular beating, dizziness, short breath, smothering or choking sensation, pain in the breast or heart. If so, your heart is affected and will in turn affect your nerves, causing nervousness, sleeplessness, morbid anxious feeling, debility.

### Milburn's Heart and Nerve Pills

Cure all these complaints by regulating the heart's action and building up the nervous and muscular system to perfect health and strength. Price 60c per box or 6 boxes for \$2.50. At all druggists.
