

AGRICULTURAL.

NOTES.

Charcoal neutralizes the acidity of the stomach of sick birds...

If a few guinea fowls can be induced to roost in or near the poultry house...

"Horr's" Dairyman. "The testimony that it is a first-class milk...

Feed the cow something near an evenly balanced ration. Corn meal is a first product...

The first sheep introduced into any part of the United States were brought from England to Jamestown, Va., by the London Company in 1619...

Remember now at the beginning of the winter that if those sheep are not properly fed...

In answering the question whether horses are better relieved before than after meals...

The state Agricultural Experiment Station of Maine gives the following directions for guarding against the spread of the potato fungus...

1. Burn the tops and leaves in the fall, after the crop is gathered, to destroy the spores contained in them.

2. Gather all the small potatoes for if allowed to decay in the field the spores in them will start the disease the following summer.

3. Rotate the potato crop, winter sprout germinate the following spring, and find no food plants must be taken from the culture...

4. Rotate the potato crop, winter sprout germinate the following spring, and find no food plants must be taken from the culture...

5. Burn all decayed potatoes taken from the culture and other potato refuse; do not throw them on compost heaps...

6. The potato tuber sprout germinate the following spring, and find no food plants must be taken from the culture...

7. If cut seed is used, the surface should be allowed to dry for when placed in the ground the winter spores will find ready entrance through the freckles on the surface.

8. Western writers advise the following: 1. Rotate the potato crop, winter sprout germinate the following spring...

2. Gather all the small potatoes for if allowed to decay in the field the spores in them will start the disease the following summer.

3. Rotate the potato crop, winter sprout germinate the following spring, and find no food plants must be taken from the culture...

4. Rotate the potato crop, winter sprout germinate the following spring, and find no food plants must be taken from the culture...

such cream will spoil a whole churnful of right away, perhaps, but when the butter is tried for the ferment and beginning of putrefaction will have developed...

PER DAY GAINS IN SHEEP STOCKING. To many persons figures are unimpressive...

The recent Fair Stock Show was productive of many interesting combinations of figures. There is something to be learned from those which it furnishes...

The figures below are compiled from the 100,000 sheep which were shown at the show for the purpose of showing the average gain of calves, yearlings, two-year-olds and three-year-olds.

THREE-YEAR OLDS. Average Gain per day from Birth. Short-horns 1.49 pounds, Herefords 1.49 pounds, Grades and Crosses 1.49 pounds.

Two Year Olds. Average Gain per day from Birth. Short-horns 1.83 pounds, Herefords 1.83 pounds, Grades and Crosses 1.83 pounds.

Calves. Average Gain per day from Birth. Short-horns 2.10 pounds, Herefords 2.10 pounds, Grades and Crosses 2.10 pounds.

Yearlings. Average Gain per day from Birth. Short-horns 2.64 pounds, Herefords 2.64 pounds, Grades and Crosses 2.64 pounds.

Two Year Olds. Average Gain per day from Birth. Short-horns 2.92 pounds, Herefords 2.92 pounds, Grades and Crosses 2.92 pounds.

Three Year Olds. Average Gain per day from Birth. Short-horns 3.20 pounds, Herefords 3.20 pounds, Grades and Crosses 3.20 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 3.48 pounds, Herefords 3.48 pounds, Grades and Crosses 3.48 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 3.76 pounds, Herefords 3.76 pounds, Grades and Crosses 3.76 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 4.04 pounds, Herefords 4.04 pounds, Grades and Crosses 4.04 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 4.32 pounds, Herefords 4.32 pounds, Grades and Crosses 4.32 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 4.60 pounds, Herefords 4.60 pounds, Grades and Crosses 4.60 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 4.88 pounds, Herefords 4.88 pounds, Grades and Crosses 4.88 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 5.16 pounds, Herefords 5.16 pounds, Grades and Crosses 5.16 pounds.

Grades and Crosses. Average Gain per day from Birth. Short-horns 5.44 pounds, Herefords 5.44 pounds, Grades and Crosses 5.44 pounds.

Two Remarkable Stories of Women Who Saved Their Lives by Shells and Handing Revolvers.

In the month of May, 1884, a party of Madras. I was a girl, I remember...

They were all dressed in the latest fashion, and were all very young and beautiful...

I found the brig to be called the Orient. She was an old-fashioned sailing vessel...

I saw on the brig's deck, almost as soon as we were under way, a man who was mounted on a carriage, and later on I ascertained that he carried a supply of arms...

Next morning there was a heavy mist on the water until sunrise, and it was not until about ten o'clock that the fog cleared away...

When the fog cleared away we saw a barque of about three hundred tons, and it was not long before we were within a few miles of the rocky and mountainous shore...

When the fog cleared away we saw a barque of about three hundred tons, and it was not long before we were within a few miles of the rocky and mountainous shore...

GOOD THINKING ON CREAM.

Col. F. D. Curtis, of New York, who is one of the Butter Conference workers of that State, induces in the following good thinking on the important subject of hand cream:

So long as people think that cream is the chief end of cream, mistakes will occur in its manufacture. The cream is not made for its own sake, but for the purpose of being used in the kitchen...

The cream is not made for its own sake, but for the purpose of being used in the kitchen. It is not made for its own sake, but for the purpose of being used in the kitchen...

The cream is not made for its own sake, but for the purpose of being used in the kitchen. It is not made for its own sake, but for the purpose of being used in the kitchen...

The cream is not made for its own sake, but for the purpose of being used in the kitchen. It is not made for its own sake, but for the purpose of being used in the kitchen...

The cream is not made for its own sake, but for the purpose of being used in the kitchen. It is not made for its own sake, but for the purpose of being used in the kitchen...

Invariably reasonable—Salt, mustard, pepper, vinegar.

There is considerable difference between first and second hand and being first out of one.

Know yourself, and you will be all right in theory, though you would need a great many subsidies if fully followed.
