"GROWING WITH OAKVILLE"

In only 14 short years we have developed an outstanding name in the pipe fabrication industry throughout North America. We are presently supplying all the stainless and alloy steel pipe fabrication for the Gulf Oil refinery expansion in Clarkson and we have just completed supplying all of the stainless and alloy steel pipe fabrication for the Syncrude two billion dollar tar sands project in Northern Alberta. We are pipe fabrication specialists in stainless and high alloy steels used in the Petroleum Refineries, Chemical Plants and Generating Stations throughout the country. We are also manufacturers of forks and material handling attachments for fork lift trucks and we supply custom machining to various industries.

We've come a long way in the past 14 years and are proud of it!
