WHO has devoted her best efforts to its preparation that everyone may become a good cook in the true sense of the word. Miss Scott believes that the true ambition of every woman prompts her to reach out for knowledge which extends far beyond mere baking, boiling and frying. She believes that every girl, and every woman of today is eager to learn all they possibly can about food, provided they can depend upon the available information. She believes you all are vitally interested in the newer methods, the methods which save time, and save money and which safeguard the health of the family. And so we have the new course that the busy girl or woman who has not, or who cannot take, a modern college or school course in this greatest of all subjects may, in their homes, get the actual fundamentals in a remarkably short time.

The Oakville Record, Oct. 6, 1932

This phono is believed to be one of the oldest in Canada. It has been painstakingly reconstructed from plans found under a rock in Bronte Creek.

For the technically minded the phono is a frog powered (strange job for a frog) semi automatic. The stylus is elliptical pine cone delicately balanced to operate at 5 lbs. pressure, the amplifier an 8" birch bark horn.

The first records were square and made of wood.

The music . . . why square dances of course!

Pop records of the day:

- Handels Water Music by The Falls
 - The Vulgar Boatmen by O'Bother
 - I'm All Right Jacques by The Voyeurs
 - Buck Up Your Constitution by Pet & The Libs
- Beaver when asked to comment on this strange contraption and his role as horn inspector said, "Frankly I don't give a dam. I'm happy with my job and I'm happy to dance to any tune the green guy plays."

Footnote:

Beaver was subsequently replaced by a dog and the device became the trademark of a large American company.

We're not suggesting that Masons conduct business with wampum and a few colored beads, but we surely will work like beavers to please you. We do give a dam.

DID IT REALLY FALL FROM JACQUES CARTIER'S CANOE?
