Such a farm coonof be worn out; but, with when he swallowed a dose of salta. decent management is constantly growing

Countries which have the largest popul lations, where agriculture is thoroughly practiced, grow more and more productive-Belgium is the most shickly settled country royagers on the sea of life off the coast of in Europe. It has been cultivated like a Malaga, Jamaica, Santa Gruz and Holgarden for centuries, and its yearly pro- land. duce is constantly increasing.

There is doubtless a limit to the possible production of a farm; but we doubt if it was ever reached. We think sixty bushels of wheat to an acre a great yield, and so it is, compared with our average barrest of ten or Ofteen ; bot it is quite possible, by high culture, to raise one hundred bushels on an acre. , Drilling saves two-thirds of the seed alone, and in one year, on a good sized farm, would pay for the machine.

it is separated too widely. The drill swallowed the milkmaid. places the seed just where it is wanted .two inches.

The time will come when wheat, drilled productiveness.

Wherever land needs manuring, it pays ed them. to manure well. Suppose ten dollars' worth of manure on an acre of land gives you a crop worth thirty dollars, and trenty dollars' worth gives you a crop worth only forty dollars, you are still the gainer and will be for years to come. A tree planted over the grave of Roger Williams eareloped his skeleton with its root to completely, as to preserve the form of every bone. In some parts of Con-

necticut, there are little family burying examination in the primary department of grounds in the orchards, and the trees a school, the listeners were brought down forms of apples and eider, but is certain skirts !" that every bone is worth its weight in No man who has a farm or garden should beat your mother." ever zell bones or ashes. Straw is worth | ____ more for manure than ever it brings when sold in market.

Our farmers think they do very well to get ten dollars net profit, from an acre of land. But it would be a poor acre of agyr garden that did not pay a bundred, and we have orchards that pay a thousand. There are pear trees that have paid a bundred dollars a year for several successive years Every dollar's worth of manure on

farm is better than five dollars to any back stock we know of. It is a good stock moved to Mr. Pleining's old stand badly-managed farm where a deposit of manure will not pay three hundred per

We need model farms and agricultural would not be a bad plan to spend a day promptly attended to. or two with those eccentric, but very benerolent people, and admirable farmers the Shakers.

lo a chaker community you have mate rial below the average; but made the most of in certain directions.

and frugality, made them rich.

In England, farmers prefer to lease farms, rather than buy them. They prefer to expend their capital in stock, manure, and labor, rather than lock it up in the land. But the man who wants a home for his family and his posterity, must own the land be cultivates; and that every acre he drains, every tree he plants, every load of manure be plows into it, will add to his has permanent riches.

At the creation, man's appointed work be so, until all the others works are sub- the newest styles in ordinate to this. Canals are dug, railroads constructed, cities built, warehouses, manefactories and ships, are all made for the sold at a small advance on cost. benefit of the lords and cultivators of the

rAll the pursuits of civilization test upon this one. Perfect independence is impossible; but the old fashioned farmer, who is able to produce for himself all the real necessaries of life, comes very near to it. SPRING . A bed of muck or marl on a farm is better than a gold mine in the long run.

When the gold is exhausted, that is the end of it; but the enriched farm will pour out its crops for a century. When a fruit-tree has exhausted the her Spring Goods, embracing fruit-forming material in the soil, it must]

ashes, bone-dust, etc., dug it from six to twelve feet from the trunk, and you will Post Office. · Every dead animal on a farm, which

is not eaten as food, should be stored with loato, rotten leaves, old plaster, pomdered DOUBLE WAGONS ebarcoal, leached askes, or other absorbeats, so as to make a compost of manure that will be worth, in the long run, more than it would have sold for when living.

The science of Agriculture is to know bow to convert the waste and apparently valueless matters around us into the rich est and most necessary productions. The business of the farmer is one of the greatdo his work of Creation. It is to increase the beauty and fertility of the earth.
