

THE NEWMARKET ERA - SEPT. 13, 1861.

In the city of New York there are twenty synagogues and 30,000 Jews.

The Tsar of Russia is said to be very prodigal in his private life.

Year 552 of the Jewish era commenced on Thursday last, 6th Sept.

The revenue of the British Government is £70,000,000. The tax per head is £2 6s. 8d.

The New York *Herald* learns that Captain Thomas Francis Mengher has consented to accept the Colonelcy of the 69th Volunteers.

A mechanic of Hartford, Conn., has invented a machine which will make 100,000 slate pencils per day.

New York has 214 churches. Philadelphia 240, Baltimore 99, Boston 94, Cincinnati 73, Chicago 67.

A new rifle gun has been tried at Shoburness, England, which carries a ball weighing one hundred and forty five pounds.

In the city of New York, there are twenty synagogues and thirty thousand Jews.

Ladies' bonnets are now constructed of paper, which can be made to resemble closely all kinds of straw.

The President of the United States has appointed the last Thursday of September as a day of thanksgiving and prayer.

The King of Denmark has 3,358 wives, and the natives believe that if the number is not kept up exactly to this figure some fearful calamity will take place.

The Writ for the election in the Trent Division has been issued. The nomination takes place at Peterborough on the 14th of September, and the election on the 30th. The polling day will be the 23rd and 24th September.

It appears that Government, following the precedent in the cases of Montreal and Quebec, has offered to loan the Town of Lindsay the sum of £15,000 for building purposes, at 6 per cent interest.

The manufacture of paper from the leaves of Indian corn is becoming extensive in Austria. The paper is said to be tougher than any other paper made from rags, while it is almost wholly free from silica, which makes paper produced from straw so brittle.

In Spite of his Truth—King John once deposed of a certain Jew 10,000 marks, on refusal of which he ordered one of the Israelite's teeth to be drawn every day until he should consent. The Jew lost seven, and then paid the required sum. Hence the phrase, "In spite of his teeth."

The New Orleans *True Delta* incidentally asserts that "three-fourths of the gallant men from this city and State, who have abandoned family and home—all that is dear to man—to march to the battle field in defense of Southern rights and Southern honor, are Irishmen."

CANADA TISHER—An immense raft of lumber has been floated down the lakes to the Welland Canal. It is valued at \$63,000 at the Welland Canal, and at Quebec will be worth from \$75,000 to \$80,000. It is 1,500 feet long by 65 wide, and contains 130,000 feet of square timber. It is the Norway or Red Pine and owned by Mr. J. Cameron of Toronto. From Quebec it is to be shipped to Liverpool.

BENEFITS OF ADVERTISING.—The benefit of advertising was well illustrated a few days since, by Mr. Simon Beattie's sale of Imported Stock. Mr. Beattie is a practical working man; like most of his countrymen shrewd and intelligent—knows the advantage of making his business known. He advertised well, and drew to his sale people from distant parts of the Province, east and west. Yet, we venture to say, that for every ten dollars paid for advertising, he added a hundred to the aggregate of his sale; still there was no humbug, he gained by adding to the number of competitors who appreciate good stock.—*Markanum Economicus*.

MARRIAGE OF DR SPRING.—Rev. Master Hale Smith writes to the Boston Journal under date of August 17, as follows:—"The marriage of Rev. Dr. Spring, came off in the chapel of the Brick Church on Thursday last, in the presence of a small company of visitors. The affair has created much talk. The doctor is well up to eighty. He is quite infirm and his sight is poor. The lady bride is sixty-five and is a maiden. Mrs. Spring has not been dead quite a year, and in New York it is regarded as quite an impropriety for a widower to start at least one year in this marriage quite a little romanced-blended. The lady has a fortune of \$300,000 in her own right. She has long resided with her uncle, or of the most benevolent men in the city, and the lady is reported to say that it has always been her great desire to become Mrs. Gardner Spring. The bride and bridegroom left the chapel and at once proceeded to the cars for a bridal trip to Niagara Falls, botuming in need of assistance and help, although the bride was sprightly for one of her years.

Judson's Mountain Herb Pills.

How strange and wonderful often seem to us that a medicine composed of simple mountain herbs, should be so effective in curing such diseases. How surprising that the Indians should know and practice in Mexico and all that secret that has escaped the search of the physicians of the world has ever seen.—The Indians of Central America and Mexico were a strong race, but by the Spanish living customs and religion as well as physical strength, they have perished from the earth. Their cities are gigantic piles of ruins, their kings and queens are buried in their tombs, and their gods and their medicine alone are left. The only Indians left are the intelligent persons in that JUDSON'S MOUNTAIN HERB PILLS, are the most successful medicine in the world in curing disease.

Sold by all Dealers in Medicine.—

REMARKET MARKETS.

Newmarket, Sept. 13, 1861.
