MECHANICS, INVENTORS, MACHINISTS, MILLWRIGHTS, AND MANUFACTURERS.

The Scientific American is a paper peculiarly adapted to all persons engaged in these pursuits, while to the Farmer, Horsekeeper, and Manufacturer, it will be found of equal interest and use.

A NEW VOLUME COMMENCED JANUARY 2, 1860.

The Scientific American has been published Fourteen Years, and has the largest circulation of any journal of its class in the world. It is indispensable to the Inventor and Patentee; each number containing a complete official list of the patents issued each week at the United States Patent Office, besides elaborate notices of the most important inventions, many of which are accompanied with engravings executed to the highest degree of perfection.

To the Mechanic and Manufacturer the Scientific American is important, as every number contains a list of notices pertaining to his business, and as often as may be deemed necessary a column or two on the most and newest market will be given, thus constituting a useful practical, scientific paper & Price Current which can be relied upon.

The Scientific American is published weekly in its former size, for binding, each number containing sixteen pages of letter-press, with numerous illustrations, making a yearly volume of 852 pages of useful matter not contained in other papers.

TERMS.—To small subscribers: Two Dollars a Year, or One Dollar for Six Months. One Dollar pays for a complete volume (48 pages); two volumes comprise one year. The volume commences on the first of January and July.

CLUB RATES.—Five copies, for six months, \$4; Ten copies, for six months, eight dollars; Ten copies, twelve months, fifteen dollars; Fifteen copies, for twelve months, twenty-two dollars; Twenty copies, for twelve months, twenty-eight dollars.

For all clubs of twenty and over, the yearly subscription is only one dollar forty cents. Names can be sent in at different times and from different Post-offices. Specimen copies will be sent gratis to any part of the country.

Southern, Western, and Canadian money or Post-office stamps taken as pay for subscriptions. Canadian subscribers will please remit twenty-six cents extra on each year's subscription to pre-pay postage.

When persons order the Scientific American they should be careful to give the name of the Post-office, County, and State to which they wish the paper sent. And when they change their residence, and wish their paper changed accordingly, they should state the name of the Post-office where they have been receiving it, and that where they wish it sent in future.

IMPORTANT TO INVENTORS—NEW ARRANGEMENTS.

THE Great American and Foreign Patent Agency.—Messrs. Munn and Co., Proprietors of the Scientific American, are happy to announce the engagement of the Hon. Judge Mason, formerly Commissioner of Patents, as associate counsel with them in the prosecution of their extensive patent business. This connection renders their facilities still more ample than they ever have previously been for procuring Letters Patent, and attending to the various departments of business pertaining to patents, such as Extensions, Appeals before the United States Court, Interferences, Opinions relative to infringements, &c., &c. The long experience Messrs. Munn & Co. have had in preparing Specifications and Drawing, extending over a period of fourteen years, has rendered them perfectly conversant with the mode of doing business at the United States Patent Office, and with the greater part of the inventions which have been patented. Information concerning the patentability of inventions is freely given, without charge, on sending a model or drawing and description to this office.

Consultation may be had with the firm, between 9 and 4 o'clock, daily, at their Principal Office in the City of Washington, on the corner of F and Seventh-streets, opposite the United States Patent Office. This office is under the superintendence of one of the firm, and is in daily communication with the Principal Office in New York, and personal attention will be given at the Patent Office to all such cases as may require it. Inventors and others who may visit Washington, in business at the Patent Office, are cordially invited to call at their office.

They are very extensively engaged in the pro-

parations and securing the Patents in the various European countries. For the transactions of this business they have offices at Nos. 66 Chancery Lane, London; 29 Boulevard St. Martin, Paris; and 26 Rue des Eperonniers, Brussels. We think we may safely say that three-fourths of all the European Patents secured to American citizens are procured through our Agency.

Inventors will do well to bear in mind that the English law does not limit the issue of Patents to Inventors. Any one can take out a Patent there.

A pamphlet of information concerning the course to be pursued in obtaining Patents through their Agency, the requirements of the Patent Office, &c., may be had gratis upon application at the Principal Offices or either of the Branches. They also furnish a Circular of information about Foreign Patents.

The annexed letters from the last two Commissioners of Patents we commend to the perusal of all persons interested in obtaining Patents:—

Messrs. Munn & Co.—I take the pleasure in stating that while I held the office of Commissioner of Patents, more than one-fourth of all the business of the office came through your hands. I have no doubt that the public confidence thus indicated has been fully deserved, as I have always observed, in all your intercourse with the office, a marked degree of promptness, skill, and fidelity to the interests of your employers. Yours, very truly, CHAS. MASON.

Immediately after the appointment of Mr. Holt to the office of Postmaster-General of the United States, he addressed to us the following very gratifying testimonial:—

Messrs. Munn & Co.—It affords me pleasure to bear testimony to the able and efficient manner in which you discharged your duties as Solicitors of Patents while I had the honor of holding the office of Commissioner. Your business was very large, and you sustained (and, I doubt not, justly deserved) the reputation of energy, marked ability, and uncompromising fidelity in performing your professional engagements. Very respectfully, Your obedient servant, J. HOLT.

Communications and remittances should be addressed to MUNN & CO., Publishers, No. 37 Park-row New York.
