Cut and Crushed Food for Horses.

The horses in Flanders are kept in the stable winter and summer. Their straw and hay is always cut, and their grain always given to them in the form of meal, and generally mixed with their drinks.

Thousands of lambs are lost for the want of one night's shelter. Thousands of sheep are destroyed by constant shelter.

Experiment in Potato Raising.

I cut twelve good sized potatoes, one eye in a piece, and put two in each hill, the hills about four feet apart each way. Manured in the hill with hog manure. The vines covered the ground handsomely, but the frost killed them before they matured.

Broken Wind or Heaves.

Editors Country Gentlemen: 'Heaves,' the common name for broken wind in the horse, is susceptible of great alleviation by attention to the character and quantity of food to be eaten by the animal, as every one knows.

The success of the clubbing system as a means of supplying the public with CHEAP NEWS has already been tested by the Spectator.

In announcing to the public the adoption of the Cash System as applied to subscriptions, the proprietors of the Spectator may remark that it has already been approved by all, and adopted by many Canadian newspapers.

Advertisements.

"HAMILTON SPECTATOR." A POLITICAL, Commercial, and General Newspaper, is published at Hamilton, C. W., by the proprietors, WILLIAM GILLESPIE and ALEXANDER ROBERTSON.

From the particular attention paid to Commercial intelligence, the Spectator has acquired a reputation for reliability, which has secured for it the patronage of the Mercantile Community of Western Canada.

The Spectator (Daily, Semi-Weekly and Weekly) is therefore an excellent medium for advertising. The rates charged are the same as the published rates, generally adopted by the Canadian press.
