WILCOX & GIBBS SEWING MACHINES

PRICE WITH HEMMER & PELLER \$35 00.

THIS MACHINE HAS POINTS OF SUPERIORITY PECULIAR TO ITS OWN.

Stitching, Hemming, and Felling with a Single Thread.

It forms a flat, even, and elastic seam, which is warranted not to rip in wear, even if the seam is cut at frequent intervals, and also under all circumstances, "to survive the wash-tub."

A patented device of great utility to learners, prevents the possibility of the machine being run in the wrong direction, or the balance wheel wearing a lady's dress.

Another feature which deserves particular attention is the Wilcox Patent Needle cannot be set wrong.

Two thousand Stitches, or two yards of work, can be done in one minute without dropping a stitch.

"Has combined with its own peculiar merits all the really valuable improvements of the higher priced machines."—Pennsylvania.

"This machine, in the opinion of the committee, fills more nearly the requirements of a perfect family machine than any on exhibition."—Franklin Institute Exhibition Report of 1858.

"Taking into consideration the simplicity, cheapness, durability, and doing all work, the committee were unanimously in favor of the Wilcox & Gibbs as a single thread machine."—Pennsylvania State Agricultural Society's Report.

"We must, in justice, express our confidence in the merits of the Wilcox & Gibbs Sewing Machine. We consider that a great desideratum has been supplied by it, in proving, beyond doubt, that two threads are not, as was supposed, necessary to a good instrument."—Christian Advocate and Journal, June 21, 1860.

The undersigned, Missionary to Constantinople, has examined more than twenty different kinds of Sewing Machines, and after some six weeks' experience with Wilcox & Gibbs' Patent, he has purchased one of them as the best adapted to the wants of his family, and as the least liable to require repair.
