

The American Civil War

NEW YORK, Nov. 26.—A special despatch to the Tribune, dated Nashville, Nov. 20, says:—“The situation is more problematical than at last advices. The enemy have been concentrating and demonstrating in a way which affects the late status, that they were merely feinting to cover the removal of supplies and enforcement of the conscription.—The weight of military opinion continues favorable to the view that there will be no great battle in Middle Tennessee. If there is, it will be between Tallahoma and Winchester.”

Beckinbridge's division of 6,000, and Cheatham's and Withers' of 5,000 each, are at Murfreesboro. Beckner's corps is at and around Nashville. Hardee and Polk's are posted from Tallahoma to Winchester. Part of Kirby Smith's army has joined Bragg.

The first general council of the Episcopal Church of the Confederate States met at Augusta on the 19th.

LOUISVILLE, Nov. 28.—An important order has just been issued by Gen. Boyle which gives much satisfaction to the Conservatives. It is as follows:—

“All commanding officers serving in this district are ordered not to permit any negroes or slaves to enter the camps, and all officers and privates are forbidden to interfere or intermeddle with the slaves in any way.”

The Nassau Guardian states that the Confederate steamers Antonia and Gato, and the British steamer Herid and the Leopard arrived from Charleston on the 20th. The Messengers Ares and Hero were at Charleston on the 17th. Admiral Wilkes with two steamers arrived off Nassau on the 20th and signalled for a pilot. A pilot went out and informed Wilkes that he could not pilot him in only by a special permit of the Governor who had issued a proclamation to that effect on the 11th. The Admiral replied that he would not ask a permit but would come in without it, and then bore away and lay to at a distance of three miles from the shore.—The Guardian is very indignant and says Wilkes will not be allowed to come in, probably feeling afraid that the presence of the two Confederate steamers in port might bring grief. The Octara and Sonoma were at Abaco on the 15th inst., to the disgust of secessh sympathisers there. The port magistrate had interviews with the commanders, giving them a copy of the proclamation, intimating that they could not stay in port; at the same time offering to sell them any stores they might want, but they left that day and returned again at night.

PHILADELPHIA, Dec. 8.—The second edition of the Press has a Nashville despatch dated 7th, which says a battle has taken place between our advance forces and Morgan's guerrillas. Moore's brigade was repulsed several times by the enemy, and finally captured. Our troops made a desperate resistance, but were forced finally to surrender.

NEW YORK, Dec. 8.—Washington special state that four pickets in the army of the Potomac were frozen to death on Saturday night while at Cape Misery, and at Alexandria, seven died from the effects of cold. The Surgeon-General promises the immediate removal of all possible from the latter place to the Convalescent Camp.

NASHVILLE, Dec. 8.—The 33rd brigade, Dameron's division, consisting of the 104th Illinois, Col. Moore commanding brigade; the 106th Ohio, Col. Lafer; 108th Ohio, Col. Limberg; Necker's battery, and a small detachment of the 2nd Indiana cavalry, were surprised at daylight this morning at Hartsville by Morgan, commanding three regiments of cavalry and infantry. After fighting an hour and a quarter our forces surrendered, and burnt our camp, capturing nearly all the brigade trains and teams, and burning what they could not carry away. Our loss was between 50 and 60 killed and wounded, who were left on the field. The Confederate loss is not reported. The gallant Lieut-Col. Stuart of the 2nd Indiana cavalry, and Col. Moore, were among the captured. Major Hill, of the 2nd Indiana cavalry, was wounded, but not dangerously. He says half our infantry fought well, but the other half soon broke. Col. Hardin's and Col. Miller's brigade were sent in pursuit, but the enemy had forded the Cumberland river and were out of reach.

Major Hill denies that the camp was surprised. So the affair is more disgraceful to us as Harperville was a strong position.

On Thursday a Lieut-Colonel of Davis' division was captured while skirmishing. Two regimental Quartermasters of Palmer's division were also captured while foraging.

The latest dates are not reported.

Thirteen waggon and mules on a foraging expedition were captured.

The Imprisonment of Marshal Kane.

Mr. George P. Kane, formerly marshal of the city of Baltimore, having been released without trial from an imprisonment of seventeen months in Fort Lafayette, has issued an address to his fellow-citizens of Maryland, which is published in the New York Herald. The Baltimore newspapers saying they “dare not insert it in their columns because of the despotic and lawless restrictions of the Federal Government.” After speaking of his long incarceration Marshal Kane says in his address:—

“In this imprisonment I am understood to have been the special victim of Mr. Secretary Seward, who, in concert with his hired minions, has omitted no occasion to heap upon me accusations which he knew to be false, and therefore dared not bring to the ordeal of a public trial.”

“To these charges the despotic censorship of the prisons in which I have been kept, allowed me no reply; and I can only now promise that in due time and upon proper occasion Mr Seward shall hear from me in a way which will procure for him, if he has not already acquired it, the contempt of every honest man and woman in the land.

Without having been held upon any specific charge, I am turned out of prison without any reason being assigned for it; and in my arbitrary arrest and release, I illustrate the most flagrant violation of constitutional liberty.

“It would be unbecoming the dignity of the subject to cast abusive epithets upon the author of the gross outrage; but when allowed the opportunity, I pledge myself, under the pain of the forfeiture of the good opinion you have always honored me with, to show that all that is bad in man, republican in a citizen, and corrupt in an officer, finds itself concentrated in this individual.”

A HAPPY (?) MAN.—The new Turkish Ambassador at Paris brings seven wives with him. The French have christened Mesdames Monday, Tuesday, &c.—a wife for each day.

FRENCH FLEET AT NEW ORLEANS.—The French Admiral Reynaud, with three war steamers, the Guerriere, Cabinet, and the Renaudin has arrived at New Orleans to protect French subjects from Butler's despotism and oppression. The Admiral was welcomed by a procession of thirty thousand citizens of French extraction. The Guerriere, drawing too much water to enter the Mississippi, cruised off the mouth, and will keep up communication with the French fleet at Vera Cruz. The Admiral declares his intention to protect French subjects, and to redress their grievances, and “to play towards Gen. Butler the part which General Butler seemed to play towards the Federal Government.”

THE METHODIST NEW CONNEXION.—Missionary services will (D. V.) be held in the Baptist Chapel, Durham, on the Sabbath, December 14th, when the Rev. R. Reddyoff is expected to preach at 11 o'clock, a. m., and the Rev. J. Gundy at 6 p. m. Collections will be taken after each service in aid of the mission fund. The missionary meeting will be held on Thursday following at 7 o'clock, p. m., when the Revs. Park, Cross, Stewart, Birks, Reddyoff, Gundy and Dayne are expected to address the audience.

DIED. In Beatinck, on the 20th ult., Mr. THOMAS McMillan, aged 70 years.

NEW PROSPECTUS OF THE SCIENTIFIC AMERICAN. For 1863!

VOLUME VIII—NEW SERIES. The publisher of this popular and cheap newspaper begs to announce that on the third of January next a new volume will be commenced. The journal will be issued in the same form and size as heretofore, but it will be the aim of the publishers to render the contents of the paper more attractive and useful than ever before.

The Scientific American has been published weekly for eighteen years, and is the most popular and largely-circulated journal of its kind in the world. Owing to the enormous increase in the price of printing paper the publishers are, to their regret, compelled to increase the subscription price of the Scientific American to \$3 per annum for single subscribers.

As heretofore, every number of the Scientific American will be profusely illustrated with first-class original engravings of new inventions and scientific discoveries, all of which are prepared expressly for its columns. The Scientific American is devoted to the interests of Popular Science, the Mechanic Arts, Manufactures, Inventions, Agriculture, Commerce, and the Industrial pursuits generally, and is valuable and instructive not only in the Workshop and Manufactory, but also in the Household, the Library and the Reading Room.

The Scientific American has the reputation, at home and abroad, of being the best weekly journal devoted to mechanical and industrial pursuits now published, and the proprietors are determined to keep up the reputation they have earned during the eighteen years they have been connected with its publication.

TO THE INVENTOR! The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come, but each number contains an Official List of the Claims of all the Patents issued from the United States Patent Office during the week previous; thus giving a correct history of the progress of inventions in this country. We are also receiving every week, the best scientific journals of Great Britain, France, and Germany; thus placing in our possession all that is transpiring in mechanical science and art in those old countries. We shall continue to transfer to our columns copious extracts from those journals of whatever we may deem of interest to our readers.

CHEMISTS, ARCHITECTS, MILLWRIGHTS & FARMERS! The Scientific American will be found a most useful journal to them. All the new discoveries in the science of chemistry are given in its columns, and the interests of the architect and carpenter are not overlooked; all the new inventions and discoveries appertaining to those pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights, for six months will be found published in the Scientific American, which information they cannot possibly obtain from any other source. Subjects in which planters and farmers are interested will be found discussed in the Scientific American; most of the improvements in agricultural implements being illustrated in its columns.

TO THE MECHANIC AND MANUFACTURER! No person engaged in any of the mechanical pursuits of life can afford to be without the Scientific American. It costs but six cents per week; every number contains from six to ten engravings of new machines and inventions which cannot be found in any other publication. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced artists, under their own supervision, expressly for this paper.

Terms. To mail subscribers—Three Dollars a Year, or Ten Dollars for four months. One Dollar and Fifty Cents pays for one complete volume of 416 pages; two volumes comprise one year. A new volume commences on the 31st of January, 1863.

Club Rates. Five copies, for six months \$6
Ten copies, for six months 12
Ten copies, for twelve months 22
Fifteen copies, for twelve months 34
Twenty copies, for twelve months 40
For all clubs of Twenty and over the yearly subscription is only \$2. Names can be sent in at different times and from different Post-offices. Synchron copies will be sent gratis to any part of the country. Western and Canadian money, or Post-office stamps, taken at par for subscriptions. Canadian subscribers will please to remit 25 cents extra on each year's subscription to pre-pay postage. MUNN & CO. Publishers, No. 37, Park Row New York

TO CONSUMPTIVES.

THE advertiser having been restored to health in a few weeks, by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption—is anxious to make known to his fellow-sufferers the means of cure. To all who desire it, he will send a copy of the prescription he used (free of charge), with the directions for preparing and using the same, which they will find a sure cure for Consumption, Asthma, Bronchitis, &c. The only object of the advertiser in sending the prescription is to benefit the afflicted, and spread the information which he conceives to be invaluable, and he hopes every sufferer will try his remedy, as it will cost them nothing, and may prove a blessing. Parties wishing the prescription will please address Rev. EDWARD A. WILSON, Williamsburg Kings County, New York. 205-3 m.
