NOVEMBER.

BY T. W. BARRY. The leaves are falling from the trees, And covering our mother earth; And give to new ones birth.

With red and yellow leaf, And forcibly reminds us of Our life which is so brief.

Under whose refreshing shade I often sat with book in hand, When from the house I strayed. There now it stands bereft of leaves,

But sunny days will come again With buds to deck it o'er. November's mild, yet chilly winds, Triumphantly at last,

While walking o'er the dry, crisp leave That once above our head Played in the eddving gusts of wind, But now are lying dead.

Do we ever think that one day too Like them we shall lie low; And be trodden under foot of men? I do not think-ah! no.

But, reader, just as those leaves did Fall withered from the tree ; So you and I, and every one Shall likewise withered be.

Hail ! glorious warbler of the night,

Sing on thou blessed creature, sing ! Through hall and passage; And when thy voice is hushed at last, When dust, quartette, and all are past, We'll have a "sassage."
