TO OUR READERS.

We have tried to be as lenient as possible during the year, waiting for the return of better times when our subscribers would be in a position to assist us by their subscriptions. Over six hundred of those receiving THE CHRONICLE regularly are still in arrears for 1897. Look at your label and see how the number compares with the number of the paper. 1608 means that your paper is paid to the end of 1897, 1556 to the end of 1896, and so on. The number of the present issue is 1596. You can easily tell how you stand by a comparison.

If we could afford it we would not trouble you now, but being absolutely in need of money, we appeal to you for your subscription if not yet paid. Yours very truly W IRWIN.

THE RISING TIDE.

CANADA DEMANDS AN EXPORT DUTY ON SAW LOGS.

During the coming election contest for the legislature the timber policy of the government will come in for no small share of criticism. For many years the management of the Crown Lands Department has not been satisfactory to the opposition, and now that the Federal government at Ottawa and the Provincial at Toronto are both Liberal, will not have a tendency to lesson the watchfulness of the opposition in safeguarding the timber and conserving the interests of the province.

The American Lumbermen have large timber areas in Ontario, and the imposing of an import duty of \$2 a thousand on sawn lumber, while logs are admitted free to the United States, lumber mills is a grievance to Canadian mill owners, and as a retaliatory measure the Federal Government is urged to impose an export duty on logs, or for the Legislature to adopt regulations providing for the sawing of all timber, cut within the province, to be done within its borders.

It is argued that an import duty on logs would have a tendency to compel American mill owners to transfer their mills to the Canadian side, and the restrictions placed on alien labor would give employment to Canadians.

As a sort of compromise the government has pursued a middle course. According to regulations recently issued the employment of alien non-residents is strictly prohibited, and lumbermen are compelled to purchase their supplies in Canada, but this is considered inadequate and ineffective, calculated only to appease public sentiment by the appearance of action. The government however declares that the question of an export duty is under consideration.

Apart from politics and in view of the decrease of timber in other parts of the world, the guarding of our timber interests is essential to the welfare of Canada, and should be carefully looked after.

A BOLD STROKE FOR CANADA.

Canadians are very generally aware that they have now reached an eminence from which they can look backward with relief and forward with hopefulness. It has seen the great wealth of British Columbia acknowledged by mining experts from every country in Europe; the gold finds in the Klondike region have also attracted the world's attention, whilst the social and political occurrences in connection with the Jubilee year have been incalculable value to the country. Toronto Saturday Night's Christmas Number has been prepared with a view of gaining for Canada as much as possible from this favorable state of British feeling, and of correcting some palpable misrepresentations of our climate and resources. Thousands of copies of the Christmas number are sent to Great Britain, and this year the editor attempts to correct false impressions about the Canadian climate, to show that the Klondike with its ice is a thousand miles north of agricultural Canada and that the St. Lawrence River should attract the pleasure-seekers of the world during summer.

The two beautiful, high-art, color-supplements which are this year given free with the book, also carry out the idea. "One is entitled "The First Harvest in Canada," and the other "Canada, Sixty Years After." These are beautiful pictures, painted by Mr. J. D. Kelly of Toronto. Every home that is, or has been, connected with a farm will desire to have them framed for its walls. They are said to be the finest specimens of lithographic art yet produced in Canada.

"The Graves of Three Great Canadians," an article describing the last resting-places of Sir John Macdonald, Hon. Alexander Mackenzie and Hon. George Brown, with photographic views of the same, and half-tone portraits of the three men as we knew them, will prove highly interesting.

Several first-class original stories by Canadian writers and illustrated by Canadian artists, make up the bulk of the book, while a new feature will be a record of the leading sporting events of the year, with portraits of the Canadians who have won international and other triumphs.

Each copy is strongly wrapped in a pasteboard tube. The number is sure to attract great attention. It will be for sale in this town by the stationers and newsdealers. The publishers' address in Toronto Saturday Night, Saturday Night Building, Toronto.

FAIR NOTES AGAIN.

Since the Holstein Fair, owing to the crowded condition of our columns we have been unable to make some references we fully intended to at the time. In the exhibit of Photos, made by Messrs. Chapman of Mt. Forest and Browne of Durham we gave both credit for good displays, at the same time making no comparison on their respective merits. We noticed in the Mt. Forest papers Mr. Chapman's exhibit was held away up in G while Mr. Browne's was merely noticed. In this connection, without saying anything reflecting on Mr. Chapman's work, allow us to say that volumes of complimentary remarks were made of Mr. Browne's exhibit in our hearing. His pictures of those who took part in the "Temple of Fame" were the admiration of the crowd, and as a piece of artistic work and artistic arrangement it was hard to equal.

Mr. W. D. Connor too had a very unique pump, known as the I. X. L. ball bearing pump. It was there in working order at the bridge and all who wished could see its working for themselves. He took orders for six pumps on the ground that day, a pretty good showing we think.

Mr. John Livingston, also from Durham had an exhibit of useful and necessary Farm and labor saving implements, manufactured by the Frost and Wood Company of Smiths' Falls, and Mr. Calder's display of grain crushers and other articles stood alone in their excellence, and spoke for themselves.

Thin, Pale Children

One satisfaction in giving Scott's Emulsion to children is they never object to it. The fact is, they soon become fond of it. Another satisfaction is because it will make them plump, and give them growth and prosperity. It should be given to all children who are too thin, or too pale. It does not make them over-fat, but plump.

It strengthens the digestive organs and the nerves, and furnishes material for rich blood.

We have a book telling you more on the subject. Sent free for the asking. SCOTT & BOWNE, Toronto, Ont.

Grant's Ad

We want to tell you this week about our Clothing. We have a large Stock of it and want to turn it over into money. You know what that means. These goods have to be sold. We start Child's Suits at \$1.50 worth \$2.00 and all others in the same proportion.
