THE CHRONICLE, DURHAM, June 15th, 1899.

South Grey Farmers' Institute.

On Saturday afternoon last the annual meeting of the S. Grey Farmers' Institute was held in the Town Hall here. The attendance was small but active and after the opening by a short address from President Young and the reading of the minutes, Mr. Gorsline spoke in relation to samples of seeds etc. furnished by the Experimental Farm at Ottawa.

Mr. Win. Irvine, of Lamlash, felt dissatisfied with the results of some of his experiments on seeds from Experimental farms. President Young's experiments with grains were not exactly a success.

Mr. Thos. Clark, of Elmwood, wasn't much struck on the success of his experiments, but for high land he found Sanford clover an excellent variety.

Wm. Smith, Esq., of Glenelg, had good success with Dawson's Golden Chaff, and grows it now. The result of experiments proved satisfactory.

Mr. Binnie tried a variety of oats which yielded 63 bushels to the acre. Other varieties were inferior. The White Wonder pea turned out well the first year, but was frozen the next.

Mr. Gorsline's 3lbs. of potatoes, planted without instructions, produced 65 lbs. The Secretary read the annual report which showed that four winter meetings were highly successful.

Total Receipts \$183.23; Expenses \$132.13; Balance \$51.10. It was recommended that all buy their tickets for the Excursion to the Model Farm ahead so that the railway officials may provide sufficient accommodation.

An unfortunate and to Mr. Thomas Elliott a serious runaway took place on Tuesday. Mr. Elliott runs the Durham and Chatsworth stage and a little after 11 a. m. yesterday delivered the mail bags at the post office here, and was in the act of getting into his wagon when the horses turned suddenly and upset the wagon. One of the horses fell upon the sidewalk, and before Mr. Elliott could extricate himself from the upset and catch them the horses ran away, crossing south, trailing the wagon on its side after them. They were caught opposite Mr. Collins', where one fell on top of its mate. One valuable young horse sustained a broken bone in its hip, and the other one was badly cut and bruised. The wagon, a good new one built for that purpose, was badly wrecked. Even if both horses recover, which is doubtful, Mr. Elliott's loss will be heavy. —Chatsworth News.

and buoyancy, in England, is not a designer, but has a collection of old fans. The lace is among the finest of the Duvelle fans, the sticks being of tortoise shell or mother-of-pearl. This artist shows some beautifully painted fans the Louis XVI, style and Verins Martin.

In our own shops we find a splendid collection of the most exquisite designs. There is a black and violet fan of "Cabinet" style, which is very beautiful. The pearl sticks are inlaid, upon the mount are painted delicate Watteau figures. Another with tortoise shell sticks is of black gauze with tortoise shell sticks. Upon green medallions, upon which appear lovers with chubby cupids hovering near.

The fans are from 9 to 10 inches length, the tiny Empire fan not being as popular as it was several seasons ago. There are many pretty chiffon fans, one having a pretty pastoral scene painted upon it. Another of white silk, upon which is applied designs with the lace medallions are in little hand-painted figures; the pale cream-colored fan, spangled, is ornamented with figures in the style of the Verins Martin fans.
