The Admiralty has made huge contracts for the supply of coal to all British coaling stations on the way to the Cape, so that any British squadron will be enabled to coal without weakening the present supply.

UNITED STATES. W. H. Appleton, the New York publisher, is dead.

President McKinley defended the expansion policy before an audience of 10,000 persons at Madison, Wis.

For more than a week a snowstorm of unprecedented severity has been raging in the mountains surrounding Leadville, Colorado.

GENERAL. Emil Arton, of Panama canal motorty, has been pardoned.

Over 500 Spanish prisoners have died within the past eight months.

Two youthful officers in the French army are charged with treason.

Lord Curzon, Viceroy of India, will shortly visit the plague and famine district of India.

M. Emile Loubet, President of the French Republic, is suffering from angina pectoris.

All prominent Afghans who dare leave the court of the Ameer are fleeing to save their lives.

Cape Colony is the latest accession to the Imperial penny postage arrangement.

Germany, and the United States will probably settle their difficulty in Samoa by arbitration.

The clerical victory in elections at Malines, the seat of the cardinal archbishop of Belgium, led to serious riots. Much damage was done to property, and many persons were seriously injured.

Dreyfus has had it announced that he does not want any agitation to be stirred up in his name, as he is unwilling to serve as an excuse for political parties to create trouble. He says he desires to retire to Egypt and be forgotten.

The North China Daily News says the arrangements for the dethronement of the Emperor of China are proceeding rapidly. His successor has been definitely chosen. It is Pu Tsuan, the nine year old son of Isai Lan. Pu is a Manchurian.

CAPTAIN'S WIFE LASHED TO MAST. Mrs. Skofield Endured the Wreck of the Carrie Lane—Her Prayer Answered at Last.

When men endure the peril, the hardships, the agony of shipwreck, the story is terrible. When women go through the same dangers an element of pity mixes with the horror. The story becomes less Titanic in becoming human.

On September 28 the Carrie Lane, lumber-laden and sailing from Canada for Noank, sprung a leak. On board the Carrie Lane were Captain and Mrs. Skofield, Mate Vanlippery, Second Mate L. C. Shaw, of Boston; Engineer Philip Keeler, of Baltimore, and five negroes, members of the crew.

All day on September 29 and all day September 30 and part of October 1 the water gained on the pump. On October 1 Captain Skofield saw his vessel was doomed. There was seven feet of water in the hold.

The sea was high. The bruised and battered craft fell into the trough of the sea, and rolled heavily. Captain Skofield ordered the boats to be cut away. Then the crew and the captain's wife, Mrs. Skofield, lashed themselves to the stumps to prevent being washed overboard by the huge waves. The vessel was then ten miles off Cape Fear.

PRAYED FOR A CALM SEA. Sunday night the sea was terrific. The waves were giants. The Carrie Lane lay helpless and in their power. Lashed to the mast, Mrs. Skofield was drenched to the skin. It was cold and the salt spray stung, cold as ice water.

The negroes in the crew lost their heads. They thought the vessel was doomed. Their shrieks rose above the noise of the waves, above the grinding of the wreckage against the schooner's side.

The captain's wife blossomed into a heroine. She was calm, thoughtful, self-reliant. She encouraged the men. She strengthened even the failing hopes of her husband.

As dawn was breaking Sunday she called on those with her to pray for a calmer sea. The prayer was made, the prayer of desperate men, almost hopeless.

It was answered. The sea became smoother, although the waves still ran high. At noon the British steamer Rhodessa, Captain Mark Bate, appeared, and a boat was sent to the helplessness schooner manned by Mate Jewell. The high waves prevented the boat from coming near and a line was thrown to the Carrie Lane.

One by one the crew of the schooner were pulled over to the boat. Mrs. Skofield was rescued first, and a cheer arose when she was safely in the lifeboat. Her husband was the last to leave the ship.

LAKE MUMMIES. It is about 10 years since about 17 Egyptian mummies in the old museum of Berlin proved to be the bodies of fellows, who a short time ago, took their beer in the saloons of the capital of the Empire of William II. It is now believed that there is not a mummy in the world that has not been imposed upon by frauds of this kind.

To rule one's anger is well; to prevent it better.—Edwards.

SAYS BRITAIN IS RIGHT.

NEW YORK JOURNAL SAYS STRONG THINGS ABOUT THE BOERS.

United States Would Interfere in a Similar Case—It is a Case of Six White Men Arbitrarily Taxing Twenty White Men—Calls the Transvaal a Mediaeval, Bigotry-Ridden Dutch Settlement.

In an article headed "Let Us Mind Our Own Business," the New York Journal of a late date says:

The editor of the Journal has been requested to sign a petition to President McKinley urging him to interfere between England and the Boers, to use the influence of the United States to prevent England from interfering in Boer arrangements.

The editor of the Journal declines. He believes that interference by England is legitimate, that civilization and progress demand it. This belief is based on the following facts:

The constitution and laws of the Transvaal, which really reflect the personal wishes and religious prejudices of Paul Kruger and a few other Dutchmen, forbid any Catholic to share in the law-making for the country. England demands that this discrimination against Catholics cease.

The Transvaal laws forbid any Jew to share in the law-making power. England demands that this discrimination against the Jews cease.

There are 260,000 whites in the so-called Boer Republic, but only 60,000 are Boers.

The Boers declare that they are "merely asking the right to live." What they really ask is the right of six men to tyrannize over twenty, of 60,000 TO RULE 200,000,

and rule them unjustly. The Boer attitude is not a demand for freedom. It is strictly an attitude of denying freedom to others. The Boer bosses controlled by aristocracy, an aristocracy based on birth—Dutch birth.

If the Dutch who settled this island had insisted on keeping the island strictly Dutch; if they had refused to share in the law-making power; if they had forbidden children in the Public schools to be taught anything save Dutch and miserable bastard Dutch, they would have acted in America precisely as the Boers are now acting in South Africa.

Could they have hoped to maintain such an attitude? Could civilization, morality, or any form of decency have justly upheld them merely on the ground that a power greatly superior desired to compel the adoption of common sense methods? The appeal is made and signed by eminent politicians "to save a little republic from destruction at the hands of a ruthless empire." Kruger's country is no republic. Kruger has been an absolute ruler there for seventeen years. All power is in his hands and that of a council of seven. They can and do ignore the laws and orders of even the Upper House of Representatives. The land of the Boers is no republic. It is a mediaeval, bigotry-ridden "Dutch settlement, as great an anachronism as any in existence. This is the question at issue in the Transvaal:

Can six white men arbitrarily tax twenty white men? Can six white men arbitrarily govern twenty white men? Should a settlement of profoulyly

IGNORANT DUTCH BOERS be encouraged in the disfranchisement of Jews and of Catholics and believers in all other religions than that which they inherited with their other prejudices? The Journal thinks not. Cuba has a population of fewer than two millions. Suppose eight million Americans should ultimately settle there. Cuba remaining an independent nation. Should the eight million Americans suppose they develop the open mines, foster commerce, and pass that nine-tenths of the wealth thousands of the brains should be paid nine-tenths of the taxes, and yet of the taxes and the passing of laws in the government of the country. Would the United States tolerate this treatment of citizens? Why should the United States demand that England tolerate similar treatment of her citizens?

It should not. The Englishmen, the Americans, the Irish, the Scotch, the Jews of various nationalities who have settled in the Transvaal found the Dutch Republic a bankrupt institution. They have made it prosperous. They have made its ruler Kruger a multi-millionaire. They are forbidden to share in the government of the country which they have created.

President Kruger is trying to enforce liberty-loving, progressive, intelligent, bucolic Dutch ideas which mark the progress of the great trek of which he is a survival.

THE IDEA OF LIBERTY entertained by him and his associate bosses is "liberty for the Dutch and for nobody else." His government is working basis.

President McKinley will not inter-override the decisions of their own Supreme Court, in taxing those who are not represented, in oppressing citizens for their religious beliefs.

The time for interference with England is not now. A very good occasion for such an action was seized by this country when the Venezuela controversies arose. There will be other occasions, and the Journal hopes to perceive them and insist upon them; but mental, ignorant movement to back up 60,000 Boers, in oppressing 200,000 energetic men, who have created their prosperity, and have a right to share their government.

HINTS FOR THE FARMER.

RAISING BABY BEEF.

In producing first-class, young beef, the breed of cattle selected is a very important point, writes M. C. Thomas. The three leading breeds are: Short-horns, Polled Angus and Herefords. There are a few others that some recommend, but wherever they have been tested they have not proven equal to the breeds just mentioned. The beef qualities of some of our cattle have been greatly reduced by being mixed up and crossed so much with the dairy breeds. There is no use trying to raise beef from dairy cattle. If you want to run a dairy get a dairy breed, but if you desire beef, procure a beef breed. Study the qualities of the leading beef breeds and select the one that nearest suits your fancy. If you choose a breed that you do not naturally have a liking for, you will not make a success with it. Because your neighbor breeds Shorthorns is no reason why you must.

After the breed has been selected, pay particular attention to the feed and care. When it is possible, I prefer to have the calves come in February or early March. If the cows are in good flesh when winter sets in, and are not giving a full flow of milk, they will not need so much extra care to keep them in first-class order until calving time. Until they have calved, good clover hay and corn fodder can be their principal diet, but when they begin to give milk, they should be given in addition to the hay and fodder, some oilmeal, bran, middlings, etc. This will produce a heavy flow of milk and will keep the calf growing rapidly until it gets old enough to stand pushing. When grass comes the cow will give a large quantity, thereby causing the calf to make rapid strides.

As soon as the calf is old enough to eat, begin feeding it a little oats, bran and shelled corn, and when it is about four months old, gradually increase the feed and decrease the amount of milk. By the time it is five months old, have it entirely weaned and on full feed of corn, oats and bran. Be very careful about making these changes too rapidly. They should be so gradual that the calf will not notice them. Always have plenty of good clean water and salt in easy reach. If they cannot have all the water they want their growth will be greatly retarded. When the grass begins to fail in the fall supply green corn fodder and clover hay, and as cold weather approaches, if possible, provide a shed where they can go in and out as they like. Never fail to let them have all the grain and hay they will eat.

By caring for them in this manner they will weigh from 900 to 1,000 lbs. at one year old, if of good stock to begin with, I prefer to sell at that age. Some may prefer to keep them longer, but I believe it pays to sell younger and keep more cows.

THE FLOCK IN AUTUMN.

The critical time of year in the management of the sheep is here, the fall. What you do now is like the laying of plans for the year. If you sell all the best lambs and keep the poor ones your reward will come. If you keep the best you will also reap that which you sow. If you breed to a poor ram your product will be bad, no matter how much you toil and plan. Feed it, the greatest of all helps, cannot undo the damages an inferior sire produces. Remember from a breeding standpoint the ram is half of the flock.

Do not let anyone make you believe that breed is the most important thing, though it is always well to breed in straight lines. A good, rugged ram is what you want, something strong, something fixed, that your lambs may be what you expected, and plenty of them. Do not breed to any ram that you would not say of him, "He is a good one, and a good one at both ends." Plan all sorts of ways to give your sheep plenty of good feed early in the fall, and keep it up all winter. Do not neglect the sheep.

THE WAY FARM BOYS ARE BUILT.

"What are your ideas about keeping the boys on the farm?" we are asked. Lots of boys are driven from the farm by the treatment they get there. You cannot work a boy from 10 to 14 hours a day, begrudging him a day off and depriving him of an opportunity to make a little money and have a little fun on his own account and then expect that he is going to stay on the farm. Boys are not built that way. But if you treat them right encourage their originality, and foster their development and the doing of things for themselves, the average boy is level-headed enough to realize the advantages offered for rural life. Some of us make the mistake of trying to drive our boys instead of working with them, or we fail to recognize the rapidly with which a bright boy gains knowledge and experience between 12 and 20, and how quickly he may know more or have better judgment in some matters than his father. The parents are quite as often at fault as the boys in most cases where

20 YEARS TORTURE.

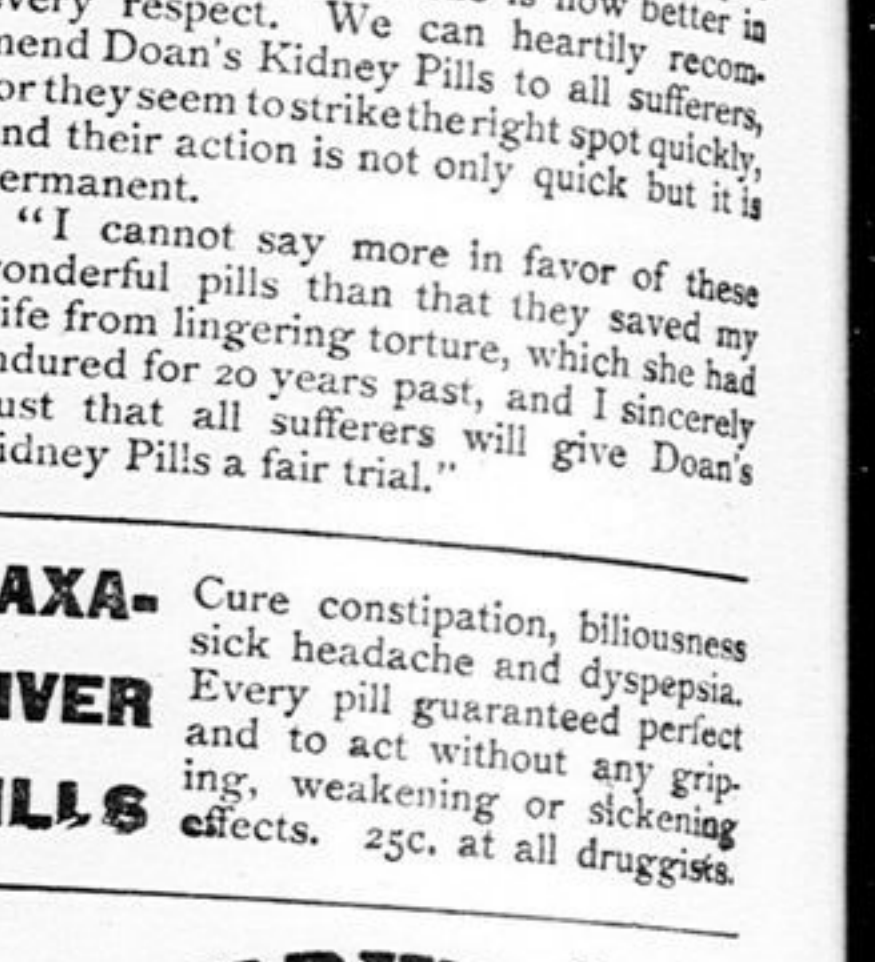

A Belleville Lady, Whom Doctors Failed to Help, Cured at Last by Doan's Kidney Pills.

No one who has not suffered from kidney disease can imagine the terrible torture those endure who are the victims of some disorder of these delicate filters of the body. Mrs. Richard Kees, a well-known and highly respected lady of Belleville, Ont., had to bear the burden of kidney complaint Pills have cured her when all else failed.

Her husband made the following statement of her case: "For 20 years my wife sleeplessness and nervousness and general prostration. Nothing seemed to help her. Doctors and medicines all failed, until we got a ray of hope when we saw Doan's Kidney Pills advertised as a positive cure. She began to take them and they helped her right away, and she is now better in every respect. We can heartily recommend Doan's Kidney Pills to all sufferers, and their action is not only quick but it is permanent."

"I cannot say more in favor of these wonderful pills than that they saved my wife from lingering torture, which she had endured for 20 years past, and I sincerely trust that all sufferers will give Doan's Kidney Pills a fair trial."

LAXA-LIVER PILLS Cure constipation, biliousness, sick headache and dyspepsia. Every pill guaranteed effective and to act without any griping, weakening or sickening effects. 25c. at all druggists.

Remember Milburn's Heart and Nerve Pills cure the worst cases after other remedies fail.

Laxa-Liver Pills cure Constipation.

FORCES AGAINST BRITAIN. The following is the description of the Boer and Orange Free State armies published recently in a volume written by Mr. Charles S. Jerram, called "The Armies of the World." It is understood that this description, brought up to date, is inspired from official sources:—

The Transvaal has population— Whites 295,000 Kaffirs 620,000 War Strength 25,500 14,250 of these being between 18 and 34 years of age.

The State Artillery is the nucleus of the forces. It was re-organized since 1895, and must be always ready to march. The corps comprises a colonel, 109 officers and non-commissioned officers, and 223 artillerymen, and 28 apprentice telegraphists. The large number of officers is for training purposes. This is the force that over-awes, or at least constantly confronts Johannesburg. The number of guns is only approximately known. It is not less than the following:—Six light and six heavy Krupp guns, four light and two heavy quick-firing guns, one rifled muzzle-loading gun, and one machine gun.

Volunteers—Several corps have been constituted. The special object is to keep up the shooting. In shooting the burghers are reported to have fallen off since the fatal days of Majuba Hill in consequence of the disappearance of big game, but in marksmanship they will still be equal to regular troops. In Johannesburg a corps has been formed consisting of 600 infantry and 200 cavalry. Krugersdorp has a corps of cavalry 150 strong. Middeburg, Carolina, Ermilo and several other places have corps.

The Orange Free State— White population 77,000 Natives 130,000 Numbers liable for service, 20,000 men.

The permanent troops are 80 field artillerymen stationed in the fort at Bloemfontein. The reserve for this corps consists of 400 men. There are 14 Krupp guns, seven 5-in. guns, five Armstrong 9-pounders, two Whitworth 6-pounders, one Whitworth 3-pounder mountain gun, one 9-cm. gun, and three Maxims.
