HIS LIFE WAS SAVED.

Mr. J. E. Lilly, a prominent citizen of Hannibal, Mo., lately had a wonderful deliverance from a frightful death, in telling of it he says: "I was taken with Typhoid Fever, that ran into Pneumonia. My lungs became hardened. I was so weak I couldn't even sit up in bed. Nothing helped me. I expected to soon die of Consumption, when I heard of Dr. King's New Discovery. One bottle gave great relief. I continued to use it, and now am well and strong. I can't say too much in its praise." This marvellous medicine is the surest and quickest cure in the world for all Throat and Lung Trouble. 50 cents and \$1.00, at any Drug Store; every bottle guaranteed.

THE Assizes will be held in Owen Sound Dec. 12th.

BRAIN FAG

Is the result of Overwork and an Exhausted Nervous System. Dr. A. W. Chase's Nerve Food creates New Brain and Nerve Tissue.

Business and professional men, accountants, stenographers, teachers, students and all brain workers know only too well what it means to have the brain so tired out that concentration of thought is almost impossible.

One-fifth of all the blood in the human body is found in the brain, and unless the blood is pure and rich the brain becomes exhausted for want of proper nourishment.

Dr. A. W. Chase's Blood Food creates new brain and nerve tissue, and produces rich red blood, "the vital fluid" of the body.

All brain workers quickly recognize the merits of this great food cure, and after a few doses enter on their work with new energy and ambition.

Brain fag is unknown to persons whose brain and nerve have been invigorated by the use of Dr. A. W. Chase's Nerve Food, which is for sale by all dealers at 50c. a box.

Dr. Chase's New Book, "The Ills of Life and How to Cure Them," sent free to your address. Edmanson, Bates & Co., Toronto.

Admiral Dewey was married to Mrs. Hazen Thursday last at Washington.

Editorial from "Baltimore News," September 9th.

The Patent Record is the title of a richly illustrated and interesting monthly published in this city by the Patent Record Company, the September number of which makes an unusually creditable showing. There are special articles of value and interest treating upon topics of present moment, notably one by W. T. Stead on "The Cape to Cairo Railroad," and in addition might be mentioned those on "Telephony," "Electrolytic Generators and Their Work," "Progress in Airships," "The United States Secret Service," and "The Scientific and Mechanical Progress of the Nineteenth Century." The September number contains forty pages, and in addition to the special articles is crowded with information for scientists, inventors and the general reader. The large two page supplement gives an excellent picture of the new battleships Alabama and Kearsarge. The frontispiece affords an excellent view of the Olympia on her passage through the Suez Canal. The paper is devoted to the interest of American Inventors.
