ews, Truro, N.S.

Wright, of Alton, Col. N.S., is now one of the hardest working farmers in the district. But Mr. Wright was blessed with perfect health; of fact for some fifteen years a martyr to what appeared an incurable trouble. He was later with a News in Wright said: "I am in that the trouble which for so many years has been willing to give you the publication. It is a year since my trouble slight at first, but later pains in the back, lifting, but often when not. With every attack I confined to the house, and long months was bed-ridden. WOMEN AND GLOVES.

Women Don't Generally Know How to Treat Properly a Pair of New Gloves.

An old draper, writing in the Draper's Record, London, says that between a growing inclination on the part of customers to bring back damaged gloves for exchange, and the evident intention of wholesale houses to keep inventories as narrow limits as possible, the unfortunate retailer seems likely to have a bad time of it. What with extended stock and closing out of prices, the department has undergone within recent years a decided change for the worse, and now frequently fails to return a fair profit, while it would generally not be able to bear the loss that more extensive changes would bring upon it. Yet it must be admitted that a customer has a right to expect a good and wearable glove when she has paid an adequate price for it, and it would be a mistake to run the risk of losing her future patronage by sending her away dissatisfied and in a huff, rather than to replace a pair of which she has ripped without showing marks of rough treatment. What can be done? It has been interesting to follow the methods adopted during recent years by our American cousins for dealing with these difficulties. They have in some cases given away glove-stretchers with every pair above a specified price, and may, probably, in other instances have added packets of chalk as well. They have been ready to mend gloves, and have advocated the installment of a glove-mender in the house by giving one of the young ladies a complete outfit and plenty of encouragement, but apparently without contemplating any increase of her salary. They have tried to promote home-mending by keeping for sale in the department glove-stretchers in the shape of small sticks with oval balls of different sizes—one for the thumb and the other for the fingers—at either end, and by providing at popular prices dainty haberdashery cases containing special needles, silks and buttons for glove repairs. But people are not likely to do for themselves what they can get so for them, and so a policy of fitting on gloves before purchase was taken up, and is still fitfully, but not enthusiastically followed. The plan would work well enough if sweet reasonableness in all customers

COULD BE DEPENDED UPON.

With all deference, it has always seemed to me that this matter is not taken at the right end. It is like commencing a subject in the middle to assume that women generally know how to treat properly a pair of new gloves. By all means let us exchange readily a pair of gloves that, either in the skin or sewing is faulty, but let us try to secure indulgent and wheedling adaptation of a tender, untried skin to the peculiarities of the hand that has to be put within it somehow. It is, perhaps, too much to hope that women will ever be brought to wear gloves big enough for them. They will probably always insist upon getting their gloves one or two sizes smaller than they ought to be, in spite of the fact that easy-fitting gloves will wear twice as long and really look infinitely better than when, as a famous academician once said, the fingers are made to look like so many sausages. It would be safe to declare that not one woman in a hundred buys gloves large enough for her, and probably not another out of the remainder will be wise enough and careful enough to give the gloves a fair start in wear. We can fall back on consular report for the calculation that a raw skin must pass through 219 different manipulations before it becomes a glove, and the 220th is often a strain like into the stages of a hearty meal in a box constrictor. Glove stretchers and gratuitous powder afford little help, unless they are followed by muscular moderation, and the best way of preventing split gloves is to teach glove wearers what should or should not be done with new gloves. The best way of imparting this instruction would be by prettily printed and, preferably, illustrated leaflets, which might be given away with all purchases, and reprinted, as occasion offered, in catalogues or other

TRADE LITERATURE.

This suggestion is not put forward as a discovery, nor can it be considered a novelty, for some years ago an "insert" in the trade list of a leading Export put the case for gloves plainly before purchasers, after this fashion: "Manner of Putting on Gloves.—1. Open and turn back the gloves to the thumb and powder lightly; 2. Put the fingers in their places, not the thumb, and carefully work them on with the first finger and thumb of the other hand until they are quite down; never pass between the fingers; 3. Pass the thumb into its place with care, and work on as the fingers; 4. Turn back the glove and slide it over the hand and wrist, never pinching the kid, and work the glove into proper place by means of the lightest pressure, always allowing the kid to slide between the fingers; 5. In finishing, care should be taken in fastening the first button." In clearness and directness this leaves nothing to be desired. And with a brief account of the manufacture of gloves, which is full of interest from first to last, even though those 219 processes were not enumerated, there might be sent out a dainty little souvenir of the department, which could not fail to arrest attention and insure an excellent advertisement.

LUCKY LUCKNOW.

Ontario Town Which Considers Itself Fortunate in Having Dodd's Kidney Pills on Hand.

Since Dodd's Kidney Pills Were Introduced Little is Heard of the Old Complaint—Backache—Mr. Geo. Burgess Explains His Case.

Lucknow, Nov. 13.—The people of this town are of the opinion that they are the most fortunate lot of people in the country. They say they have discovered a remarkably easy escape from Backache—the enemy of all peoples at all times. They say that Backache is really Kidney ache, and that Dodd's Kidney Pills will cure it. The people of Lucknow may be right, and indeed they are right, to a certain extent. But they are laboring under a mistaken impression if they imagine they have made a new discovery in finding Dodd's Kidney Pills will cure Backache.

It is a well-known fact in all countries that Dodd's Kidney Pills are a specific not only for Backache, but for all forms of Kidney Disease—Bright's Disease, Diabetes, Rheumatism, Heart Disease, Bladder and Urinary Complaints, Women's Disorders and Blood Impurities. The people of Lucknow are none the less fortunate, however, in having a medicine that will cure these diseases, even though cures are not confined to their own town. Dodd's Kidney Pills comprise the only medicine that will cure them, and there was a time when the more severe of the maladies were incurable.

Mr. George Burgess, of Lucknow, says: "I have been sick for about five months. I had a terrible Backache all the time, and my kidneys were very bad as the doctor said. I was advised to use Dodd's Kidney Pills. I got one box and found relief almost immediately. I used three boxes altogether and am recovered completely. I can do my work better now than ever in my life before."

CLINGING BRIDAL GOWNS.

While the traditional white satin continues to be a greatly favored material for bridal gowns, it is this season rivalled by other rich textiles. The decided tendency towards the use of every sort of soft, clinging fabric is very noticeable among the newest models for wedding toilets. Peau de soie, crepe de chine, mousseline brillante over faille, liberty gauze over satin royal, and, lastly, lace of the most elegant description, are all employed, and in making up the fabric the princess style is notably favored. Entire lace waists, or lace guimpes and sleeves, are seen upon some models and on others there are lace overskirts, arranged about clinging trained skirts of peau de soie or lustrous reppe silk with a draped flounce to match placed around the bottom of the skirt.

Have You Catarrh?

If you are troubled with Catarrh and want to be cured, use Catarrh-zone, which is a guaranteed cure for this distressing disease. There is no mystery about Catarrh-zone, though its effect is magical. Ointments and snuffs cannot reach the diseased parts and have thus proved useless, but Catarrh-zone is carried by the air you breathe directly to the diseased parts, where it volatilizes, killing the germ life and healing the sore spots. It cures by inhalation. No danger, no risk, sold by all druggists or by mail, price \$1.00. For trial outfit send 10c, in stamps to N. C. Polson & Co., Box 518 Kingston, Ont.

WHALING BY ELECTRICITY.

It appears that electricity is to be used in killing whales. A dynamo is to be placed on a whaling ship. A big reel of insulated wire will be carried in a boat when a whale is sighted. One end of the wire is connected with the dynamo, and at the other end will be a hard rubber stick attached to a piece of metal twenty-four inches long and one inch in diameter, sharpened at the end to penetrate the flesh of the whale. When near the big fish the harpoon will throw the grab. When it strikes the whale a connection will be formed with the dynamo, the whale will get the shock of ten thousand volts and will be dead in a second.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up his constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J.
