Woman's work is never done. From early morn till late at right many a woman toils on day after day, week after week, and year a ter y ar, with no rest, no recreation, and n t even change of work, for it is the same monotonous round over and over

Little wonder that the nerves are shattered, the system run down, and the body racked by pains and aches. Little wonder that the head aches, the digestive functions are impaired, and the delicate organs hecome irregular. Little wonder that beauty fades, the skin becomes pale and sallow, and the body thin, weak and worn out.

To correct these ailments and to renew the vitality of the body a restorative is necessary, and there is no greater restorative known to man nan Dr. Chase's Nerve Food. It is a new wonder of medical science that gets down to the foundation and builds up gradually but surely antil the whole system is revitalized and disease becomes a thing unknown.
