

EDITORIAL NOTES

An industrial development equal to that at Niagara, perhaps even surpassing it in chemical and metallurgical discoveries and new ideas, is under way at Sault Ste. Marie. Not less than \$30,000,000 of capital is being invested with an implicit confidence in the capacity of the management, though it may be years before the returns will be commensurate, and though many of the investments are along lines so new as to bewilder experts who are told of what is being accomplished. As the basis of the entire work all the water power of Lake Superior at this point has been acquired, and before the establishments are fully completed the rapids of Sainte Marie will be dry, and all the vast flow of the lake will be at work, either turning wheels or passing ships through the canals and locks of the Sault. It takes one-one thousandth part of the water of Lake Superior to operate the ship locks, and why should not the rest be utilized in employing many thousands in industries which but for cheap water power could not be carried on, and in turning to account natural advantages and materials that but for cheap power would be wasted? It is not too much to say that millions will indirectly feel the result of the enterprises being installed.

The enterprise is being carried forward on two basic principles. One of these is that the days of large and steady profits in competitive industries are over, and that such profits must hereafter be made from original processes which shall be to a certain extent monopolistic, the word monopolistic being used to denote advantages of location and exclusive rights and materials. The second of these basic propositions is that to be successful in the broadest way industrial development must utilize only such materials, ingredients and methods as being natural to the locality can be cheaply assembled at the point of manufacture, and must utilize all of them, disregarding no by-product of possible commercial value that can be economically secured.

A few years ago a native of Bangor, went West to look up for some capitalists, a water power that could be improved and sold as electrical energy. At the lower end of Lake Superior he saw an opportunity to develop an immense power, and work was begun. A canal was cut that furnished 20,000 horse power. The locality was new and too far west. So in order to save the original investment it was found necessary to change their policy, utilize the power themselves, and find a means for development.

All above the Canadian Sault, north as far as Hudson Bay and east and west, are vast forests of spruce, the ideal wood for paper making. The Ontario Government was willing to furnish stumpage at low cost, and it was decided that the first development was a ground pulp mill. The largest mill in the world was built and is now making a product that for \$900,000 a year and fixes the price for paper pulp in all the American West, and ships to points from Japan to Europe. In one mail the other day came an order from the centre of the American paper-making region at Menominee, Wis., another from Nagasaki, Japan, and a third from France. A very large share of the mill's product for the past few months has gone to France and Germany. But the success of this mill was not achieved without a struggle. When it was built all wood pulp was shipped from the mill to the paper machines wet and there were paid freight charges on about 55 per cent of water. This limited the range of shipment. The new company experimented and found a process by which it could dry the pulp. Since then the field of shipment has been limited only by the demands of the paper trade. While mechanical pulp is worth \$30 a ton, sulphite pulp, wood treated chemically, is worth nearly twice as much, and the company with its unlimited supply of the best wood in the world decided to make this also. So now the largest sulphite mill in the world is nearing completion.

LONGEST BRIDGE SPAN.

The longest span in the world will be that of the great bridge which is to be erected across the St. Lawrence at Quebec. This is to have a central span of 1,600 feet. The Phoenix Iron and Steel Company, of Phoenixville, Pa., has received the contract. The bridge is to cost \$4,500,000. The longest bridge spans now in existence are the two main spans of the Forth Bridge, which are 1,710 feet in the clear. The Brooklyn Bridge, which once held the record, measures a few feet under 1,600 feet between its towers. The new Quebec bridge is to be of the cantilever type. That this type was chosen over that of the suspension bridge is probably due to local conditions, for the cantilever is by far the more costly type. The difference in cost increasing at a multiplying ratio of the increase in length.

A WOMAN'S FACE

PLAINLY INDICATES THE CONDITION OF HER HEALTH.

Beauty Disappears When the Dyes are Dull, the Skin Sallow, and the Wrinkles Begin to Appear—How One Woman Regained Health and Comeliness.

Almost every woman at the head of a home meets daily with innumerable little worries in her household affairs. They may be too small to notice an hour afterwards but it is nevertheless these constant little worries that make so many women look prematurely old. Their effect may be noticed in sick or nervous headaches, fickle appetite, a feeling of constant weariness, pains in the back and loins, or in a sallow complexion, and the coming of wrinkles, which every woman who desires comeliness dreads. To those thus afflicted Dr. Williams' Pink Pills offer a speedy and certain cure; a restoration of color to the cheeks, brightness to the eye, a healthy appetite, and a sense of freedom from weariness.

Among the thousands of Canadian women who have found new health and new strength through the use of Dr. Williams' Pink Pills is Mrs. Francis Poirier, of Valleyfield, Que., Mrs. Poirier was a sufferer for upwards of seven years; she had taken treatment from several doctors, and had used a number of advertised medicines, but with no good results. Mrs. Poirier says: "Only women who suffer as I did can understand the misery I endured for years. As time went on and the doctors I consulted, and the medicines I used did not help me, I despaired of ever regaining health. There were very few days that I did not suffer from violent headaches, and the least exertion would make my heart palpitate violently. My stomach seemed disordered, and I almost loathed the food I forced myself to eat. I was very pale, and frequently my limbs would swell so much that I feared that my trouble was developing into dropsy. I had almost constant pains in the back and loins. It was while I was in this sad condition that I read in La Presse of the cure of a woman whose symptoms were much like mine through the use of Dr. Williams' Pink Pills. I told my husband, and he urged me to try them, and at once got me three boxes. Before I had used them all I felt better, and I got another supply of the pills. At the end of the month I was strong enough to do my household work, and before another month had passed I had entirely recovered my health. I am sorry that I did not learn of Dr. Williams' Pink Pills sooner, for I know that they would have saved me several years of sickness and misery, and I feel that I cannot too strongly urge other sick women to use them."

The condition indicated in Mrs. Poirier's case shows that the blood and nerves needed attention, and for this purpose Dr. Williams' Pink Pills are woman's best friend. They are particularly adapted to cure the ailments from which so many women suffer in silence. Through the use of these pills the blood is enriched, the nerves made strong, and the rich glow of health brought back to pale and sallow cheeks. There would be less suffering if women would give these pills a fair trial. Sold by all dealers or sent post paid at 50 cents a box or six boxes for \$2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

He—Do you know what I would do if I were you? She—No. What? He—Pd marry me.

He—Do you know what I would do if I were you? She—No. What? He—Pd marry me.

He—Do you know what I would do if I were you? She—No. What? He—Pd marry me.

Intense Heat and Many Deaths.

Dreadful Sufferings Among the Poor and the Weak—Low Vitality Unable to Hold Out Against High Temperature—Safety in the Use of Dr. Chase's Nerve Food (Pills), the Great Blood and Nerve Builder.

The very old, the very young, and many in middle life, whose health was at a low ebb, met an untimely death in the hot wave which recently swept over this continent.

Is this not an emphatic warning against allowing the system to become run down in the summer time? You say: "I feel so weak and tired," "I have lost all energy and ambition," "I don't sleep well and cannot digest my food properly," "I am losing flesh and have headaches." The fact is you are depressed and debilitated by the summer heat, vitality is running low, and you need something to build you up, to enrich your blood, and to put new life and vigor into your body.

You cannot afford to neglect these danger signals, which tell of a system breaking down. You cannot afford to run the risk of becoming a victim of nervous prostration, paralysis, heart failure or insanity, when a few boxes of Dr. Chase's Nerve Food (pills) will thoroughly restore you.

By its wonderfully invigorating, strengthening and life-sustaining effects, Dr. Chase's Nerve Food (pills) makes life worth living even in the summer time. It so fills the body with pure, healthy blood and new nerve force as to overcome disease and its depressing symptoms, and fortify the

HERE AND THERE.

Items of Interest From Different Parts of the Globe.

The only two great European capitals that never have been occupied by a foreign foe are London and St. Petersburg.

In the Queen's saloon carriage, within easy reach of the bed, is a handle on the floor, by pulling up which Her Majesty can apply the brakes to the whole train at any moment.

At Queen Victoria's table an old custom, which originated at the time of George II, is preserved. As each dish is placed upon the table the name of the cook who prepared it is announced.

Rubies, when fine, are from five to ten times more valuable than diamonds of the same weight. A four-carat ruby may be worth from \$1,400 to \$3,000. A ten-carat ruby recently sold for \$10,000.

An organist who died in Sweden had held the position of choirmaster and organist in one church for seventy-two years without missing a service. He and his ancestors had played the organ in the same church for 200 years.

The biggest gun on earth has just been finished at the Watervliet Arsenal, the United States Government gun works. Its length is 49ft. 2in., and it weighs about 126 tons. It has a calibre of 16in., and can throw a shell weighing over a ton a distance of twenty-one miles.

In the German Army the step is reckoned at 31 1/2 in., and the number of steps in a minute at 112; in the Austrian at 29 1/2 in., and the number at 115 to 130; in the Italian at 29 1/2 in., and the number at 120; in the French at 29 1/2 in., and the number at 115; and in the English at 30 in., and the number at 116 steps a minute.

Among the varied treasures of the Shah perhaps the Peacock Throne ought to be accorded premier place. The frame is entirely of silver, and above it the gleams of silver melt into molten gold. It is encrusted from end to end and from top to bottom with diamonds. The rug on which the Shah reposes is edged with amethysts, and the pillow on which he reclines his Imperial head is fringed with pearls. Some travellers, Burton amongst them have estimated the value of the Peacock Throne at \$5,000,000.

A trade journal estimates the American "output" of bicycles for the past year at about eight hundred and fifty thousand wheels. More than one hundred thousand were exported, and about seven hundred thousand were reserved for home consumption. Yet the bicycle is now no novelty. It looks as if the people who have supposed and declared that wheeling was merely a temporary fad would have to own themselves beaten, and aim their dismal predictions at the motor-cycle and the automobile.

Siberia has recently furnished a new game-bird for the epicures of Europe. It is called the Siberian partridge, and is found in the mountains south of Omsk in southern Siberia, but its original home is said to be Manchuria. Its principal food consists of wild nuts, which give an exquisite flavor to its flesh. These birds, which have begun to appear by thousands in the markets of London, are shot during the winter and forwarded to England by way of the Baltic Sea.

Towne—Yes, I'm looking for a house; we'll have to move. The roaches where we are now scare my wife almost to death. Browne—I thought you said the only thing that could really frighten her was a mouse? Towne—That's just it. At a little distance these roaches look like mice.

SOMETHING QUITE NEW—

SALADA

CEYLON GREEN TEA

Same flavor as Japan, only more delicious.

About the House.

YOU SHOULD.

If a man faints place him flat on his back and let him alone.

If any poison is swallowed, drink instantly half a glass of cold water with a heaping teaspoonful each of common salt and ground mustard stirred into it; this vomits as soon as it reaches the stomach; but for fear some of the poison still remains swallow the white of one or two raw eggs, or drink a cup of strong coffee; these two being antidotes for a greater number of poisons than any dozen other articles known, with the advantage of their being always at hand; if not, a half pint of sweet oil or lamp oil, or "drippings," or melted butter or lard are good substitutes, especially if they vomit quickly.

The best thing to stop the bleeding of a moderate cut instantly is to cover it profusely with cobweb or flour and salt, half an inch.

If the blood comes from a wound by jets or spurts, be spry, or the man will be dead in a few minutes, because an artery is severed; tie a handkerchief loosely around near the part between the wound and the heart; put a stick between the handkerchief and the skin, twist it round until the blood ceases to flow, and keep it there until the doctor comes; if in a position where the handkerchief can not be used, press the thumb on a spot near the wound, between the wound and the heart; increase the pressure until the bleeding ceases, but do not lessen that pressure for an instant, until the physician arrives, so as to glue up the wound by the coagulation or hardening of the cooling blood.

If your clothing takes fire, slide the hands down the dress, keeping them as close to the body as possible, at the same time sinking to the floor by bending the knees; this has a smothering effect on the flames; if not extinguished or a great headway is got, lie down on the floor, roll over and over, or better, envelop yourself in a carpet, bedcloth, or any garment you can get hold of, always preferring woolen.

STEWES.

Plain Hamburg Stew.—Heat a tablespoonful of butter or nice drippings in a frying pan; put in a pound of finely chopped beef, called in trade "Hamburg Steak." Season to taste with salt and pepper and brown quickly, stirring most of the time to keep the crumbs of beef separated, and that the browning may be evenly done. Turn in a coffee cupful of boiling water. Thicken with a level tablespoonful of flour, mixed smoothly with cold water. Boil three minutes. Serve on squares or three-cornered pieces of buttered toast. Sprigs of parsley make a tasty garnish.

For breakfast or lunch this quantity is sufficient for four persons.

Hamburg Vegetable Stew.—Brown and season one pound of Hamburg steak as in preceding recipe. Have ready stewed in a stew pan one medium sized onion, minced or sliced, one large potato and one small carrot cut in dice, a tender turnip if sweet, and not at all bitter cut in dice and a little shaved cabbage may be added if liked. When vegetables are cooked a large cupful of liquor should remain in stewpan. Into this stir one teaspoonful of good beef extract. Mix this compound with the browned beef. Thicken slightly and boil three minutes, being careful not to burn. Serve on buttered toast or with egg dumplings.

Egg Dumplings.—One cup of flour, one egg, pinch of salt, dash of pepper, one teaspoonful baking powder, enough rich milk to make as stiff a batter as can be nicely handled with a spoon.

With a teaspoon drop a spoonful of this batter first in one side of the stew pan and then in the other until all is used. Cover stewpan tightly and boil gently but constantly for from seven to ten minutes, according to size of dumplings.

An asbestos mat placed under stewpan will usually prevent scorching.

Chicken Stew with Rice and Curry.—To many farmers' tables the use of curry powder is unknown. If the following recipe is tried I believe it will be found so reliable as to be oft repeated.

Put up a chicken, an old fowl is nice cooked in this way or remnants of cold chicken may be used. Stew until sufficiently tender to remove bones. After bones are removed cut up meat rather coarsely and return

to liquor in stewpan. There should be just enough liquor to cover the meat. Salt to taste and add a good teaspoonful of India curry powder, to a quart of stew. Thicken with flour thickening and let boil two or three minutes.

Have ready one cupful of rice boiled in three cupfuls of water seasoned with one teaspoonful of salt. It is easy to boil rice perfectly when a double boiler is used. To save time boil the rice on the stove without the outer boiler until the water is nearly absorbed. Then use the double boiler to finish.

Heat the chicken and curry in the middle of a deep platter and put rounded spoonfuls of the snowy rice about it. Or if preferred put spoonful of boiled rice in centre of platter and pour curried chicken over it.

APPLE PUFFS.

For six persons: One pint flour, two teaspoonfuls of baking powder, one level teaspoonful of salt, enough sweet milk to make stiff batter, three cupfuls of tart apples peeled, cored and chopped.

Have ready buttered six cups or jelly glasses, fill these nearly full with the batter and apples in alternate layers, putting the first layer of apples and the last of batter. Place glasses in steamer, cover tightly and steam over rapidly boiling water for twenty minutes without removing steamer cover. If apples do not seem quite done, steam a few minutes longer, but too long steaming makes batter tough.

When done turn from glasses into pudding saucers and serve at once with lemon cause or with a sauce made as follows:

Two cupfuls of apple juice strained as for jelly, one cupful of sugar, one-half cupful of butter, put in saucepan and let come to a boil and thicken with a dessertspoonful of flour mixed smoothly with a little cold water. If desired, color any preferred shade with Dr. Price's fruit color and add any liked flavor, or color with home-canned raspberry or blackberry juice and add no other flavor.

ONE ACCOMPLISHMENT FOR GIRLS.

Every girl, in whatever station of life she may be placed, should be brought up to mend her own clothes and do a certain share of a younger sister's or brother's, or something for her parents. Even where people are rich enough to keep lady's maids it does not follow that their children will be able to do so to the end of their lives, and many a girl has married and gone out with good prospects to some country or colony where no one can be got to perform these little services for either love or money, and, if not able to do them for herself, she has been in a very poor plight.

SALT USEFUL IN MANY WAYS.

A strong solution of salt and water may be used to clean bedsteads. The cleansing properties of the brine make it efficacious.

Willow furniture may also be cleaned in the same manner. Rub it with a nailbrush and dry thoroughly.

Salt dissolved in alcohol will remove grease spots from cloth.

Salt dissolved in lemon juice is invaluable for removing stains from the hands.

Salt sprinkled about the garden walks and places frequented by snails will effectually remove those creatures.

Ink stains in linen can be removed if they are first washed in a strong solution of salt and water, and then sponged with lemon juice.

A brine of coarse salt and water will destroy weeds.

QUEENS IN UNIFORM.

Young Queen Wilhelmina's joy knew no bounds not long ago when the Kaiser appointed her colonel of the 15th Hussars, though it was not her first command. The Queen of Saxony is highly popular with her soldiers, and often displays her gorgeous uniform at the monthly drills of her corps, the 2nd Royal Saxon Queen's Hussars. The Queen of Greece gets much satisfaction and a fair amount of glory from being the only lady admiral in the world, Alexander III. was always extremely fond of his young relative, and, knowing her Majesty's passion for the sea, gave her ships instead of troops.

TROUBLES.

A crowd of troubles passed him by. As he with courage waited. He said: "Where do you troubles fly When you are thus belated?" "We go," they said, "to those who mope. Who look on life dejected; Who weakly say good-bye to hope— We go where we're expected."

"What the fool does in the end, she wise man does at the beginning." Try a package of Blue Ribbon Ceylon Tea today.

THE DEMAND FOR

LUDELLA

CEYLON TEA has been phenomenal. Four years ago practically unknown. To-day a household necessity the result of careful blending and expert packing. In Lead Packets, 25, 50, 40, 80 and 600.

MADE A FORTUNE IN ANTIPODES.

Sir Rupert Clarke, represents the greatest fortune ever made in the Antipodes. His father emigrated to Tasmania early in the century, and went into the cattle trade. Subsequently he extended his operations to Victoria, and acquired immense pastoral property. Being a man of simple habits he lived with great economy, and left property worth \$5,000,000. Unlike the majority of rich Australians, Sir Rupert Clarke sticks to the land of his birth, and lives chiefly at his beautiful seat in Victoria.

THE COST OF WAR.

Some idea of the cost of the South African War may be derived from the amount of war material sent out. One hundred and seventy million rounds of small-arms ammunition have been dispatched, in addition to 886,000 rounds for field guns, howitzers, etc. To clothe our troops we have set out 280,000 khaki suits, over 370,000 pairs of boots, 200,000 jerseys, 1,020,000 pairs of worsted socks, 400,000 flannel beds, and over 500,000 flannel shirts. Besides these, some 18,000 tents, 430,00 blankets, and 800,000 waterproof sheets have been forwarded.

FOR OVER FIFTY YEARS

MRS. WINSLOW'S SOOTHING SYRUP has been used by mothers for their children's teething. It soothes the child, softens the gums, relieves colic, and is the best remedy for diarrhoea. 25c a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

PASSWORD TO THE TOWER.

The Lord Mayor is the only person, besides the Queen and the Chief Constable, who knows the password to the Tower of London. The password is sent to the Mansion House quarterly, signed by Her Majesty.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly falling upon local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful, it acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address, F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Hall's Family Pills are the best.

Dodd's Kidney Pills

THIS WAS A FUNERAL WORTH HAVING.

A scene the like of which has rarely been witnessed in Wales was the funeral of Aferman David Morgan, the miners' agent of Aberdare. Eighteen collieries in the valley ceased work at noon, and almost every man of the ten thousand people employed at these collieries attended the funeral. Most of them had walked a distance of five miles, from Aberdare to Mountain Ash, where the funeral took place. The scene—the procession being over a mile in length—was very striking, especially when the huge concourse, led by a united choir numbering over five hundred sang pathetic funeral hymns in the minor key so dear to the hearts of Welshmen. In the cemetery the vast gathering sang a well known Welsh hymn. The effect was electrical, and scores of strong men burst into tears.

WHICH?

A young and newly-married couple were entertaining their friends, and amongst the guests was one whose continued rudeness made him extremely objectionable to the rest of the company.

His conduct, although almost unbearable, was put up with for some time, until at supper he held up on his fork a piece of meat which had been served to him, and in a vein of intended humour he looked round and remarked, "Is this pig?" which immediately drew forth the remark from a quiet-looking individual sitting at the other end of the table, "Which end of the fork do you refer to?"

AN EXTENDED EXPERIENCE

Writes a well-known chemist, permits me to say that Putnam's Painless Corn Extractor never fails. It makes no sore spots in the flesh, and consequently is painless. Don't you forget to get Putnam's Corn Extractor, now for sale by medicine dealers everywhere.
