The two kinds are made on the same principle, with the possibility of better workmanship and cutting features in favro of the pruners.

"Hoofs should be trimmed not only for the convenience of the sheep in travelling, but to insure the health of the hoofs. Hoof growth is stimulated by low ground, and the moisture which forces the hoofs has a striking tendency to promote hoof disorders.

"Irregular-shaped hoofs have a tendency to coilect fiith and retain it indefinitely. A sheep that is at all inclined towards foot rot will have the trouble greatly aggravated by this collection."

LIFTING ROOTS.

The work of harvesting the Swedish turnips may be done much more easily by running a plow along at the side of the row, turning the soil away from the roots. While some varieties root very deeply there are others which do not need this assistance. Even the carrto and parsnip may also be taken up much more easily, but it needs one to throw them out behind the team if they are so closely planted as not to give space enough for the horse to walk between the rows. When they are in double rows between two rows of celery, or have been in alternate rows with onions, as some grow them, they can be reached even without throwing the roots out of the way. To one who has not tried this it would be astonishing to see how easily a carrot a foot long will lift when a furrow six inches deep has peen made at one side of the row.

FRENCH METHOD.

Whereby H bitual criminals Are Forced to Become Good Citizens.

In France they manage the habitual criminal question better than any other country in the world. For instance, a pickpocket, a professional beggar, or a habitual "drunk and disorderly" is brought up for his or her fourth or fifth conviction. It is proved beyond doubt that he or she is incapable of performing the duties, and therefore of exercising the rights of a free citizen; sentence is passed for the last time, a term of imprisonment is imposed which is really a preparation for the new life which the hopeless case, the piece of human refuse, is to lead.

"At the expiration of your sentence you will be placed in relegation," says the Judge.

That means banishment for life. The prisoner never sees his old haunts, as it can be.

France possesses two of these dumping grounds for human refuse, as they may be called. One is French Guiana, which is about one of the best places in the world to get out of and stay away from. The other is the Isle of the Escof Dr. Williams' Pink Pills After Pines, which is a coral-fringed par dise far away in the South Pacific, bill was even higher than it is now, Dyspepsia causes more genuine dis- one of the most beautiful spots ever tress than most diseases that afflict trodden by human feet or darkened

PRESENTS FROM ROYALTY

HER MAJESTY'S GOLDSMITH'S BILL IS A VERY HEAVY ONE.

German Emperor's Expenses Are Not So Heavy-The Car Always Liberally Rewards Public Services-Other Kulers Not So Generous.

So frequently does Queen Victoria bestow a handsome present consisting of a piece of jewellery or something of a similar nature on a subject who has been brought before her notice, that it is not surprising to learn that the goldsmith's bill for these articles frequently exceeds £10,000 per annum. What is more extraordinary, to gifts are seldom made alike, though they are invariably set with the Royal monogram in precious stones.

The work of designing and making these presentation gifts for the Queen occupies a large number of goldsmiths and jewellers all the year round. The designs are first prepared and submitted for the illustrious giver's approval, and she insists upon making the selection herself. They are then returned to the maker's and before many weeks have passed the finished article appears at Windsor and is put by ready for use.
