W. IRWIN, Editor and Proprietor.

DE. JAMIESON. The man to Vote for on May 29th

Vote for Jamieson, and help to get rid of the machine government.

The Toronto Globe said on January 22nd, 1902, "As a matter of fact, the Manitoba Liquor Act, which it is proposed to adopt in Ontario, is not prohibition, nor anything like prohibition-It could be more properly termed an act to prohibit the retail sale of liquor practical results from a scientific point in hotels. It permits the uninterruptvince, and its wholesale distribution throughout the homes of the Province | to questions of this nature. There are by agents of the liquor interest living many other practical questions with outside of Ontario."

The foregoing was the Globe's opinion at the time stated, and the aforesaid Manitoba Liquor Act is the measure of Temperance Legislation Premier Ross is asking the people to vote on in the Referendum arranged for December next. He calls the granting of the Referendum a fulfilment of the promises made by him and his predecessors, that as full a measure of prohibition would be given as the courts would decide the provinces had a right to grant. But according to the Globe of January 22nd, 1902, the proposed Act "was not probibilion, nor anything like prohibition," but according to the Globe since the Referendum was hit upon by Ross, the proposed Act is just the measure of prohibition that Premier Ross promised and the Referendum idea is a fair and just way for Ross to fulfil his promises to the temperance people.

In short we would like to know the temperance people are going to swallow their temperance convictions and accept the referendum as a complete fluifilment of the promises made by Premier Ross and the preceding premiers.

Temperance people should vote warranted in granting, extensive as cords wood, scantling for doors, it suits his purpose.

The following is Mr. Richardson's address, and we think it contains a good deal of practical common sense. THE ADDRESS:

Mr. M. K. Richardson (South Grey) Mr. Speaker, I have listened with much interest to the presentation of this case to the House by several speakers who have addressed it, and I GARDEN SEEDS-Rennie's tested have no doubt that the encomiums that have been bestowed on Captain Bernier are well deserved, but it does not necessarily follow, because we recognize his courage, daring, skill and this kind, that we should give encouragement to an enterprise fraught with ture. Let not such men be trusted. so much danger and having so little practical utility in view. When we look at the history of polar enterprise in the past we must concede that it has been one long sad story of disaster suffering and loss. Nothing so far has been attained. The loss of Franklin and his crew, the voyage of Captain DURHAM, MAY 8TH, 1902. McClintock in search of Franklin, the expeditions of Scoresby, Kane, Greely and others down to Nansen and the ill-fated Andree, fill out a long story of disaster and intense suffering. What is gained by it all? What is proposed to be gained for Canada by this enterprise? Nothing more than empty fame; and I hold that at this period of our country's history this is not something that we should strive very hard to attain to. We have much more practical things to give our attention to. It has been urged that it might add largely to the territory of Canada; but I hold that additional territory is not one of the pressing wants of Canada. We have now more territory than we know anything about. We have large regions practically unexplored and as yet untrodden by the white man. active citizenship again. One important step in this direction has been taken in the erection of the new Free Consumptive Hospital, due to the beneficence of two Toronto citizens, and which is now nearly completed. When the workmen go out of the building, and that will be almost immediately, all that is wanted to make it ready to receive the consumptive is that it be supplied with beds and other furnishing appointments, no charge whatever being made for
