OUR BIG CEMENT WORKS.

A Visitor Agrees With us in Saying They are the Best in the World.

TO THE EDITOR OF THE CHRONICLE.

DEAR SIR.—While in Durham last week I had the pleasure of visiting your magnificent cement plant, and I must say it is the most complete thing of the kind I was ever in, and this is saying a great deal as I have had the opportunity of visiting some of the largest and best mills in the United States. Through the courtesy of the Manager, Mr. Stanhope, and Mr. Calder, Ex-Mayor of your town, I was conducted through every department, from the dredging process at the Lake, over the railway and through the sundry processes of manufacturing. Without a break, and without the aid of ordinary manual labor, the raw material is carried automatically from its natural resting place until it becomes the finished product safely stored in the magnificent warehouse ready for shipment. As I said before, I have visited some of the best mills in the United States. I have visited the Carnegie Steel Works in Homestead and Bradock, near Pittsburg, and the Cement Mill in Durham is, without doubt, the most complete thing I ever saw. Prior to my visit, Mr. Editor, you claimed to have the most complete and up-to-date plant in the world, and with such an opinion I fully expected to meet with disappointment. I was disappointed sure enough, but it was a pleasant disappointment, and I now think you are perfectly justified in your claim, and the Durham people have now a manufacturing concern that any city should be proud of.

In concluding, I must again thank Messrs. Stanhope and Calder for their courtesy in showing me through the works and explaining so minutely every detail in connection with manufacture of cement.

Yours truly,
 JAS. HAMMOND,
 of the Reese Hammond Fire Brick Co.,
 Bolivar, Penn.

Have you Paid your Sub?

Notwithstanding the wet state of

POMONA

Mr. Angus Woodard, of Stayner, paid a brief visit to Geo. E. Arrow-smith and family a week ago.

The latest arrival to swell the infantry contingent is a young daughter to Mr. and Mrs. James Haley on Thursday of last week.

Save for a few finishing strokes by way of paint, etc., the new Pomona bridge is completed and open for traffic. It is a substantial looking structure, and we have little doubt but that it will pass the close scrutiny of the reeve and Commissioner McMillan. The old bridge will likely be sold and removed e'er winter closes.

Charles Tucker, who was employed in the Massey Harris works, Brantford, mostly all summer, has returned home as he was somewhat indisposed.

Mrs. McGrath, of the Globe hotel, Caylon, spent a few days last week with her sons here.

Mr. Malcolm McInnes, an old railroad man, of St. George, formerly a resident and still a land holder of this vicinity, after some 17 years absence, was the guest of J. S. Black and other friends last week.

If we mistake not 'twas Horace Greely who gave the advice in days gone by to young men to go West, but our stalwart Captain is said to favor the midsummer sun rising part of the compass, but is it not a little premature to discuss the probabilities of his attending the Teachers' Convention in 1903.

Mr. Archie McLellan, while painting on the new bridge one evening last week, got a fourteen foot fall. Happily no bones were broken but he was laid off work for a few days.

Miss McCabe, teacher St. John's Sep. School, is, we are informed, re-engaged for the ensuing year, which speaks more than anything we can write of her capabilities and likeableness for the position she occupies. We believe it is her intention to set up a school concert after Christmas holidays, and judging from her musical talent, she being leader of the choir, we predict for her a fair measure of success.

Notwithstanding the wet state of

the weather, a goodly number attended the last sad rites of Mrs. Ellen Meads, who was interred in St. John's fine new cemetery on Friday of last week. She had reached the age of 73 years, 8 months, and died at the residence of her son, William Meads, Artemesia, on Nov. 11th.

We have heard of no less than three law suits which are likely to take place between residents of our township in the near future, but as they have not yet come before the courts we will say nothing further at present.

Fox hunting is a dead litter to Dan McCormick since the death of his valuable hound. He probably ran himself to death, as he was not chained up all summer and sly Reynard got many a hard chase.

SACKETTS CORNERS.

Cloudy weather and muddy roads are the order of the day.

Mr. John McDougall has taken a well earned holiday, and has gone to the Island to visit friends. On his return, we will, no doubt, get treated to a roast of Venison, as John is a crack-shot.

Mr. Malcolm McCannel's son, Charlie, is improving after a severe attack of bronchitis and inflammation.

Mr. G. Witter is visiting his brother in Carrick.

Mr. D. McFarland has sold his farm to Robert Kennell and George Lane for \$3500. Kennell takes the west fifty, while G. Lane the east containing the buildings. Mr. McFarland expects to remain on the farm till spring. We are sorry to see Mr. McFarland going away as he is a first class neighbor, kind and obliging.

Mr. Jake Smith has moved to New England, it being more convenient to have his family near to where his work is located.

Mr. Malcolm McCannel has sold his three-year-old colt to Mr. Seiffred, of New England, for the sum of \$100.

Mr. and Mrs. Ronald McDonald are about to move in their new brick house. May they live long to enjoy it.

They Take Weeks.

Ordinary remedies sometimes take weeks to even relieve cases that Catarrhozone cures at once.

INHALE CATARRHOZONE five minutes now and again and it cures a cold.

INHALE CATARRHOZONE five minutes four times a day and it cures stubborn coughs.

INHALE CATARRHOZONE five minutes every hour and we guarantee it will cure any case of Catarrh, Bronchitis, Asthma, Lung or Throat Trouble, Deafness. It is very pleasant and convenient to use, quick to relieve, and certain as the hereafter to cure. Large size, complete, price \$1.00; small size, 25c. Druggists, or Polson & Co. Kingston, Ont.

APPRECIATED.

Presentation and Address to Mr. and Mrs. Will Hopkins, nee Allie Carson, of Durham.

We meet to-night to express our pleasure for the sojourn of our friends amongst us, and to offer our regrets on the eve of their departure. Mr. and Mrs. Hopkins have been associated with our church since the beginning of Hartney, and have contributed no small part to the success and interest of Methodism in this place.

Their liberality in contributing to the various funds of the church will not soon be forgotten. Such unstinted generosity is seldom found in societies to-day and is a work of the highest commendation and praise.

In early days Mr. Hopkins was a member of the church board, and assisted in every way possible to further the interests of the church and every moral reform. In the Sabbath School the lesson was made attractive and interesting by the beautiful colored drawings still fresh in our memory.

For the past few years Mr. Hopkins has not been a permanent resident of our town, but we are delighted that he, with his family, are still on the circuit. His business interests are removed to the town of Lauder. Just here we must say that no man has done more for the development and prosperity of this town by his energy and push in the addition of real estate and the maintenance of every moral reform. While business interests are changed, we are glad that social relations are not severed, and that we will often meet our friends again in this capacity.

This address would not be complete were we not to mention the high esteem and great appreciation we have for Mrs. Hopkins. It will not be flattery to designate her as one of the sweet singer of Hartney. The music of her voice and the earnestness of her manner will ever live in our memories. How often have wings been put to the sermon and cares turned into delightful pleasure as we have listened to her song.

Every department of church work received her hearty co-operation and support.

Our best wishes for the prosperity and welfare of our friends, with their dear children, are expressed in a slight degree by the accompanying gift.

Signed on behalf of the Methodist Church, Hartney, Man.

TO CURE A COLD IN ONE DAY
 Take Laxative Bromo Quinine Tablets. All Druggists refund the money if it fails to cure. E. W. Grove's signature on each box. 25c.

USE OF CONCRETE ON THE FARM

Synopsis of an Address Given by T. C. Raynor, Rose Hall, Ont., Before the St. John, N. B., Farmers' Institute.

Wherever a farmer is building new barns, or changing his stables, the question of the use of concrete for floors and walls is a live one.

In a country where lumber is comparatively cheap, concrete is not likely to come into general use for making walls of barns, but for flooring it is without question the best and cheapest substance that can be employed. Its first great quality is its durability. Properly put down it is practically indestructible. Then it is water tight, and will help in saving all the liquid voidings of the animals, and this in farm practice to-day is a most important matter. Fully 50% of the fertilizing value of the manure is in the liquid portion. By having concrete floors and using plenty of absorbents this can all be saved and put on the land where it will do the most good.

Concrete is a mixture of clean gravel or pure sand and cement. There are several kinds of cement. In Ontario they have natural rock cement, which is manufactured at Queenston and Thorold, and this, while not as strong as the Portland cement, is cheaper and does very well. In some sections the Portland cement will be the best to use.

Laying concrete floors does not require skill which an intelligent farmer cannot supply. First make a solid smooth floor, 12 ft. square, two inch lumber preferred. Then a box without a bottom should be made in which to mix the gravel and cement. This can be made of such a size as to accurately measure the gravel or sand. The gravel and cement are then put into this box in the proportion required, the box taken off, and the mixing of cement and gravel or sand thoroughly done with a shovel. It should be shovelled over twice at any rate, while it is dry, and shovelled up into a cone; then before applying the water the cone should be pulled down making the mixture in the form of a ring, leaving a hollow in the centre bare to the floor. Into this water should be poured, and dry gravel and cement turned from the outside of the ring to the centre. This will be pulled out again from the centre and more water added until the mixture becomes of the consistency of thick porridge, so it will run down but not be soft. The proportion in which gravel or cement can be used depends somewhat on the strength of the cement. With good Portland cement, one part of cement to six or seven of gravel could be used for the lower part of the floor, but this should be covered with a veneer of one part of cement to two of clean sand. If an extra fine hard finish is required use equal parts of cement and sand.

Before laying the stable floor a good foundation should be prepared. It should be made firm and solid by the addition of gravel or small stones thoroughly pounded down and the floor shaped as is required for the stable. It is best to have a slight slope from the manger to the gutter. The plan of cow stable which is generally preferred has a square gutter two feet wide and eight inches below the level of the stall floor. This gutter is first made and the cement laid in it. Then a board mould is put up and the cement put in behind the boards and the boards left there until the cement gets firm.

In laying concrete only as much as can be conveniently reached, say a piece four feet square should be laid at one time. All the studding necessary in the construction of the stalls should be set on flat stones and the cement put round them. Great care should be taken when laying cement to thoroughly pound it down. After the floor is finished it should be sprinkled with water especially if the weather is dry. This should be done every day for a month. It will probably take from a month to six weeks for a floor to harden properly, and sufficiently to use, and it will not become thoroughly hard for six or seven months after having been put in. Large stones can and should be used in the construction of a concrete wall, if pains are taken to see that they are covered with at least two inches of cement on either side. A concrete wall one foot thick is sufficiently strong to carry any barn. This makes a thoroughly warm and dry stable wall. Fine stone from a stone crusher is an excellent material from which to make concrete. A barrel of rock cement will lay 55 square feet of 4 in. floor. Good qualities of Portland cement should do more than that.

By the use of corrugated sleepers made like railway rails it is quite practicable to make a good floor which would form the ceiling of the story below. The sleepers should preferably be made of iron, and laid sufficiently close to make the structure solid. Such a floor prevents any leakage through to the space beneath.

F. W. HODSON,
 Live Stock Commissioner.

Loss of Flesh

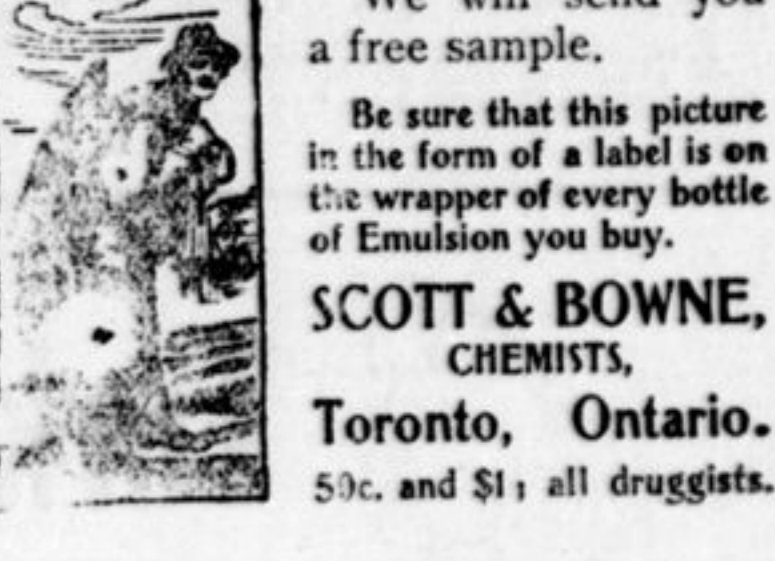

When you can't eat breakfast, take Scott's Emulsion. When you can't eat bread and butter, take Scott's Emulsion. When you have been living on a milk diet and want something a little more nourishing, take Scott's Emulsion.

To get fat you must eat fat. Scott's Emulsion is a great fattener, a great strength giver.

Those who have lost flesh want to increase all body tissues, not only fat. Scott's Emulsion increases them all, bone, flesh, blood and nerve.

For invalids, for convalescents, for consumptives, for weak children, for all who need flesh, Scott's Emulsion is a rich and comfortable food, and a natural tonic.

Scott's Emulsion for bone, flesh, blood and nerve.

We will send you a free sample. Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE, CHEMISTS, Toronto, Ontario. 50c. and \$1. all druggists.

CONSUMPTION CAN BE CURED

EDITOR'S NOTE.—The Slocum System of Treatment for the cure of Consumption, Pulmonary Troubles, Catarrh, General Debility, and nearly all the ills of life, is medicine reduced to an exact science by the world's foremost specialist. By its timely use thousands of apparently hopeless cases have been permanently cured. The Emulsion of Cod Liver Oil is needed by some, the Tonic by others, the Expectorant by others, the Oxojell by others still, and all four, or any three, or two, or any one, may be used singly or in combination, according to the needs of the case. Full instructions with each set of four free remedies illustrated here. Our readers are urged to take advantage of Dr. Slocum's generous offer.

THE FREE TRIAL

The honor of thus effectively arresting the progress of this fatal malady rests with the wonderful system of treatment which has been reduced to an exact science for the cure of Consumption and other prevalent conditions which pave the way for Consumption—that successful method evolved by America's greatest scientific physician, Dr. T. A. Slocum, whose great liberality, through his Free Trial Treatment, sent broadcast throughout this broad land, has contributed most to the rout of the most potent agency in the destruction of human life in this hemisphere.

His Free System of Treatment has arrested the hand of death in the cases of thousands of consumptives and has prevented the disease in countless instances.

The Slocum Treatment consists of four distinct remedies for the cure of Consumption, Weak Lungs, Bronchitis, Catarrh, and all pulmonary and wasting diseases, and is based upon principles essential to the correction of function, the rebuilding of the tissues, the overthrow of parasitic animal organisms and the estab-

lishment of health in all the departments of the human body.

The four preparations embody all the necessary elements of a complete treatment for Consumption—its cure and prevention—as well as for most of the chronic and wasting ills of life. Apparently hopeless cases are cured by their timely use.

These free remedies comprise the great curative forces discovered by the eminent physician, Dr. Slocum, they represent the acme of the pharmacist's skill and with them will be found explicit directions for their use in any case.

You are invited to test what this system will do for you, if you are sick, by writing for a FREE TRIAL TREATMENT and the Four Free Preparations will be forwarded you at once with complete directions for use.

Simply write to the T. A. Slocum Chemical Company, Limited, 179 King Street West, Toronto, and the free medicine (express address, and the free medicine (the Slocum Cure) will be promptly sent. Persons in Canada seeing Slocum's free offer in American papers will please send for samples to Toronto.
