Pale Faced Nervous Women Always Grow Strong and Have a Rosy Complexion by Using Ferrozone.

Ferrozone is by long odds the best tonic for pale-faced girls and exhausted women. It forms the right kind of blood and tissue for rebuilding the system. It replaces tiredness by energy and vim, and adds nerve force and staying power. Miss Dorothy E. Leduc, of Chester, gives the following convincing evidence of Ferrozone power.

"My work compels me to rise early in the morning and work ten hours a day as saleslady. Last spring I was run down, lost my color and fell off in weight, I seemed to lack ambition and the life was out of me. A friend recommended Ferrozone and I took one tablet after meals with wonderful results. Ferrozone gave me back my complexion and has given me new strength and abundance of energy and spirits. I would advise all young ladies to use Ferrozone."

Found Dead.

Yesterday morning a young man about 28 years of age by the name of Chas. Fleming was found dead by the section men a few miles west of Thornbury. It appears he was walking from Meaford to Thornbury on the railway track after dark, and about 100 yards from the townline on the Collingwood side there is a culvert on the railway track where the road passes through Mr. Chas. Grant's property, about six feet wide. It is supposed he was not aware there was any culvert and when he can to it he evidently lost his balance and fell striking his head on the opposite timbers or on the steel rails with such force causing instant death, as he still had the cigar he was smoking in his mouth when the body was found.

The body was brought to the station and his friends communicated with in Owen Sound, who telephoned back to prepare the body for burial. Coroner Hurlburt is of the opinion that the young man was dead for a couple of days as the body was frozen stiff when found.—Clarksburg Reflector.

SEED CORN. Reliable Seed Corn Difficult to Obtain.

As a fodder crop the corn plant is an important one. For ensilage purposes a proper combination of stalk, leaves and ears is desired. Varieties that are suitable for ensilage are not, as a rule, the most profitable to grow for husking on the same farm or in the immediate locality. The largest yields of fodder are obtained for the later ripening varieties, and for ensilage the best returns are obtained from sorts that will just reach the glazed stage of ripeness before the time for early frost. Varieties that give the largest yield of good ensilage in Eastern Ontario, Quebec and the Maritime provinces are among the best varieties for husking in South Western Ontario, and the best varieties for ensilage in the latter district are grown for husking in the great corn belt. It is not to be recommended, then, that farmers along the northern corn belt grow their own seed for ensilage corn. In securing their supplies of seed they became accustomed to depend entirely on their seedsmen. A great deal, therefore, depends on the care exercised by seed merchants in securing their supplies of seed corn.

Owing to the male and female organs of reproduction being borne on different parts of the same plant it is difficult to keep varieties pure. The pollen is borne on the tassel and must come in contact with the silk before seed formation can take place. The pollen is carried chiefly by the wind. Even when planted two or three hundred yards apart, two distinct varieties become cross fertilized, and in consequence, established types become broken down. The characters of a variety of corn cannot be preserved unless a system of continued selection of seed be followed and the crop for seed be grown at least a quarter of a mile distant from any other type or variety.

Variety names have become very much confused and are not a safe guide unless the seed be obtained from a skilled grower of seed corn. Cross-bred seed corns sold under the names of favorably known standard varieties have been the cause of much disappointment and loss in crop. There are, in many cases, exceedingly wide differences between two strains of seed which bear the same variety names. Under existing conditions Canadian corn growers cannot do better than endeavor to get seed of the best known standard varieties from sources that have been proved to be the most reliable.

The Seed Growers' Association recently organized by Prof. Robertson, has a wide field for useful work in encouraging the production of high class, pure-bred seed corn. There is no line of work, that the growers of pedigreed seed may take up, that is likely to prove more remunerative than the growing of seed corn of varieties that are suitable for ensilage purposes in the northern dairy districts. Although there are seventy-five farmers in Ontario who are giving special attention to growing high class seed grain as members of the association, only nine of them are growing seed corn. It is hoped that others may be induced to take up the work. According to the rules of the association seed corn growers are required to grow but one variety on the same farm and keep it pure by following a system of selection similar to the plan adopted by the Illinois Seed Corn Breeders' Association. Arrangements are being made by Prof. Robertson for issuing an annual association catalogue for the purpose of advertising pedigreed seed produced by members. Herein is provided an opportunity for seed growers to build up a reputation as producers of high class pedigreed seed of corn and other cereals. Because of the increasing demand and limited supply of reliable seed corn the production of pure bred seed of this important cereal offers special inducements.

No Difference.

No distinction is made as to the kind of Piles that Hem-Roid cures. The names internal, External, Bleeding, Blind, Itching, Suppurating, etc., are simply names of the different stages through which every case will pass if it continues long enough.

Piles are caused by congestion or stagnation of the blood in the lower bowels, and it takes an internal remedy to remove the cause. Dr. Leonhardt's Hem-Roid is a tablet taken internally. It is a permanent cure and no case of Piles has ever been found it failed to cure. Money back if it does. A guarantee with every package at Darling's drug store.

For Sale.

The Origin of Red Fife.

About the year 1842, Mr. David Fife, of the Township of Otonabee, Canada West, now Ontario, procured, through a friend in Glasgow, Scotland, a quantity of wheat which has been obtained from a cargo direct from Dantzic, Prussia. As it came to hand just before spring seed time, and not knowing whether it was a fall or spring variety, Mr. Fife concluded to sow a part of it that spring and wait for the result. It proved to be a fall wheat, as it never ripened except three ears, which grew apparently from a single grain. These were preserved, and although sown the next year under unfavorable circumstances, being quite late and in a shady place, it proved at harvest to be entirely free from rust when all wheat in the neighborhood was badly rusted. The produce of this was carefully preserved, and from it sprung the variety of wheat known over Canada and the Northern States by the different names of Fife, Scotch and Glasgow.—Farmers Advocate.

BLOOD POISON For over thirty years we have treated and cured all forms of Blood diseases, both hereditary and acquired. Our New Method Treatment is original with ourselves, and never fails to eradicate the poison from the system. Beware of mercury and other mineral poisons, which so many doctors prescribe for this terrible disease, as they will ruin the system. Other treatments drive the poison into the system, whereas our treatment destroys the virus or poison in the blood and removes it from the system entirely, so the symptoms can never return. If you have any of the following symptoms consult us before it is too late: Eruptions, eruptions or pimples; falling out of the hair, itchingness of the skin, stiffness or pains in the joints, soreness in the muscles, sore throat, ulcers or bad taste in the mouth, sore tongue, soreness of the stomach, enlarged glands, running sores, etc. Our New Method Treatment will purify the blood, heal up the sores, remove all pains; the hair will grow in again, all organs will be restored to their normal condition, and the patient prepared to renew the duties and pleasures of life.
