The first thunder storm of the season took place Sunday night, The lightning which was very severe does not appear to have done a great deal of damage in this locality. On Monday it was reported that a barn had been burnt near Cargill, later on it was said to have been a livery stable. As a matter of fact it seems to have been a hog pen, owned by Jack Lochleen. The pen was destroyed but the pigs escaped .-Walkerton Telescope.

Gambling by wire on horseracing has received a killing blow by the action of the Western Union Telegraph Company in cutting off communication with all the poolrooms in the United States and Canada. New York expert in the business is authority for the statement that it cost the bookmaker twenty dollars a day to run the system of supplying racing news for betting. The company was urged to the surrender of this immense income by the taunts and reproaches of the newspapers, led by the New York "Evening Post" which gave the very respectable president to understand that he must be accounted anything but a gentleman and a Christian so long as his company was supplying the means of this demorlizing vice. As this amount must have come out of the pockets of the fools who frequented the pool rooms, with probably much more in profit to the managers, some idea the enormous extent of the evil may bo obtained. The betting public must have been losers all the time, or the system could not have gone on then, of course individual betters would win enough to keep all in hope of being equally lucky some time that the gang inside got all the profit of the game, while those who put up the money had nothing but the craze of excitement to console them for its loss. It is not to be supposed that the professionals, who manage this immensely profitable business, will abandon it without a struggle. They are men of infinite resource in evad ing the powers opposed to them .-Arthur Enterprise.

At the same instance three bicyclists dashed by, one carrying a white parcel. The already frightened horse turned clear around and ran southward, where he was captured later, very little damage having been sustained. Mrs. Gordon suffered nothing more serious than a sprained wrist and a bad fright, but quickly recovered her nervous balance when the diplomatic County councillor induced her to take a humorous view of the affair .- Owen Sound Times.
