

### EGREMENT COUNCIL

Council met May 27th. Minutes approved. Comr. Gordon reported completion of contract of Drewrey's ridge from 1903 by C. Kirk and Mr. Young.

McArthur—Ferguson—That C. Kirk be paid \$25 and Mr. Young \$7 balance of contract, and Comr. receive \$1.50 fees.—Carried.

Order granted on recommendation of Comr. Gordon to W. Bye operating grader \$2.—Carried.

Comr. Robb reported facing piles Russell's bridge by J. Robb, cost \$350; filling washout on baseline by J. Hunter, cost \$150.

Ferguson—Gordon—That foregoing report be adopted and Comr. receive \$1.00 fees.—Carried.

By-law 169 to increase clerk's salary \$15, passed.

Robb—McArthur—That Council form into a Court of Revision with the Reeve in the chair.—Carried.

Members of Court subscribed to the required declarations. There was only one appeal, viz., that of Jas. H. McDougall, lot 8, con. 3. Too high assessment, reduced \$100.

Names entered on Roll:—D. McKinnon, tenant, pt. 21, con. 22; W. H. Hargrave, tenant, lot 18, con. 21; W. Haw, tenant, lot 24, con. 17. These were all the desired changes.

Robb—Ferguson—That the Court of Revision now close and the assessment roll of 1904 as now revised, be finally passed and council business be now resumed.—Carried.

Gordon—McArthur—That the assessor be paid \$55 on salary account.—Carried.

McArthur—Robb—That the reeve be instructed to deal with the lumber purchased for Dromore sidewalks in 1903, in the best possible way, as the reeve and villagers see fit, and report at next meeting of Council.—Carried.

McArthur—Ferguson—That this Council go into committee to appoint a treasurer with the reeve in the chair.—Carried.

The By-law to appoint a treasurer was read a first and second time. A considerable discussion arose about the reduction of the securities.

McArthur—Gordon—That By-law 170 to appoint a treasurer be filled with the name of Alvin Durrant as treasurer, salary \$80, be now read a third time, signed, sealed, etc.—Carried.

The reeve applied to have his dissent recorded to the passing of this By-law, on the ground that the treasurer's securities had been reduced from \$15,000 to \$12,000.

By-law 171 to issue debentures for trustees of U. S. S. No. 15, Arthur Egremont, Proton and West Luther passed, signed, sealed, etc., and publication of said By-law be made in Representative newspaper according to law.—Carried.

By-law 172 to appoint a man to operate grader was passed. Wm. Weir appointed operator, pay \$2 per day.

Ferguson—McArthur—That Thos. and Henry Reid be paid \$5 for work on roads last winter.—Carried.

Comr. Robb reported on keeping baseline open during snow blockade by Wm. McDougall, cost \$9.80.

Gordon—Ferguson—That report be adopted, order granted.—Carried.

Robb—Gordon—That P. McQueen be paid 50 cents, overcharge on statute labor in 1903.—Carried.

D. McQueen certified to repairing a bridge last December by A. McCachern, lot 27, con. 8, cost \$2.

Robb—McArthur—That an order be granted for said account.—Carried.

McArthur—Ferguson—That \$200 be granted to each road Comr. to expend on grading and gravelling.—Carried.

Robb—McArthur—That the clerk be instructed to notify township engineer to come and locate watercourse on Egremont and Proton townline as soon as possible.—Carried.

Ferguson—Gordon—That the reeve and Comr. McArthur be a committee to examine the Registry office regarding the new treasurer's securities.—Carried.

Robb—Gordon—That the reeve and Coms. McArthur be a committee to wait on all parties affected by the watercourse at Orchardville and report at next meeting of council.—Carried.

Resolved that the following accounts be paid:—A. Mitchell, express charges, 40 cents; Confederate office, printing, \$2.85; clerk, P. cards, notices to pathmasters, 75 cents; Representative office, Auditors' reports, \$13.14; Municipal World, schedules, etc., \$3.00; C. A. Drum, spikes Holstein sidewalks \$2.75; Comr. Holstein, plank certified to \$19.28; Comr. labor, \$9.25; clerk's quarter salary, \$35.

Robb—McArthur—That we now adjourn to meet on June 15th.—Carried.

D. ALLAN, Clerk

### The Greatest Family Remedy

And one well known to most Canadian homes is Nerviline, a perfect panacea for all internal and external pain. Mrs. M. E. Cartwright of Morris says:—I couldn't get along without Nerviline. When I get toothache Nerviline stops it. If I get a sick headache, have a trouble with my stomach or bowels I can rely on Nerviline to cure me promptly. To break up a cold or rub on for rheumatism or Neuralgia Nerviline has no equal. It's priceless in any family. Nerviline is king over all and costs 35c.

### Necessity the Mother of Invention

Mr. E. Bowman the photographer of Elmwood, Ontario, has invented and patented a new railway snow plough and has christened the same "The Ideal Cylinder Snowplough." As the name implies the effectiveness of this new invention lies in a large cylinder about eight feet in diameter and ten feet in length which is located in a horizontal position right across the front of the plough. The cylinder is in construction and appearance similar to an auger being in two parts with spiral plates working half right and half left. A boiler and engine is required inside the plough to supply the power to the cylinder. There is nothing complicated about the machinery, a piston rod from the engine to the centre of the cylinder doing the whole work. The plough is so effective that it does not merely take the snow and push it to the sides of the tracks but it picks it right off and throws it from 150 to 250 feet on each side, but it does not leave a straight bank along the sides, but it forces the snow away leaving a diagonal cutting. It will throw the snow clean over a cut 30 to 40 feet deep, and can be run at a speed of 40 to 50 miles an hour in any depth of snow and it makes no difference if the snow be hard or soft wet or dry. It requires very little power to push the plow as owing to the peculiar construction of the cylinder the snow flies away as soon as the cylinder comes in contact with it. This is a great advantage when the rail is poor as very little power is required for the motive power of the plow. The plough can be used without an engine drive wheels right on by putting the plow through the plough. If the railway company will use this kind of a plow right from the time the first heavy snow comes in the fall they will not be bothered with the snow all winter as the snow will be kept from banking up along the track because the plow throws the snow off the premises. Mr. Bowman's invention has been examined by experts and pronounced to be by long odds the best thing of the kind ever brought out and the railway companies are at present negotiating with the inventor with a view of giving the plow a thorough test. There is no doubt that it will do the work required of it and one of its strong points is its great simplicity and strength. Its adoption by all the leading railroads in the near future is almost a certainty.—Chesley Enterprise.

### Crawford.

Mr. Campbell Public school Inspector visited our school on Friday afternoon and found everything in excellent condition. He was especially pleased at the large attendance.

The Sacrament of the Lord's supper was administered in the Crawford Presbyterian church on Sunday at 3 o'clock.

Mr. and Mrs. Alex. Coutts left for their new home in Toronto. D. McDonald Sr. is spending a few days with Owen Sound and Shallow Lake friends.

Mr. Lamont of Brant made a pleasant call at Alex. McDonald's lately. The new organ for the Presbyterian church is expected to arrive this week.

Mr. and Mrs. J. Wilson of Louise, spent Monday afternoon at Mr. Anderson's.

Mr. John Scheuremann had a very successful barn raising on Friday. The timber went together without a hitch or accident of any kind. The inner man was satisfied by the good things provided by Mrs. Scheuremann. In the evening the young people tripped the Light Fantastic for some time.

Mr. and Mrs. A. McDonald spent Sunday at Dornoch.

Misses Katie Brown and Flora McDonald are in Glenelg this week assisting Mrs. McKechnie to bake for her barn raising.

Miss A. Collinson is visiting the Stinson and Scheuremann families this week.

Jessie McDonald returned from Hamilton on Saturday.

There was no service in the Presbyterian church on Sunday on account of the poor health of Mr. Garner who was to officiate.

A meeting was held in the school house on Saturday evening to make arrangements for the picnic. It was decided to hold it in Mr. Hastie's bush on Tuesday June 7th. A good programme is being prepared and an excellent time expected.

Miss Nancy Boyde returned from Shallow Lake Wednesday.

Mr. Crowder accompanied by Miss Hutton passed through our burg on Sunday.

### BENTINCK COUNCIL

Met at Allan Park on Saturday, 28 of May, 1904, as a Court of Revision on the present year's assessment. Members all present. After making and subscribing to the oath of office by the several members the Reeve was appointed chairman. There being no appeal against the assessment the court after revising the roll adjourned, and Council met for transaction of general business, the Reeve in the chair. Minutes of February meeting read and passed. On motion the roll was ordered to be received by council, and the assessor's salary of \$70 paid to him. The following petitions were received:—From R. G. Webber and others asking that Linnin's slaughter house be removed further from the public road than it is at present.—After hearing Mr. Linnin it was ordered that he be allowed time till next fall to remove said house. From John D. Clark and others asking council to furnish the wire to make a fence along lots 36 to 41 on con. 3, W. G. R.—Laid over for further consideration. From Philip Schmidt and others asking that Wm. Schmidt be paid \$2 for winter road through his place.—Petition not entertained. Account against one Martin Connor of \$18.20 from Owen Sound Hospital not entertained. The Reeve reported having let a new bridge at R. Kennedy's to Mr. Farrelly for \$990; also having expended \$12.63 on bridges. The treasurer presented his half-yearly report showing a balance on hand of \$2,792.19. Samuel Hopkins was paid \$2.40 for damages to furniture when fumigating house after diphtheria. \$1.90 was paid Municipal World for collector's roll. The Reeve and treasurer were instructed to borrow \$114.75 to pay for Elmwood commuted statute labor. The Elmwood commissioner was instructed to pay Henry Geisel \$1.50 for extra work in 1903. Pathmaster of division No. 7 was authorized to expend \$5 on roads received from timber sold. Mr. Willis, road commissioner, along with Mr. Rowland, pathmaster, were instructed to have road opened on cons 2 and 3, S. D. R. along lots No. 3. \$250 to each road division and \$25 to Elmwood were appropriated for road improvements. The Reeve also recommended the building of a new bridge at Eids' mill, S. L. 10, con. 2 north. Before doing so the Council asked him to communicate with builders of steel bridges to ascertain the cost of building the structures. Council adjourned to meet at Dornoch on August 1st next at 8 o'clock a. m. for transacting business and appointing a collector.—Post.

### HER BLOOD TURNED TO WATER.

And She Became a Prey to Pernicious Anaemia—Cured by the Great Blood-Maker

"About a year ago," writes Mrs. S. G. Stanhope of Rothesay, "my daughter complained of feeling tired. She was very pale and listless, and kept losing strength till too weak to attend school. The doctors prescribed different bottles of medicine but Emma kept getting worse instead of better. She had Anaemia and we were afraid for a while that she might never rally. We read of a similar case, that of Miss Descent of Stirling, Ont., being cured by Ferrozone, and this induced us to get it for Elaine. It took three boxes of Ferrozone to make any decided improvement, but when six boxes were used my daughter was beginning to be her old self again. It didn't take much longer to make a complete cure and I am convinced that there is no better blood-maker than Ferrozone. It has made a new girl of Elaine. She has gained ten pounds in weight and looks the picture of perfect health. She is stronger and enjoys the best of spirits. The credit of her recovery is entirely due to Ferrozone.

Every growing girl and young woman can make herself strong and healthy with Ferrozone. It makes blood, nerve and tissue—makes it fast and makes it to stay. Complexion soon becomes rosy, nerves get new strength, tiredness vanishes—perfect health is the reward for using Ferrozone which is sold by all druggists. Price 50c. per box or six boxes for \$2.50. By mail from the Ferrozone Company, Kingston, Ont. Get a supply of Ferrozone to-day.

### HEADACHE.

Headache that is congestive. Headache that is bilious. Headache that is neuralgic. Headache that is nervous. These conditions are overcome by the use of Dr. Leonard's Anti-Pill through removing the cause. Those who have periodical spells of headache,

associated with melancholy, nervous debility, weakness or trembling of the muscles, or insomnia, should follow the use of Anti-Pill once or twice a week for a few weeks after the trouble has entirely vanished. 50 cents of druggists, or by addressing WILSON-FYLL Co., Niagara Falls, Ont. Free sample to any address.

### ANTI-PILL.

SOLD IN DURHAM AT DARLING'S DRUG STORE.

### The Water Supply.

Some rather startling facts in regard to the water supply of our farms, cheese factories and creameries, were brought out at the conference of dairy instructors and experts held in Ottawa last fall, the official report of which is now being distributed by Mr. J. A. Ruddick, Chief of the Dairy Division, Ottawa. In discussing the sanitation of cheese factories and creameries Dr. Connell bacteriologist at the Kingston Dairy School, pointed out that one sanitary requisite is good water. Most of our factories obtain their water from shallow wells, only a few using water from deep wells, springs, creeks and rivers. Good water can be secured from shallow or surface wells; yet such water is always classified as suspicious by sanitarians when it is used for drinking purposes. The reason for this simply is that such water is ground water, derived by seepage through soil of the rain or snow water. Shallow wells are usually placed quite close to the houses or factories which they are to supply, and thus the soil in their neighborhood is apt to become contaminated, and this contaminated soil sooner or later carried by seepage into the well. Fortunately, the soil is an excellent filtering and cleansing agent, but it is only able to dispose of a certain amount of contaminating material. Such disposal takes time, so that if there is a particularly heavy rain, the contaminating matter may be carried far into the earth below the purifying layer, and thus below the water table. If a soak amount of this contaminating material finds its way into the soil, the earth becomes "soaked", and can no longer dispose of or purify the waste, which tends to soak into and mix with the ground water. Some surface wells are so constructed as to be mere surface drainage pits; that is, they are not raised above the surrounding earth, and hence receive the surface washing direct. Farmers and makers ought to realize that a surface well does not get its water from some hidden source below, but is simply a collecting reservoir for the ground water derived from rain and snow water. And further, that if the soil in the neighborhood of such a well is saturated with slop water and house or factory drainings that sooner or later these will make their way into the well.

Some tests, Prof. Shutt's chemical analyses of farm well water have shown the majority of the wells to be little better than cess-pools. From 100 to 200 samples a year are analysed at the chemical laboratory of the Central Experimental Farm, and not one-fifth of these can be passed as safe and wholesome. By far the greater number are utterly condemned, while others are reported as suspicious, putting them in the category of those that are unsafe to use. The bacteriological examinations of Dr. Connell, and Prof. Harrison of the Ontario Agricultural College, show similar results. Dr. Connell mentioned that out of a dozen factory waters sent him last summer not one was found fit for use. All were badly contaminated, and for drinking purposes would be immediately condemned. Later Mr. Connell had an opportunity of seeing two of the wells from which the samples were taken. Both were subject to direct gross contamination from drainage water lying under the factory floors, and the streams of dirty slime could be seen opening into the wells about four feet below the surface. Both these waters were very foul, so foul that animals could not touch them. Such a well is generally termed a "mineral" one in the section, probably because the sulphuretted hydrogen of decomposition causes an odor somewhat like that of natural sulphur water.

Improvement necessary. A factory well cannot be kept uncontaminated, so long as the drainage and whey disposal system of the factory is not carefully looked after, so that the first essential for pure water supply from the ordinary well is good drainage. Next is the proper construction of the well, including its covering, so as not to permit surface washings flowing in. As Prof. Shutt pointed out, this drainage matter, a part from its actually poisonous character, is the very material upon which microbes and germs live, and water polluted from the barnyard, privy, etc. is always loaded with countless millions of bacteria. It is impossible to turn out first class dairy products where such water is used, so even from the dollars-and-cents standpoint, improvement in this respect is imperative.

It is not the smell or appearance of water that denotes its condition. Many samples of water, which to the sense of smell or sight or taste are perfect, yet simply reek with filth. The bacteria which we cannot detect by our senses are far more dangerous than those which we can detect.

Yours very truly,  
W. A. CLEMENS,  
Publication Clerk.

### The Best Liniment.

"I have derived great benefit from the use of Chamberlain's Pain Balm for rheumatism and Lumbago," says Mrs. Anna Hagelgans, of Tuckahoe, N. J. "My husband used it for a sprained back and was also relieved. In fact it is the best family liniment I have ever used. I would not think of being without it. I have recommended it to many and they have always speak very highly of it and declare its merits are wonderful." For sale by H. Parker.—2.

### Town Lots for Sale.

IN THE CENTRAL PART OF Durham Four lots on the West side of Albert Street, for private residences. Now the time to get these lots. For further information apply to

J. M. HUNTER, Durham

April 12, 1904.—tf.

### For Sale.
